AMERICAN
TYPE FOUNDERS COMPANY

Everything for the Printer

ST LOUIS

NEW YORK

Manufacturing Foundries of American Type Founders Company

PHILADELPHIA

BOSTON

CHICAGO

CINCINNATI

TO THE PRINTER:

THE Type and Borders shown in this specimen book excel in design—the chief merit of type—and their durability is assured by the use of the celebrated Copper Alloy Type Metal

* The selection of styles of Type illustrated in this book excels in both variety and utility the combined product of all other type foundries * * * * *

* A printing office completely supplied with the products of this Company is worth far more for either use or sale than one made up from the productions of incomplete type foundries * * * * *

* It is conceded that the Type made by this Company is the STANDARD for excellence throughout the world. Every endeavor is made to advance that standard * * * * *

* As the largest purchaser of Printing Machinery and Materials in the world, this Company commands the best of everything for the printer, and has unsurpassed facilities for meeting the requirements of printing offices * * * * *

AMERICAN TYPE

FOUNDERS COMPANY

October, 1900

ALLOWANCE FOR OLD TYPE AND OTHER METALS

Old type (clean and unmixed with other metals), electrotypes, leads and brass, delivered at foundry free, will be taken at current prices in even exchange for new type or printing material.

Customers sending in old metal are requested to mark their names on all packages, and to forward by mail a shipping receipt or bill of lading, with the net weight of each kind of material, as soon as shipment is made. Compliance with this request will aid in identifying shipments, and prevent errors. Ship as "old metal" to secure low freight rate.

SPECIAL NOTICE.—Zinc plates, metal containing zinc, or type and other plates mixed with zinc plates, and stereotype plates, will not be received at any price. Type, electrotype plates, leads and brass, must be packed separately, as the value of each differs.

Roman and German Body Type is put up in fonts of 25, 50 and 100 pounds, or some multiple of these weights. Included in each 25 pounds are 5 pounds of Spaces and Quads, and same proportions in larger fonts.

Italic and Accents will not be sent with Roman fonts unless specially ordered. Smallest font of Italic furnished weighs 5 pounds. A pair of full-size cases holds 50 pounds of body type.

SPACES AND QUADS IN JOB FONTS

Spaces and Quads are put up in Job Fonts at the following prices:

| | Per Font | | Per Font |
|-------------------|----------|--------------------|----------|
| 5 Point | \$1 40 | 24 Point | \$0 60 |
| 5½ " | 1 00 | 28 " | 0 55 |

| 20 " | 0 60 | 96 " | 1 70 |
| 22 " | 0 50 | 120 " | 1 40 |

Spaces and Quads are also put up in assorted fonts of five pounds, at Body Type Prices.

ACCENTED LETTERS

We make a vast number of accented letters for both body and job type for use in the Spanish, French, German, Swedish, Norwegian, Danish, Italian, Portuguese, Polish and Bohemian languages. We print below assortments of accents used in various languages for the information of our customers, who will be informed upon application as to which of these accents can be supplied for any size or series of type. Accents not in common use in this country will be cut to order at a special price.

The following lower case accented letters of Roman and Italic are furnished with the body type for which they are made, and a number of these accented letters can also be furnished in capitals and small capitals.

Card Font, Roman, \$10 00
Card Font, Italic, \$10 00

When, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume, among the powers of the earth, the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation. We hold these truths to be self-evident, that all men are created equal; that they are endowed by their Creator with certain unalienable rights; that among these, are life, liberty, and the pursuit of happiness. That, to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that, whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute a new government, laying its foundation on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established, should not be changed for light and transient causes; and, accordingly, all experience hath shown, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But, when a long train of abuses and usurpations, pursuing invariably the same object, evinces a design to reduce them to absolute despotism, it is their right, it is their duty, to throw off such government, and to provide new guards for their future security. Such has been the patient sufferance of these colonies, and such is now the necessity which constrains them to alter their former systems of government. *The history of the present king of Great Britain is a history of repeated injuries and usurpations, all having, in direct object,*

8 POINT NO 50 °

WHEN, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume, among the powers of the earth, the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation. We hold these truths to be self-evident, that all men are created equal; that they are endowed by their Creator with certain unalienable rights; that among these, are life, liberty, and the pursuit of happiness.

We hold these truths to be self-evident, that all men are created equal; that they are endowed by their Creator with certain unalienable rights; that among these, are life, liberty, and the pursuit of happiness. That, to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that, whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute a new government, laying its foundation on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established, should not be changed for light and transient causes; and, accordingly, all experience hath shown, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. *But, when a long train of abuses and usurpations, pursuing invariably the same object, evinces a design to reduce them under absolute despotism, it is their right,*

CENTURY ROMAN

8 POINT

THE first number of *The Century* appeared in a modernized old-style type, which was then something of a novelty. It had never been used in any similar publication, and it gave distinction to the page. It had authority in its favor, as the outgrowth of a style (shown on pages 104 and 105 of this book), brought out by WILLIAM CASLON of London about 1720, and then so pleasingly cut that it broke down every attempt at rivalry. For seventy years it was commended as incomparably the best cut of type, but it went out of fashion. At the beginning of the present century readers complained of its angularity and grayness.

THEY demanded new styles, and the type-founders provided them in profusion: the Thorne fat-face of prodigious blackness; the Didot round-face, not quite as black or fat-faced; the Bodoni, with round letters and sharp hair-lines; the French poetic face, compressed to the extreme of tenuity; the so-called Scotch-face (devised by the late S. N. DICKINSON of Boston, who established the Dickinson Type Foundry, the Boston Branch of the American Type Founders' Company, although first cut in Edinburgh); and the skeleton light-face, with its razor-edged hair-lines and needle-like pointed stems, *fashionable during the first part of century*

WHEN PICKERING and WHITTINGHAM revived the CASLON Old Style, in 1850, using the identical matrices of the old master, the connoisseurs said, "Now at last we have returned to simplicity and beauty; this is perfection!" Yet it was admired by bibliophiles only; dainty readers did not approve of its angular letters and its disproportioned capitals. Accepted for reprints of old books, it was rejected for modern work. To make it palatable to the general reader, type-founders devised a "modernized old-style," in which harsh features were modified and new features of great delicacy were added. So changed, it became a more salable letter, but it never found marked favor with the ordinary newspaper or the book publisher. Critics said of it (too severely, we think) that the strong features of the Caslon face had been suppressed, and that the new features were no improvement; that it had *been made lighter, sharper, and broader, until its true character had been cut to pieces.*

ABCDEFGHIJKLMN OPQRSTUVWXYZ — \$1234567890

10 POINT

BIBLIOPHILES still prefer the cut of CASLON; with all its admitted faults, it is blacker, clearer, and more readable. The average reader rejects the angularities of the old and the new cut, and prefers the symmetry of types of modern fashion. In the bewildering variety of faces devised during this century, one peculiarity, the sharp hair-line (a fashion introduced by BODONI and DIDOT, in imitation of the delicate lines of the copper-plate printer), has never been changed. When printing was done upon wet paper, against an elastic blanket, the hair-line was necessarily thickened by its impress against the yielding paper, which overlapped the sides of every line. Under this treatment the hair-line appeared thicker in print than in type, and was unobjectionable to printer or reader; but when the new method began (as it *did in 1872) of printing on dry and smooth paper against an inelastic surface*

HISTORY OF THE RESCUE OF THE DUCHESS DE DRAGONFLIES.—EXTRACTED FROM UNPUBLISHED MEMOIRS OF THE NOBLE SIR JOHN BEETLEBACK.

OF the high doings chronicled in this reign few there be that smack more of herohood than the rescuing of the Duchess de Dragonflies, in ever-memory of which does our present sovereign, once Prince Junebug, bear upon his arms, gules, three dragonflies displayed. While I enjoyed the confidence of their serene majesties, honor forbade that I should set forth at large the true inwards of this so-called “rescue,” forsooth; but now that I be in exile, denied even the poor privilege of mingling my dust with that of my kin, naught hinders me from recounting this doughty deed of arms nor of depicting with what skill the re-capture of the Duchess was effected, and to whom her restoration was in truth owing.

Be it known, then, that the Baron Spiderlegs had long sorely coveted the broad estates of the Dragonflies; but dared not to make move to obtain them so long as the Duke held sway. But when his Grace had set forth for the Holy Land—whence all know he never returned—the Baron laid a crafty snare wherein he hoped to take the young Duchess. In this wise did he devise: Knowing full well that the Duchess yearned for fair flowers, and counted no hardship too grievous that gained a new blossom for her houses of crystal, he did craftily contrive to besprinkle her Grace’s daily walk with strange and curious flowers, the which were set in place by an Asiatic gardener, sent by night from the Baron’s castle for the doing of this very thing. Now these same blossoms did seem to grow more beautiful and rare day by day, and in degree that they were further afield from the palace of the Duchess and nearer to the Baron’s castle. And yet, such was the guile of Baron Spiderlegs, the Duchess could never by any chance come upon these same dainties of the woods save when alone or accompanied only by her maids or tiring women. A marvel, indeed, would this have been, were it not for the agency of the said Asiatic varlet, who, lurking craftily in hidden nooks, would take up all he had so laboriously planted, if so much as a single man-at-arms were in the train of the Duchess. So it came about that one day, as the Duchess de Dragonflies bent to pluck a blind gentian, a great cloth-web of silken stuff was dropped upon her; she was lifted to the back of a black charger and whisked away to the Baron’s castle.

WHEN, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation. We hold these truths to be self-evident, that all men are created equal; that they are endowed by their Creator with certain unalienable rights; that among these, are life, liberty, and the pursuit of happiness. That, to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that, whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute a new government, laying

We hold these truths to be self-evident, that all men are created equal; that they are endowed by their Creator with certain unalienable rights; that among these, are life, liberty, and the pursuit of happiness. That, to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that, whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute a new government, laying its foundation on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established, should not be changed for light and transient causes; and, accordingly, all experience hath shown, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they

WHEN, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume, among the powers of the earth, the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation. We hold these truths to be self-evident, that all men are created equal; that they are endowed by their Creator with certain unalienable rights; that among these, are life, liberty, and the pursuit of happiness. That, to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that, whenever any form of government becomes destruc-

WHEN, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume, among the powers of the earth, the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation. We hold these truths to be self-evident, that all men are created equal: that they are endowed by their Creator with certain unalienable rights; that among these, are life, liberty, and the pursuit of happiness. That, to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that, whenever any form of government becomes *destructive of these ends*, it is the right of the people to alter or to abolish it, and to institute a new government, laying its foundation on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established, should not be changed for light and transient causes; and, accordingly, all experience hath shown, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But, when a long train of abuses and usurpations, pursuing invariably the same object, evinces a design to reduce them under absolute despotism, it is their right, it is their duty, to throw off such government, and to provide new guards for their future security. Such has been the patient sufferance of these colonies, and such is now the necessity

DESCRIPTION OF SELF SPACING TYPE

SELF SPACING TYPE IS MADE UNDER PATENTS ISSUED DECEMBER 18, 1883

THE common widths of book pages, miscellaneous jobs and newspaper columns are some number of Pica ems, therefore the Pica em is taken as the basis for Self Spacing type. The thinnest space in all fonts is some exact fraction of a Pica, and this fraction of Pica is called the unit of measure. All characters, spaces and quads in the font are made some exact multiple of this unit in width, so that the sizes of all faces will work perfectly together in the regular labor-saving measures. This unit of measure may be one-sixth, one-seventh, one-eighth, one-ninth, etc., of a Pica em, as may be desired, to produce condensed, medium or extended faces. The following table gives the sizes of bodies, units of measure, and lengths of alphabets. In the first column will be found the various sizes of bodies; in the second, the number of units contained in one em Pica, and in the third the measurements of a lower case alphabet in the ems of each particular body:

| BODY | Number Units to Pica em | Length of Alphabet |
|--------------------------|-------------------------------|--------------------------|
| 5½ Point (Agate)..... | 12 | 167⁄8 |
| 6 Point (Nonpareil)... | 12 | 151⁄2 |
| 6 Point (Nonpareil)... | 11 | 17 |
| 7 Point (Minion)..... | 11 | 141⁄2 |
| 7 Point (Minion)..... | 10 | 16 |
| 8 Point (Brevier)..... | 11 | 125⁄8 |
| 8 Point (Brevier)..... | 10 | 141⁄8 |
| 8 Point (Brevier)..... | 9 | 151⁄2 |
| 9 Point (Bourgeois)... | 10 | 123⁄8 |
| 9 Point (Bourgeois)... | 9 | 133⁄4 |
| 10 Point (Lg. Primer)... | 9 | 123⁄8 |
| 10 Point (Lg. Primer)... | 8 | 14 |
| 11 Point (Small Pica)... | 8 | 122⁄3 |
| 11 Point (Small Pica)... | 7 | 141⁄2 |
| 12 Point (Pica)..... | 7 | 131⁄4 |

In the foregoing table will be found a Nonpareil with one-twelfth of Pica as the unit of measure. This is one-sixth of the body of Nonpareil, or the six-to-em space, and preserves in this particular font the old three-to-em space and the old en and em

quads. The same is true of the Brevier on one-ninth, Bourgeois on one-eighth, and Pica on one-sixth of Pica.

In a complete font of the old kind of body type there are about 190 widths of bodies. Appended is a table showing the different widths of bodies of Self Spacing. It will be readily seen that there are but nine widths of bodies all told, and that the four-unit width predominates largely over any other, there being fifty-nine characters of this width. We omit the Italic characters from the table, as they go on the same widths of bodies and are interchangeable with the Roman:

| | |
|---|-----|
| 1 unit —Space..... | 1 |
| 2 units—Space, f i j l , : ; . - ' ! I J ' | 16 |
| 3 units—Quad, c e r s t z s z I J ?) [* † ‡ § ¶ ¨ ° | 22 |
| 4 units—Quad, a b d g h k n o p q u v x y f i f l f f \$ £ 1 2 3 4 5 6 7 8 9 O A B C D E F G L N O P Q R T U V X Y & S Z . - { } \ / | 59 |
| 5 units—æ A B C D E F G L N O P Q R T U V Y H K M..... | 21 |
| 6 units—Quad, m w œ w Æ œ f i f l H K X & I b P @ — ... ¼ ½ ¾ ⅓ ⅔ ⅕ ⅖ ⅗ ⅘ | 27 |
| 7 units—W M..... | 2 |
| 8 units—Œ Æ..... | 2 |
| 12 units—Quad, — | 5 |
| 9 sizes. Roman characters..... | 155 |
| Italic characters..... | 77 |
| Total..... | 232 |

Any compositor can see that no combination of units can be made that will not come within a certain number of exact units of filling a line. If a line of matter lacks, it must lack one or more exact units.

Self Spacing type sets line for line with the ordinary Roman, where the lengths of the alphabets are the same.

Repeated experiments with the new type have shown that the average compositor gains about twenty-five per cent. in speed, with no trouble in justification whatever.

In the matter of the correction of proofs the gain is enormous. Say there is an "a" for "e"; as "a" is four units wide and "e" three, "e" and one unit space justify the line perfectly. Even this measure of trouble is avoided in many instances. As twenty-eight of the most common lower case characters are of the same width, they can be substituted for one another without the change of a space.

This type is of greater durability, as it is always on its feet and is therefore not worn by "pounding."

In tabular work there is a great gain in speed and neatness. By the addition of a new character, viz: "|", it is easy to set perpendicular lines of any length, line upon line.

It may be repeated that the compositor has nothing to learn in Self Spacing type. There is but a single direction to be given—to set that which looks like the em quad (six unit quad) with the nick out.

Whoever will study the principle on which Self Spacing type is based, will readily admit that it is bound to secure easy and perfect justification, greatly increased speed and consequent enormous saving, simplicity and rapidity of proof correction, and increased accuracy and ease in the setting of tables. All these points are beyond question, as certainly as the proposition that two and two make four is not open to argument. No rational person can doubt them.

The following piece of composition was done in a 12½-em measure stick, and set line upon line in the ordinary manner of straight reading matter, the lower part being leaded to show the method of setting:

| No. 1 | No. 2 | No. 3 | No. 4 | No. 5 | No. 6 | No. 7 |
|---------|--------|-------|-----------|--------|-------|--------|
| i and | I HX | I DLE | s aturds | i MP | I dim | ' D1N |
| s mit | I NK | s MIT | is thmui | s NK | s mit | s MIT |
| b rot | S LY | B AIT | ne ver fr | d LY | B rot | S AIT |
| si tly | E LS | M ine | Th ursci | si LS | M tly | E RK |
| m an | H IE | L ED | line forn | m IE | L nd | H AD |
| su it; | SI SI | SE ES | nine five | so IS | SE at | SI LS |
| no ts | NI X | PU ss | incre asi | mi X | PA st | BI ts |
| No is | SA T | No is | comp oz | ME T | MA D | SU it |
| gl ad | FO Z | FL T | Repea ti | gl a | S BIN | S FO x |
| mit e | OH I | SEA S | second r | snil I | SEA I | HO e |
| still i | \$34 ! | NOT I | beat th | this I | NOT ! | 234 I |

To further explain and illustrate the ease with which table work is done with Self Spacing type, we show above an example of miscellaneous justifications, which is absolutely impossible to accomplish with the old kind of type. In column No. 1 the first line begins with the lower case "i", two units wide, which is followed by the upright dash "|", two units, and the characters "a", four units, "n", four units, "d", four units, comprising sixteen units to accurately fill the column. The second line begins with the letter "s," three units wide, which throws the space rule one unit further to the right than in the preceding line. In each succeeding line lower case characters are used to the total width of sixteen units, and such characters are chosen for the first part thereof as will admit of advancing the space rule to the right exactly one unit in each succeeding line.

In the other columns the same plan is followed, the only change being the substitution of caps, small caps, figures, etc., for the lower case characters, all columns coming perfectly justified inside the perpendicular lines.

SELF SPACING SIGNS

These signs are furnished for every face of Self Spacing type, and may be used with point system bodies. When ordering state size of body and (if Self Spacing) number of face wanted.

SELF SPACING MODERN ROMANS

For description of Self Spacing Modern Roman and Old Style, see pages 128 and 129

5½ POINT SELF SPACING NO 19½

Unit of measure, 12 to Pica

WHEN, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume, among the powers of the earth, the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation. We hold these truths to be self-evident, that all men are created equal; that they are endowed by their Creator with certain unalienable rights; that among these, are life, liberty, and the pursuit of happiness. That, to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that, whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute a new government, laying its foundation on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established, should not be changed for light and transient causes; and, accordingly, all experience hath shown, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But, when a long train of abuses and usurpations, pursuing invariably the same object, evinces a design to reduce them under absolute despotism, it is their right, it is their duty, to throw off such government, and to provide new guards for their future security.

WHEN, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume, among the powers of the earth, the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation. We hold these truths to be self-evident, that all men are created equal; that they are endowed by their Creator with certain unalienable rights; that among these, are life, liberty, and the pursuit of happiness. That, to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that, whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute a new government, laying its foundation on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established, should not be changed for light and transient causes; and, accordingly, all experience hath shown, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But, when a long train of abuses and usurpations, pursuing invariably the same object, evinces a design to reduce them under absolute despotism, it is their right, it is their duty, to throw off such government, and to provide new guards for their future security. Such has been the patient sufferance of these colonies, and such is now the necessity which constrains them to alter their former systems of government. *The history of the present king of Great Britain is a history of repeated injuries and usurpations, all*

JENSON ITALIC

18 POINT

10 A 25 a \$4 00

THIS SERIES AS A DISPLAY LETTER is a novelty. It is of a distinct and striking character, and is made to the same line as the Jenson Old Style. Its usefulness as a companion letter will be appreciated by printers

6 POINT

20 A 50 a \$2 50

EVERYTHING FOR THE PRINTER, FROM A PAIR OF TWEEZERS TO A perfecting press (to say nothing of type) can be delivered on the shortest notice by any Branch House of the American Type Founders' Company. These Houses are all conveniently located throughout the United States for the benefit of the trade and to facilitate the work of supplying the demands made upon us by an appreciative and increasing patronage. Therefore, by placing your orders with the House nearest your place of business you will insure promptness.

A printing office that is supplied with the products of this Company is worth far more for use or sale than one made up from productions of incomplete type foundries. This Company leads in the production of popular type styles as the number of them used in standard magazines will testify. Many of its designs are imitated, but its originals are never equalled nor even approached. Unique types for all classes of work are being constantly brought out by this Company

10 POINT

20 A 45 a \$3 00

THE TYPE TURNED OUT BY THIS COMPANY CONCEDED BY EXPERT printers to outrank that of all competitors in beauty of design, style of finish, and in its wearing qualities. These cardinal features are, in themselves, sufficient to recommend them to the army of purchasing printers and magazine publishers as a saving investment

8 POINT

20 A 50 a \$2 75

NOW TO THE POINT THAT PINCHES—THE SPENDING OF MONEY—WHICH HAS BEEN subject to discussion for time immemorial. When figuring on the cost of new type do you regard it as unnecessary expense or in the light of a good investment to buy the best? If as an investment, suppose a first-class style of type cost you a little more than a less attractive design, but the returns are double, which would be the most profitable?

12 POINT

18 A 40 a \$3 25

“AD” WRITERS WHO ALWAYS COMMENDED THE use of old style letters to their clientele will recognize in Jenson Italic a monotony-breaking substitute, and the public will see it and be impressively attracted by advertisements set in this modest and character-giving letter. The aim of writers of advertisements is naturally to attract business to themselves. This can be done by attracting readers to those who advertise

In the earlier years of his life the parents of Horace E. Walker moved to Claremont, N. H., thence to Brooklyn, N. Y., the father returning to that place from a short stay in California. From thence the family returned to Claremont, at which place the author's poetic labors have since been performed. Come of poor parents his educational advantages were small, he not having attended school since he was about sixteen years of age; and his best work was mostly composed in a cotton factory while tending the Slasher so often referred to in his poems. But not till after he had reached the age of twenty-four did he attempt poetry. And strange enough, the "Lady's Cabinet of Polite Literature" was the star-book of his poetic career, which having been published in 1808, was enchanting to the view.

ROBERT BURNS
AND HIS

14 POINT ELZEVIR ITALIC

16 A 36 a \$3 90

On August 9, 1852, a child was born at Charlestown, N. H., who, Burns-like, was to eke out a precarious and uncertain poetic existence in the coming years. You see the little gable-roofed house where he was born at the foot of the long hill, with its ancient moss-covered watering trough, just on the outskirts of the historic town. It stands there to-day in its unassuming simplicity, with but slight marks of age, though nearly half a century has passed since its birth there.

OF DARDALE

FRENCH OLD STYLE No 2 ITALIC

8 POINT

We now come to the commencement of the third period of Grecian history, at which time the Grecians became intermixed with the Persians in their late history. Darius, son of Hystaspes, being in possession of the Persian throne, resolved to conquer the Greeks, and bring their territory under his immediate control. He therefore sent his army, under the command of his most able officers, into Greece, and the Persians were so sure of success that they carried

6 POINT

ARISTIDES WAS A STRONG CONTRAST TO THEMISTOCLES, and appeared everywhere to oppose his corrupt principles. He was a man of true and noble character, straightforward and upright in all his deportment. He would not sacrifice principle to favor his best friend; and because of these excellent traits of character he was called Aristides the Just. Aristides was banished from Greece at one time, through the influence of Themistocles, who wanted to be rid of his constant reproof, and when the people came to vote for his banishment, as was customary, the name of the accused was written upon a shell. A peasant who could not write, and who did not know Aristides personally, approached a stranger and requested that he would write the name of Aristides upon his shell; when the stranger asked: "Why do you vote against him; has he done you any wrong, that you are anxious to condemn him?" "No," replied the peasant, "I do not even know him; but I am tired and angry with hearing him called 'The Just.'" Then that stranger took the shell, and wrote the name Aristides upon it, and quietly and courteously returned it to the peasant. That stranger was Aristides himself.

wealth and considerable influence, which he used for that purpose. He favored those who would favor him in return; like some men of to-day. About election time there are often those who are ready to grant favors in order to secure the desired object. Their money is made to flow freely, and their affability is most remarkable. This was characteristic of Themistocles.

marble with them for the purpose of erecting a monument to their glory, as conquerors, when the Grecians should be defeated. The celebrated battle of Marathon followed, when the Persian soldiers came in contact with such men as Themistocles, Aristides, Miltiades, and many others of considerable note, distinguished for their courage and valor—who were prepared to resist them, and to defend their country. It is well to notice the character of these prominent men as they come before us in this capacity, and, in doing so, we shall see that they were not unlike men of our own times. The two first mentioned, Themistocles and Aristides, were a perfect contrast in their principles of life.

12 POINT

UNSURPASSED RESULTS IN TYPE MANUFACTURE

The man who is satisfied with his attainments should be wrapped in the cerecloth of his self-conceit and laid away on a mummy shelf. His part is done: the world does not want him any longer. The artist, the printer, the type-founder who does not constantly try and add to his laurels, will become mummified, and fit to be laid away among the piles of things entirely forgotten. By dint of brain and hand we have reached the excelling point 29

8 POINT NO 22

CIRCULAR FONT \$5 40

THE STAMP OF APPROVAL PLACED ON OUR PRODUCT BY APPRECIATIVE TYPE FOLK

The popularity of Type is based on its effectiveness for the purpose intended, and effectiveness is the result of the study, skill, and artistic perception of the designer. Designers of good Type Faces are scarce. We look almost in vain to the decorative artist or the painter for aid in the art of making type, and the scarcity of talent in this line accounts for the fact that productions of competing founders are imitative. The American Type Founders' Company has a number of designers and expert critics such as were never before brought together in the history of letter founding. \$1234567890

10 POINT NO 24

IMPORTANT FACTS FOR THE PERUSAL OF PRINTERS

Our Type is designed better, is cut better, and is better made in every way, than any other Type. It pleases the general public that pays for printing; consequently, it is more valuable to the printer. It brings trade because it is fashionable and stylish. For these reasons it is used by all the leading printers, on all the leading magazines, and in all the great book-printing establishments. Our Jobbing Type outclasses everything in that line in design, mechanical accuracy, and wearing quality. The large variety of our Brass Rule faces enables us to satisfy 12345678

THERE ARE GREAT OPPORTUNITIES FOR FINE PRINTING THE FIELD FOR THIS CLASS OF WORK GROWS

Fine printing is profitable, just as fine painting, fine writing, fine acting, and fine architecture are profitable. In no past period was superlative effort in all directions so well rewarded as in this. Fine printing is in demand by a rapidly increasing class of business men who will spend more liberally for printing in proportion as it rises above the level of a mechanic art, and is executed with brains, taste and refinement. What is fine printing? As well attempt a formula for producing masterpieces in any art as to define the limits of fine printing. The fine printer becomes such by study, by aptitude, and by good taste; his efforts vary in excellence, and only occasionally become masterpieces, these depending upon circumstances. The test of fine printing is in its endurance: if done a century ago, is it admirable to-day? if done to-day, will it be admired a decade hence?

9 POINT NO 28

CIRCULAR FONT \$4 80

A FEW SUGGESTIONS ON ADVERTISING THE PRINTING OFFICE

Printers are generally subject to just reproach because of their neglect of advertising. Business men in other lines of business who advertise are the best and most liberal customers of the printer, and their success should stimulate like enterprise among printers, especially as they can advertise at first cost. In our experience we never knew of a printer who failed to increase his business if he advertised persistently and with good judgment. A printer's advertising should emanate from his own office, should rise above the commonplace, should solicit business, should be original, and should state as clearly as possible the cost of similar booklets, circulars, blotters, etc. This style of advertising pays 26359

 Local Events Sketched from Memory

To my son Tom, I bequeath all right and title to the Good Name which I intend to leave behind me, and any profit or renown which may be derived therefrom shall be for his sole benefit. To my daughter Mary, I give all shares in the Comet-Tail Utilization Company, and to my wife Clementina my interest in the business of furnishing free Toboggan Rides to women and children. The privilege of giving advice to all comers I leave to Timothy Loudmouth.

THE CRADLE ASKS US WHENCE, AND THE COFFIN WHITHER IS LIFE WORTH ALL OUR ANXIETY

My friends: I know how vain it is to gild a grief with words, and yet I wish to take from every grave its fear. Here in this world, where life and death are equal kings, all should be brave enough to meet what all the dead have met. The future has been filled with fear, stained and polluted by the heartless past. From the wondrous tree of life the buds and blossoms fall with ripened fruit, and in the common bed of earth the patriarchs and babes sleep side by side. Why should we fear that which will come to all that is? We cannot tell, we do not know, which is the greater blessing—life or death. We cannot say 1565

IN other words, a great deal of the so-called decorative printing is not decorative, and what modern printing needs is simplicity and harmony. Very few people know any more than formerly about specific styles of type, or understand that there are any principles underlying arrangement. The reason that many pieces of careful work are failures is because they have neither simplicity nor harmony. In the long run there is much more variety as well as harmony to be gained by keeping certain sets of types by themselves and using them with each other only, than by mixing them all up together. For instance, there are certain sorts of old-style types, which, combined with bold and rough ornaments of an English style, and 1234567890

INCLOSED in panels of double rules, form a style which suggests itself naturally for reprints of old books, pamphlets, etc., and, indeed, anything with an anti-quarian flavor. French type in roman lower-case may be combined with Louis XIV. ornaments, and which are easily had, and when the work is done this has a certain light, graceful look which suits slight, ephemeral bits of work. The above combined with Elzevir italic type, with ornaments in black, such as are often seen in volumes of 1234567

THERE is hardly any department of industry to which so much pains and care have of late years been devoted as that of printing; and as one may very readily see, this improvement has come to pass partly through the cultivation of taste, and partly through the demands of trade. A cultivated taste has led to a demand for fine books, and the lover of books has carried his taste into the commercial world, and has suggested an improvement in that sphere. The printer has recognized the call for artistic work, and has done his best to supply it; and then again, the advertiser has, in turn, depended on the printer to produce those novelties which 1234567890

Latest New Character Script
In Five Sizes

This is a reproduction in type of the handwriting of the Rev. Richard M. Devens. In cutting the various letters, absolute fidelity to the original penmanship of Mr. Devens was adhered to, even when in so doing the taste of the Type Founder was violated, and the result is a most delightful symphony in type.

Rubhard Swively, M.D.
64 Ash Street

Malden, August 25, 1898.

Gregory Sackthrift,

Dear Sir:—Having carefully studied all the symptoms of your case, I have forwarded to your address a package of superior Elbow Grease, which, if diligently and perseveringly applied, will relieve your troubles. To prevent a recurrence of the disease, industrious habits must be formed, and some exercise of a quickstep character freely indulged in.

Rubhard Swively.

*Brown & Ferguson,
Attorneys and Counsellors at Law,
Court Square.*

Boston, September 20, 1898.

Gentlemen:—In our circular recently mailed you we attempted a review of the business as carried on by the late firm, giving them due credit for what they have done, and without any intention to belittle their efforts. But the best intentions are often misconstrued, and sometimes intentionally. We see no objection to a fair, open criticism of the facts in the letter, should anyone feel it incumbent upon him to do so and to think that any good would come of it. It is deemed necessary to call a Special Meeting for Tuesday, October 9.

Respectfully yours,

Brown & Ferguson.

*I sit by the fire this cold winter morning,
The red coal lies under, and on the top lies
A log of green hickory, that sings in its burning,
So a martyr might sing as he mounts to the skies.*

*The red coal lies uncer — great lumps of bitumen,
One cheek in the dawning and one in the night,
From their own substance feeding the flame they consume in,
They die, and in dying give being to light.*

*So — so would I perish. No matter what life is :
Be it in the forest, be it in the mine !
If life and its song the ripe fruit of its strife is,
The flame-eaten heart is becoming divine.*

FIRST DISPLAY TO-DAY OF THIS HANDSOME COLLECTION OF ORIENTAL RUGS

After a very extensive tour through the countries of the Orient, our salesmen have brought back such a collection of some of the rarest kinds of rugs as are not to be seen in any of the other stores in this city. For years we have been in the Oriental Rug business in about the same way as a great many other stores in this country, except that our prices were fair and uniform and not “artistic.” The Rugs were conventional and of as good a quality as we had a right to think people wanted. We had a few of the finer antiques, and antiques were easier to find in those days; but our stock was mostly of a kind that are known as staple: Ghordies, and that sort. Last year for the first time we sent our salesman to Constantinople, and as good fortune would have it, he got there at a time when the new goods were first placed on the market, thereby having the first chance to select therefrom, and to prove \$235

CAN SEE THROUGH A FOG—A CAMERA WHICH PEERS THROUGH THE DENSEST MIST

In setting this camera for an exposure against fogs, a color screen is used. This is necessary because of the fact that the ordinary fog radiates an excess of blue actinic rays that fog a plate easily. With the seven lenses and the screen, however, the colors of the spectroscop are so blended, neutralized and centered as to make an impression through a dense fog that is more clear cut than a sunlight exposure made through an aromatic lens. From the bow of a steamer moving at half speed through fog this apparatus will show every outline of a vessel steaming half a mile away. It is discovered already that this apparatus has a most remarkable influence on non-actinic lights and colors. For instance, taking up red lights from a photograph on a plate through these lens and screens the apparatus so acts upon it as to set up a fluorescence upon the plate that will give a picture of the objects in the dark room. Yet the plate so acted upon could be left in the dark room indefinitely without becoming fogged. As a discovery of practical value this appeals most strongly to the navies of the world. As a complement to the camera there is a development attachment, by which in a few seconds the picture may be developed and the object thrown on a screen. From this the range finders on a warship might send a broadside into an enemy otherwise \$896

RESOLUTION
CHANGE

12 POINT

14 A 28 a \$3 25

THE ancient province of Touraine very nearly corresponds to the modern section of Indre et Loire, but in some directions it is rather more extended. It is crossed from east to west by the rapid and sandy stream of the Loire, from a point not far above Amboise to the valley of Fontevrault. Three rapid tributaries of the Loire at this part of its course join the river from the south. Never a stream in so short portion of its course has so much history to tell. Until the end of the sixteenth century this section of France was covered with numerous châteaux, for beside the old feudal towers, whose

INTRODUCTION

For Jenson Italic ornamental lower-case, see page 238

JENSON ITALIC

30 POINT

5 A 10 a \$5 00

The original Italic letter was called Venetian or Aldine and was defaced by very strange irregularities in the formation of the slope of the characters

MALFORMATIONS

24 POINT

6 A 15 a \$4 50

Astonishing strides in the designing of Italic type have been made in the last few years. The improvements made in their beauty and the general up-to-date style of their characters reflect a high degree of superiority on the skill of the modern designer

ADVANCEMENTS

For Jenson Italic ornamental lower-case, see page 238

JENSON ITALIC

18 POINT

10 A 25 a \$4 00

Jenson Italic as a display type is a decided novelty. It is distinct in style and striking in character. It is made to the same line as the Jenson Old Style, and its value as a companion letter will be appreciated by printer and advertiser

CHARACTERS

12 POINT

18 A 40 a \$3 25

Makers of Advertisements who formerly recommended the use of old style letters to their clientele will recognize in the Jenson Italic a monotony-breaking substitute, and the reading public will see it and be impressively attracted by advertisements set in this modest and character-giving letter. The aim of writers of advertisements is naturally to attract business to themselves, and that can only be done by attracting the great mass of readers to those who advertise

MAKING PROFITS

The Jenson Italic Ornamental lower-case letters are intended to be used exclusively as final letters. To get the very best results they should be used sparingly in all classes of work. One or two letters properly placed in a job will add to its attractiveness.

*The Jenson Italic Ornamental lower-case letters are made in three characters *n g y* and are cast in all the sizes from 12 Point to 72 Point.*

The Jenson Italic Ornamental lower-case characters are not put up with regular fonts, as all fonts are complete without them. They are furnished at the following prices per font:

12 POINT, 18 POINT AND 24 POINT
EACH 50 CENTS

30 POINT, 36 POINT, 42 POINT, 48 POINT
EACH 75 CENTS

54 POINT, 60 POINT AND 72 POINT

JENSON ITALIC

10 POINT

20 A 45 a \$3 00

THE type made by the American Type Founders' Company is conceded by expert printers to outrank all competitors in its beauty of design, style of finish, and admirable wearing qualities. These three cardinal features are, in themselves, sufficient to recommend them to the vast army of purchasing printers and magazine publishers as a money-saving investment

O Leon, my lover,
Why should you despair,
When Love comes unbidden
With wreaths in his hair?
I love you, my Mona,
Is easy to say
As bird on the tree-top
To sing out his lay.

POINTS TO CONSIDER

8 POINT

20 A 50 a \$2 75

JENSON TYPE.

In Jenson type my printer knows
The height of typographic pose;
The black-faced letters cross the page
Like mummers of some by-gone age
In solemn, sad, funereal rows.

No matter what is said, "it goes,"
Though doggerel verse—puerile prose—
If but its wretched rantings rage
In Jenson type.

Go, foolish rhyme, and dress your woes
In this prevailing garb of those
Who call all well that fits the gauge
Set by the medieval sage—
You too, may conquer, I suppose,
In Jenson type.

NOW to the point that pinches mankind the hardest—the unloosening of the purse-string—and has been the subject of frequent discussions for time immemorial. In figuring on the cost of new type do you regard it as an unnecessary expense or in the light of a good investment to buy the best? If as an investment, suppose a first-class, distinctive style of type costs you a little more than the ordinary and less attractive design, but the returns from the former are double the returns from the latter, which one would you select? You won't hesitate to choose that which is the most profitable.

ARGUMENT AND EXPLANATION

6 POINT

20 A 50 a \$2 50

EVERYTHING that is required in a printing office, from a pair of tweezers to a perfecting press (to say nothing of type) can be supplied on the shortest notice by any Branch House of the American Type Founders' Company. These Branches are all conveniently located throughout the United States for the benefit of the trade and to facilitate the work of supplying the demands made upon us by an appreciative and increasing patronage. Therefore, place your orders with Branch nearest your place of business to insure promptness. A printing office completely supplied with the products of our manufacture is worth far more for use or sale than one made up from the productions of incomplete type foundries.

O Mona, you tease me,
And vex me for aye;
But, Mona, I love you,
Shall love you alway;
I would to the altar
Now lead you a bride,
But love makes me falter
And sway with the tide.

Then bye, oh bye, darling,
For Mona must part
From Leon her lover
With dread in his heart;
Your love is the dewdrop
That dies in the sun,
Good-by, and forever,
With Mona unwon!

RULES GOVERNING BOSTON SHOUTER VOTING CONTEST

Non-compliance will invalidate all coupons, so read the rules slowly

12 POINT

20 A 50 a \$3 94

NAME and address must be plainly written in the spaces shown in the coupon. A nom-de-plume or an alias will not answer, nor will the location of a cow pasture be acceptable. In guessing the height of the house it must be considered that in addition to a French roof there is also a mortgage on it. The taxes, insurance and water rates for 1898-99 are unpaid and will of course make it higher. See that your coupons are directed SHOUTER SECOND-HAND HOUSE CONTEST EDITOR

Given Away

The Boston Shouter will give a fine brick house to the man or woman correctly guessing its height, and in accordance therewith I submit as follows :

Height, over-all, from street level, Points

Name, in typewriter,

Address, in confidence,

10 POINT

28 A 80 a \$3 80

NO COUPONS SENT US LATER THAN MARCH 25 WILL COUNT

And no packages will be received from messengers. The result of the contest will be made public in a special edition which will be issued a few moments after the last vote has been counted. Our bulletin boards also will be utilized. Watch them

ROXBURY HORSE GUARDS PICNIC
Nantasket Beach
Monday Afternoon, October 28

15 POINT

15 A 25 a \$3 50

The annual picnic this year will be held at the new reservation at Nantasket Beach. Special open cars will be available for the transportation of picnickers and their cousins from sunrise until the approach of dinner time. A special feature of the occasion will be the singing of some verses which have been set to music by Marie Grosse, and of which the opening verses are appended. Music will be by tambourine

8 POINT

28 A 80 a \$3 00

THE DEAR OLD TIN CANTEEN

*I tell you, Jim, it ain't no use,
 A soldier can't forget,
 Those bloody scenes are just as fresh
 As on the day we met;
 But all the relics of the war,
 The broken sword, I ween,
 E'en knapsack old, there is none like
 The dear old tin canteen.*

*You recollect as well as I
 The hunger and the thirst,
 The mad career of horse and men,
 Where rebel shells had burst;
 But after all, you gray old vet,
 The best remembered scene
 Was when we stole a chance to drink
 From out the old canteen.*

6 POINT

28 A 80 a \$2 60

SPECIAL CAR FOR MOROSE PEOPLE will be run via Quincy and Milton before sunrise. Those who do not care for sociability, or for the exhilarating daylight ride over the road at a later hour, may take this car. Ample opportunities for services of a religious nature, to be conducted by the motoneer, will be afforded during the trip

I met him in the cars,
Where resignedly he sat;
His hair was full of dust,
And so was his cravat;
He was furthermore embellished
By a ticket in his hat.

The conductor touched his arm,
And awoke him from a nap;
When he gave the feeding flies
An admonitory slap,
And his ticket to the man
In the yellow-lettered cap.

The heads of many men
Were bobbing as in sleep,
And many babies lifted
Their voices up to weep;
While the coal-dust darkly fell
On bonnets in a heap.

All the while the swaying cars
Kept rumbling o'er the rail,
And the frequent whistle sent
Shrieks of anguish to the gale,
And the cinders pattered down
On the grimy floor like hail.

ENLIGHTEN HONEST CUSTOMERS

In one particular it is always wise to enlighten every patron in order to reach a basis of mutual understanding when contracts are made. Most people are more or less ignorant of the customs and terms of the trade. This ignorance leads to much disputing and rankling dissatisfaction on the part of customers. Well-meaning and honest though they are, it is difficult for them to understand why the bill should be \$329.

ON THE PROGRESS IN MACHINERY AND
THE MAKING OF NEW TYPE FACES. ❁❁❁

IN 1835 I saw for the first time the printing house of Harper & Brothers. With childish awe I watched the flutter of the friskets of a dozen hand presses, and the slow but steady piling-up of printed sheets on the bank. Could any machines be finer or better? So I thought, and so Harper & Brothers thought; but in a few years the hand presses were supplanted by the Adams. This change was but the beginning of a series of changes that I can sketch in outline only. The two-roller Adams of wood frame was followed by the four-roller machine of iron frame and \$4295

12 POINT

18 A 30 a \$3 25

MODERN VERSION OF THE WORLD OLD STORY
OF MAKING BRICKS WITHOUT STRAW ❁❁❁❁❁

WHEN we discover here and there a printer wasting his energies and abilities in the vain endeavor to execute printing to the satisfaction of his clients with type lacking in originality, in art, and devoid of the life that can only be imparted by a genius in designing, we are reminded of the cruel task allotted to the Hebrews by the old Egyptians. There is neither profit nor pleasure in trying to impart an artistic effect with in-artistic type. It is a question whether the durability of such type is not an added injury to the unfortunate printer who uses it. Pound for pound the type of the American Type Founders Co. costs no more than type unenlivened by artistic merit; but in its true value it surpasses all other type as the masterpieces £376

JENSON OLD STYLE

10 POINT

25 A 30 a \$3 00

HE HAS DEMANDS FOR FACES BOLD AND BLACK, LIGHT AND SKINNY, BROAD, CONDENSED, LARGE 

MALL, with long ceriphs, with short ceriphs, with high ascenders, with short descenders, and other mannerisms too tedious to describe. We are asked to get these in fonts of thousands of pounds, but to buy half of them, or quarter of them, is to invite bankruptcy. There are publishers who ask that thousands of pages be kept standing for months. There are men before me who have sent, and are sending, proofs to Europe, and even to the Pacific Islands, and Asia. A prominent printer of Paris told me that the weight of the book types in his house largely exceeded two million pounds. The tied-up pages piled up like bricks on every floor of the house was proof of the statement. Fifty years ago a book and job printer could keep sixty compositors at work on a plant of types and appurtenances that cost less than \$10,000.

6 POINT

35 A 50 a \$2 50

A GOOD FEATURE IN PREVAILING FASHIONS IS THE GENERAL DISLIKE FOR ALL ORNAMENTAL AND FRAIL TYPES.

HEN Whittinghouse of London revived the trade for old style letter, in 1844, the old order changed. Not liked at all in the beginning, old style slowly grew in favor, especially with those who wished to give distinction to their work. Before 1860 it was required of every prosperous book and job printer that he should have a full series of old style faces, complete from Pearl to Canon. This compelled a doubling of the expense of equipping the composing room; but if the demand for novelty had stopped here, this added expense might not need any notice. But it did not stop with the modernized old style. Think of the varieties now offered to us by the type founders—Caslon, Franklin, Barth, Binny, Ronaldson, Cadmus or Elzevir, French, Jenson, etc. Nor is this all: other faces with peculiar mannerisms are made abroad, and there are publishers who will have them. Standard or modern-cut Roman is provided by type founders in greater variety. The book printer who has two faces only in series soon finds them insufficient. He has demands for others.

8 POINT

25 A 35 a \$2 75

THE MANUFACTURERS OF OUR MACHINES ASSURED US AGAIN AND AGAIN THAT THEIR LAST MACHINES WERE PERFECTION. 

It was not possible to make anything better; they would meet every demand for strength, speed, accuracy, and ease of handling. So they did for a time; but in a few years on came the improvements, once declared impossible, and in the form of larger and more efficient machines. The presses that were the best of their kind in 1865 proved too small and too slow in 1875. To continue to use them would be to do work at cost or at loss. When one has room enough, the old machines may be set aside and put to an inferior class of presswork. But when rents are high and space is contracted the old machines must be sold. What do we get for old presses? It often happens that after only seven or ten years of service, the press that cost \$3000 or \$5000 will be sold for from \$300 to \$600. It is not worn out, it may be in good condition, and should be efficient for twenty years more, but it must be sold because it is not up to present needs. It will not pay to keep it when your rival is using new machines.

A CURTAILED DESCRIPTION OF SOME THINGS THAT WERE NOTICED WHILE EXPLORING THE GREAT MAMMOTH CAVE

THIS is a very interesting journey indeed. On arriving at the Cave one is astonished to view an immense rock over the entrance supported only by a very small stone, which if displaced would close the entrance forever and entirely entomb those inside. Leaving this fear aside, we find, on entering, several large rooms of wonderful size, also a running stream, a star-chamber, lighted by numberless small stars, and many strange carvings surprising to behold and to contemplate. Some of the chambers are very cold and others warm. This is said to be from changes of wind, in the same manner as those above the ground. The wonders of the Cave are explained by an experienced guide, without whose aid one would be lost forever in the vast space of this natural wonder.

CLEAN AND LEGIBLE FIGURES PUT UP WITH EACH OF THE FOURTEEN SIZES, AND A PLENTY OF THEM \$1,234,567,890

Printers who already have this series to and including the 60 Point cannot make a better move than to order the 72, 96 and 120 Point sizes shown on preceding pages. Such a movement is certain to be a profitable one when the popularity of the Howland Letters is considered. The complete series, with double fonts of the small sizes, constitutes an item of your composing room equipment that cannot fail in paying handsomely for the outlay

INDISPENSABLE FOR OUR PERMANENT GROWTH
 To the Efficacy of the Union a Government for the Whole is Essential. No Alliances, however strict, between the Parts can be substituted, as they must lead to Infractions or Interruptions which all the Alliances have Experienced

11 POINT

22 A 34 a \$2 90

BIRDS GUIDED COLUMBUS IN HIS GLORIOUS DISCOVERY
 Indications of Approaching Land became more certain, and excited Hopes in Proportion. Birds began to Appear in Flocks, flying in a Southwesterly Direction, and this induced Columbus to alter his Course toward the Quarter whither the Birds pointed their Flight

10 POINT

24 A 36 a \$2 75

THE MOST ADMIRABLE DISPOSITION OF BENJAMIN FRANKLIN
 His Characteristic Passion seems to have been the Love of Everything Useful. This was to him the Sublime and Beautiful, which he was in quest of Every Week for Fifty Years. No Department was too humble for him to occupy himself in for the Purpose of Looking for the Useful

9 POINT

28 A 42 a \$2 75

TRUE PRINCIPLE OF LIBERTY
 The Constitution is Obligatory upon all People. The Idea of the Power and the Right of the People to chose their own Government presupposes a Duty of Everybody to obey the Laws

7 POINT

NOVEMBER'S PARTY

November gave a party,
 The leaves by hundreds came
 The Chestnuts, Oaks, and Maples
 And leaves of every name.
 The sunshine spread the carpet
 And everything was grand;
 Miss Weather led the dancing
 Professor Wind the band.

SALE WHICH IS OF INTEREST TO EVERYBODY

WE beg to announce that we have engaged the services of Mr. F. Dawson, the well-known decorative artist, to design and execute all kinds of Interior Decorative Work, including Woodwork, in the artistic manner for which he has the highest reputation. His superb stock has been bought by us, and is now on exhibition

SOME TIME WHEN KING ARTHUR
HAD AFTER LONG WARS RESTED &
HELD ROYAL FEAST AND COUNCIL

BESIDE the Round Table, with his
allies of princes, noble knights
and all, there came to him, he
sitting on his throne royal, twelve
ancient men, bearing each of them
a branch of olive, in token that they
came as ambassadors and messen-
gers from the Emperor Lucius, who
was at that time called Dictator of
the Public Weal of Rome; which said
messengers after entering into the
presence of King Arthur, did to him
their obeisance, and said to him in
this wise: Our high and mighty
Emperor Lucius sendeth to the King
of Britain greeting, as commanding
thee to acknowledge him for thy
sovereign lord, and to send him the
truage due of this realm unto his

THE LADY OF SHALOTT

On either side of the river lie
Long fields of barley and of rye,
That clothe the wold and meet the sky ;
And through the field a road runs by
 To many-towered Camelot.
And up and down the people go,
Gazing where the lilies blow
Round an island there below,
 The island of Shalott.

WILLOWS WHITEN AND ASPENS QUIVER
LITTLE BREEZES DUSK AND SHIVER THRO
The wave that runs forever by the island
in the river flowing down to Camelot.
Four gray walls and four towers overlook
a space of flowers and the silent isle em-
bowers the lady of Shalott. By a margin
willow veiled, slide the cumbrous barges
trailed by slow horses and unhailed the
shallop flitteth silken-sailed, skims \$45

THERE she weaves by night and day,
A magic web with colors gay.
She has heard a whisper say
A curse is on her if she stay
To look down to Camelot.
She knows not what the curse may be,
And so she weaveth steadily,
And little other care hath she,
The Lady of Shalott.

And moving through a mirror clear
That hangs before her all the year,
Shadows of the world appear.
There she sees the highway near,
Winding down to Camelot ;
There the river eddy whirls,
And there the surly village churls,
And the red cloaks of market girls,
Pass onward from Shalott.

Sometimes a troop of damsels glad,
An abbot on an ambling pad,
Sometimes a curly shepherd lad,
Or long-haired page in crimson clad,
Goes by to towered Camelot.
And sometimes through the mirror blue
The knights come riding two and two.
She hath no loyal knight and true,
The Lady of Shalott.

FORMS FOR ELECTROTYPING

Electrotypers experience a considerable difficulty from forms which have not been properly locked up. A proof from a form, taken after the quoins have been pushed up with the fingers, may show every line straight and no displacement anywhere: afterwards, in finishing the lock-up, a tightening of the quoins with the mallet or the wrench will cause a derangement of lines and type at once unsafe and provoking. In the course of another 54

EDUCATED COMPOSITOR

The Printer is an indispensable adjunct of civilization and progress; and in the United States from the ranks of the army of printers have rose more brilliant men in literature and a greater number of statesmen, than have risen from the ranks 25

WRITERS FOR THE PRESS

An English writer says that one may be desultory over one's dinner to some good purpose, or even in the enjoyment of a holiday, but in writing for one's daily bread, never. In the infantine stage of my apprenticeship I would never move towards the ink-pot unless I were impelled by a very vigorous inspiration, such as resulted in my tragedy or my first novel, and I would then write on and on, with utter disregard of the 76

TASTE DISPLAYED IN PRINTING

Printers have good reason to congratulate themselves on the progress of art in their work, because the artistic portion of their labors circulates among the great mass of the people by whom these specimens are appreciated, studied and well preserved. In the past fifteen years the best original talent existing among our printers has been devoted to job work, and with the happiest effects. The pioneers in this departure made abundant work of the same \$250

8 POINT

16 A 50 a \$3 50

PRINTING-OFFICE GRADUATES

Among journalists many have received their earlier training at the printer's case. This does not by any means prove that to become an accomplished editor it is necessary to become an accomplished printer. A great proportion of the printers could never write the articles they put in type, and many 83

CONTENTS OF AN ENVELOPE FOUND ON
EAST BEACH AND THE CONSEQUENCES
WHICH BEFEL THE ROMANTIC MAIDEN

HER eyes spied the photograph of a young man not much older than herself, but with an earnest face; the head was well shaped, the mouth firm and expressive and the eyes deepset and serious looking. Placing the picture on her desk she turned to her book, but there was a fascination about the picture which drew her eyes toward it frequently, when she would be met with those eyes that seemed to look at her reproachfully yet kindly. For the first time she found her book distasteful; it appeared silly, and she threw it down and sat gazing abstractedly at the picture before her. It seemed to her the expression of an earnest spirit and brought home to her careless

CIDER-MAKING TIME

THEY are gathering the apples
In the orchard on the hill,
They are carrying the baskets
To the humming cider mill;
The breeze is blowing sweetly
And the autumn days are fair,
The happy farmer whistles
As he works away, out there.

And the smoke is curling upward
As it used to, long ago,
When the winds that made our noses
Rather moist began to blow.
Down the crumpled leaves are falling
From the branches overhead,
And the doves are softly cooing
On the weather-beaten shed;

The ground is strewn with pumpkins
Where the corn is cut away,
And the slopes beyond the valley
Lie in something soft and gray,
While a sort of dreamy music

SOME FACTS ABOUT QUEER BIRDS THAT
ARE FOUND IN SOUTHERN NEW ZEALAND

IN this fine country there still exist several species of wingless birds and others became extinct not more than a century ago. The gigantic dinoris, or "terrible bird," was once numerous, and ranged on the plains and hillsides. It was ten or eleven feet high and was akin to the Australian cassowary and African ostrich

8 POINT

24 A 18 A 64 a \$3 70

BECOMES DOMESTICATED
WHEN CAPTURED YOUNG

THE emu which has grown up wild is difficult to approach, and is so strong and swift that it is very rarely caught. It eats voraciously, and, like its kinsman, the African ostrich, swallows anything that it can get within its beak. This bird is distinguished by the rudimentary nature of its wings, which are useless either for flight or defense. Its legs are stout, and the inner toe armed with a sharp powerful claw.

MY SHIP AT SEA.

[FROM THE BOSTON GLOBE.]

MY ship sails on the ocean brim,
With mast and cordage stout and trim;
With sails unfurled and colors gay,
It sails by night and sails by day;
'Tis freighted, Oh, so preciously,
My ship at sea.

Oh, ship of mine, come home to me,
No longer toss on life's rough sea;
It seems long since you sailed away.
With weary eyes from day to day
I've watched for you so longingly,
My ship at sea.

THE KIWI AND THE WEKA ARE BIPEDS OF THE
MOA KIND; THAT IS, "APTERYGAS" OR WINGLESS

THEY sleep or are inactive in the daytime, but in the twilight run about in a very quiet and cautious manner. Their lack of wings is compensated for by swiftness of foot. Indeed, the name "ocydrome," or swift-runner, has been given to some species. When they run they take long strides, with the neck stretched out and the body leaning forward. When disturbed

DARKTOWN'S POLITE SOCIETY EXPRESS THEIR OPINION IN
THE MATTER OF THUMB CHEWING

It is not considered good form in Darktown's polite society to violate the rules of the prize ring and chew a lady's thumb. Mr. Johnson, one of the participants in a social controversy that ended in a free fight in his bachelor quarters, says most emphatically that he won't stand around and watch a gentleman chew any lady's thumb. WE SHOULD HOPE NOT. A gentleman addicted to the habit of chewing the thumbs of his lady friends is ill-bred and censurable, and it is very proper for other gentlemen to remonstrate with him and show him the error of his ways. If he is not amenable to reproof and refuses to eschew the habit, we must say he is no gentleman.

COPPER ALLOY IMPRINTS F

Cast in one piece, any of the faces here shown, at the following prices:

*100 OF ANY ONE KIND FOR \$8 00 NET

50 OF ANY ONE KIND FOR \$5 00 NET

STYLE 1
EXCELSIOR PRINTING CO., DENVER

STYLE 2
PRESS OF STYLES & CASH, NEW LONDON

STYLE 3
NEVERSLEEP BOOK AND JOB PRINTING CO., WAKEFORD, OHIO

STYLE 4
FITLER JOB PRINTING COMPANY

STYLE 5
STANDARD PRINTING & BINDING CO., CHICAGO

STYLE 6
LEDGER PRINT, FRANKLIN

STYLE 7
SUNSHINE PUBLISHING HOUSE, CANTON

STYLE 8
DIXON, PRINTER AND STATIONER

We can furnish Electrotype Imprints of above styles, but recommend the Copper Alloy, as they have a uniform clearness of face not obtainable in so small an electro line. The Copper Alloy are much cheaper, as 50 of any one style cost no more than 17 of the Electrotype Imprint.

Electrotype Imprints, each, net \$0 30

** If Imprints are wanted longer than one and one-fourth inches in length, they will have to be made in two or more pieces, and \$3.00 extra per hundred will be charged for each extra piece.*

The Hero's Death

Life's parting beams were in his eye,
 Life's closing accents on his tongue,
 When round him, peaking to the sky,
 The shout of victory rung!
 Then, ere his gallant spirit fled,
 A smile so bright illumed his face—
 Oh! never, of the light it shed,
 Shall memory lose a trace!

His was a death whose rapture high
 Transcended all that life could yield;
 His warmest prayer was so to die,
 On the red battle-field!
 And they may feel, who loved him most,
 A pride so holy and so pure—
 Safe hath no power o'er those who boast
 A treasure thus secure!

Sar O'er the Sea

Where are the vintage songs
 Wandering in glee?
 Where dance the peasant bands
 Joyous and free?
 Under a kind blue sky,
 Where doth my birthplace lie?
 —Sar o'er the sea!

Where floats the myrtle-scent
 O'er vale and lea,
 When evening calls the dove
 Homewards to flee?
 Where doth the orange gleam
 Soft on my native stream?
 —Sar o'er the sea!

The Bird at Sea

Bird of the greenwood,
Oh! why art thou here?
Leaves dance not o'er thee,
Flowers bloom not near.

All the sweet waters
Far hence are at play—
Bird of the greenwood,
Away, away!

Where the mast quivers
Thy peace will not be,
As 'midst the waving
Of wild rose and tree.

9 POINT

Sairies' Recall

While the blue is richest
In the starry sky,
While the softest shadows
On the greensward lie,
While the moonlight slumbers
In the lily's urn,
Bright elves of the wild wood,
Oh! return, return!

Round the forest fountain,
On the river shore,
Let your silvery laughter
Echo yet once more!
While the joyous bounding
Of your dewy feet
Rings to that old chorus:
"The daisy is so sweet!"

PRIORY TEXT No 1

14 POINT

8 A 24 a \$3 64

All Photo-Engravings are produced by means of photography. It is a fact worthy of note that experimenting in photographic engraving gave rise to photography itself. The aim of Niepce, when he began his researches, was not only to fix the image he obtained by the camera obscura upon a metal plate,

12 POINT

12 A 32 a \$3 08

But to convert this plate into an engraving which could be used on a printing press; but his early death prevented perfecting the process to which he had devoted much time and study. From that time experimenting has been continued by several others, and the result is the production of a number of different processes. A popular one is the swelled gelatine process, though handling 2468

10 POINT

16 A 40 a \$3 42

This method of engraving has an advantage over wood engraving in the matter of cheapness; but it has counterbalancing disadvantages, and there are many subjects in which wood engraving surpasses all methods of process engraving. To reproduce a drawing for printing purposes, the picture should be formed of clean, sharp, and very black lines or dots on perfectly white paper. Flat tints and washed or blurred shadows will not answer, unless they are first translated into lines or stipple. Where an engraving is to represent machinery, the 13579

8 POINT

16 A 44 a \$3 00

Object is photographed twice the size the plate is to be when finished. The photograph, or silver print, as it is technically called, on which the drawing is to be made, is not toned, but simply fixed in a fresh fixing bath, and then thoroughly washed and dried. It is now ready for the artist, who, with pen and suitable ink, draws directly on the silver print, portraying in delicate lines and dots the lights and shadows of the photograph. After the drawing is complete the photograph is bleached, by pouring upon it an alcoholic solution of bi-chloride of mercury, leaving the ink lines of the artist on clean white paper. The advantage of this method of drawing is at once apparent. The artist has the advantage of working directly on and over

6 POINT GERMAN NO 121

Natur! Wir sind von ihr umgeben und umschlungen—unvermögend, aus ihr herauszutreten, und unvermögend, tiefer in sie hineinzukommen. Ungebeten und ungewarnt nimmt sie uns in den Umlauf ihres Tages auf und treibt sich mit uns fort, bis wir ermüdet sind und ihrem Arme entfallen. Sie schafft ewig neue Gestalten; was da ist, war noch nie; was war, kommt nicht wieder—Jedes ist neu und doch immer das Alte. Wir leben mitten in ihr und sind ihre Freunde. Sie spricht unaufhörlich mit uns und verrät uns ihr Geheimnis nicht. Wir wirken beständig auf sie ein und haben doch keine Gewalt über sie. Große und heilige Natur! in deinen Hallen wandelt der Mensch und lernt von Stauden und Bäumen; sein Auge ruht wie ein Fühlhorn am blauen Himmel, und sucht nach dem, nach welchem sich sein Herz in der Brust ausstreckt. Dann wird er selbst zum Priester dieses Tempels eingeweicht; mit Thränen endet er die Feierlichkeit. Durch Menschenliebe predigt er andern Menschen, durch Trost, durch Mitleid und Hilfe.—Wer kann die unendliche Liebe nicht fühlen, die über uns ausgespannt ist, und uns auf dieser Welt mit Zärtlichkeit gefangen

Price of Greek Case, full size, \$2.00

The want of a small font of Greek type is often felt in printing offices. To meet this need, the American Type Founders Company now puts up small and complete assortments (to include all of the characters used in the largest fonts of Porson Greek), together with a case for same of its own devising. No variations in the assortment or weight of these small fonts will be made. For prices, see specimens. Regular fonts of 50 pounds and upwards will be furnished at pound prices.

Sorts are charged at pound rates in quantities; the minimum charge is 75 cents, net. For school examination papers, paragraphs, quotations, etc., these small fonts will prove most useful.

When ordering sorts quote number as well as letter. No sorts for less than 75 cents, net.

INFORMATION RESPECTING GREEK TYPE

The Greek Alphabet contains twenty-four letters: seventeen consonants and seven vowels. The only duplicate characters are σ and ς, the latter being used as a final letter only. The accents and breathings are:

| | | | | |
|--------------|---------|----------------|---------------------|--------------------|
| ˘ Smooth | ˘ Rough | ˘ Smooth acute | ˘ Rough grave | ˘˘ Diaeresis |
| ˘ Acute | ˘ Grave | ˘ Smooth grave | ˘ Smooth circumflex | ˘˘ Diaeresis acute |
| ˘ Circumflex | | ˘ Rough acute | ˘ Rough circumflex | ˘˘ Diaeresis grave |

The sign of interrogation is made by a [?], the colon by an inverted full point [·]; the other points are the same as in English. The kerned letters are seldom required, and are only supplied to a font to make up any deficiency in accented sorts. Accented caps have the accent before them, thus [˘Ω]. The figures used are the same as in English, and are not put up with job fonts.

Compositors should bear in mind that no accent can be placed over any other than one of the last three syllables of a word. The grave accent never occurs but on the last syllable; this being the case, the rough grave [˘] and smooth grave [˘] can only be used for a few monosyllables. No vowels can have a breathing excepting at the beginning of the word, and ρ is the only consonant marked by a breathing. Almost every word has an accent, but very few more than one.

Every character is cast on en-quad set, and only en-quads and 4-to-em spaces are used for spacing. By setting sticks to a multiple of 10 Point, spacing and justification become mere child's play; in fact, this type is self-spacing. Although the face is large, on examination it will be found that Time-Saving Mail List Type is quite as condensed on the average as ordinary Mail List Type. Price, same as for 10 Point Roman

HOME, SWEET HOME

BISHOP

With expression

Mid pleasures and pal - a - ces though we may roam, Be it ev - er so

The first system of musical notation for 'Home, Sweet Home' consists of a treble and bass staff in 2/4 time. The treble staff contains the melody with lyrics underneath. The bass staff provides a harmonic accompaniment. The lyrics are 'Mid pleasures and pal - a - ces though we may roam, Be it ev - er so'.

hum - ble, there's no place like home! A charm from the skies seems to hal - low us

The second system of musical notation continues the piece. It includes a *cres.* (crescendo) marking above the treble staff. The lyrics are 'hum - ble, there's no place like home! A charm from the skies seems to hal - low us'.

UNITED STATES SIGNAL FLAGS

36 POINT

PER SET \$1 25

24 POINT

PER SET \$1 00

EXPLANATION OF WEATHER SIGNALS

Clear or Fair Weather.—WHITE, SQUARE FLAG. Print No. 1 in black. Displayed alone, indicates fair weather, stationary temperature; displayed with No. 4 above it, indicates fair weather, warmer; displayed with No. 4 below it, indicates fair weather, colder.

Rain or Snow.—BLUE, SQUARE FLAG. Use No. 2, or print No. 6 in blue over No. 1 in black. Displayed alone indicates rain or snow, stationary temperature; displayed with No. 4 above it, indicates rain or snow, warmer; displayed with No. 4 below it, indicates rain or snow, colder.

Local Rain.—WHITE AND BLUE, SQUARE FLAG. Use No. 3, or print No. 7 in blue over lower half of No. 1 in black. Displayed alone, indicates local rain, stationary temperature; displayed with No. 4 above it, indicates local rain, warmer; displayed with No. 4 below it, indicates local rain, colder.

Temperature Signal.—BLACK, TRIANGULAR FLAG. Print No. 4 in black. Displayed in conjunction with other signals, as above described.

Cold Wave.—WHITE, SQUARE FLAG, BLACK CENTER. Print No. 5 in black. Displayed alone indicates temperature will fall 20° or more, to a minimum of 32° or less. When displayed with No. 1, indicates fair weather, cold wave.

EXPLANATION OF WIND SIGNALS

Storm.—RED, SQUARE FLAG, BLACK CENTER. Print No. 10 in red over No. 5 in Black. When displayed, indicates that storm of marked violence is expected. **Hurricane.**—Indicated by two Storm Flags displayed one above the other.

Cautionary.—RED, SQUARE FLAG, WHITE CENTER. Print No. 10 in red over No. 1 in black. When displayed, indicates that the winds expected will not be so severe. Well-found, seaworthy vessels can meet them without danger.

Easterly Winds.—RED PENNANT. Print No. 9 in red over No. 8 in black. When displayed above either Cautionary or Storm Flags, indicates northeasterly winds; when below, southeasterly; when alone, that special information of storms is to be obtained by calling on Signal Officer in charge.

Westerly Winds.—WHITE PENNANT. Print No. 8 in black. Displayed above either Cautionary or Storm Flags, indicates northwesterly winds; below, southwesterly.

METAL CORNER QUADS

These insure a better junction of mitered corners, by preventing them from slipping past each other.

| | |
|-------------------------------------|--------|
| 6 Point, per set of four | \$0 20 |
| 12 Point, per set of four | 20 |

CIRCULAR QUADS

Per font, \$3.50

Each font is put up in a wooden box, containing four pieces each of twenty different curves. Each curve mortised as shown in examples.

ANGULAR QUADS

These Quads, introduced by us, are for setting rules and lines at an angle. When there is occasion for their use they are invaluable time-savers. They are of ordinary space and quad height.

Fonts, four of all sizes . . . \$1 50

Price, per set of four:

| 12 pound font | \$3 00 | 50 pound font | \$12 50 |
| 25 pound font | 6 25 | 100 pound font | 25 00 |

Attention is invited to the new design of this furniture. The strain-bearing braces have been increased in number and placed in the best possible positions, increasing the strength while not increasing the weight.

LABOR-SAVING QUOTATION FURNITURE

Finished with the strictest regard for accuracy. Made 2, 3 and 4 ems Pica wide, and 4, 8, 12, 16 and 20 ems Pica long. If desired, furnished in lengths from 20 ems to 80 ems, graduated by 4 ems. Regular fonts do not contain pieces longer than 20 ems.

| | |
|--------------------------|---------|
| 12 pound font | \$ 3 00 |
| 25 pound font | 6 25 |
| 50 pound font | 12 50 |
| 100 pound font | 25 00 |

FOLLOWING SIZES CAST TO ORDER ONLY:

Additional small sizes, 2 x 5, 2 x 6, 3 x 5, 3 x 6, 4 x 5, 4 x 6, 5 x 5, 5 x 6 and 6 x 6, cast accurately to Pica ems. Additional long sizes, 2, 3, 4 and 5 ems Pica wide by 10, 12, 15, 18, 24, 25, 30, 35, 36, 40, 42, 45, 48, 50, 54, 55, 60, 65, 66, 70, 72, 75, 78 and 80 ems Pica long; also, 6 ems Pica wide by 12, 18, 24, 30, 36, 42, 48, 54, 60, 66, 72 and 78 ems Pica long. Price, per pound, 25 cents.

REVERSIBLE METAL FURNITURE

This Labor-Saving Reversible Furniture is the strongest and one of the most accurate. It is made on the Point System of Bodies, and is useful for blanking out and making up forms and for general imposition. List of sizes furnished: 2, 3, 4, 5, 6, 7 and 10 ems Pica in width, and 4, 5, 6, 8, 10, 15, 20 and 25 ems Pica in length; also 2, 3, 4 and 5 ems in width by 50 ems in length. Fonts of 50 pounds or more in weight contain all of the above sizes.

LAUREL ORNAMENTS

Are designed to work separately and with the Laurel Borders, shown on page 752. Wreaths may be enlarged symmetrical-ly by using the single piece.

These Ornaments are cast in a cored type mould, with as little shoulder as possible on the inside of the wreaths, so that type lines may be set close up. A great variety of designs may be quickly and easily produced with these inexpensive Ornaments.

CHARACTERS OF 18 POINT LAUREL ORNAMENTS

The characters of 6 Point and 12 Point are nearly alike

BRASS

Type for Bookbinders

Rules in Strips

Rules, Labor-Saving

Leaders, Hyphen and Dotted

Braces and Dashes

Slotted Corners

Circles and Ovals

ROUND CORNER RULE

PATENT APPLIED FOR

Put up in regular Labor Saving fonts with round corner pieces instead of the mitred corners usually sent

2 Point
3 lb. font **\$6.00**

4 Point
3 lb. font **\$5.25**

6 Point
5 lb. font **\$8.75**

2 Point

4 Point

6 Point

The large curve shows the top—the square corner shows the bottom of the rule—which is square inside up to quad height, giving a firm locking surface without shortening form at corners. Each piece is 6½ picas long and 18 points wide outside, which will be found a convenient size for both Newspaper and Job Work.

EXTRA CORNER PIECES

| | | | | |
|---------|-----------------|---|---|----------|
| 2 Point | per set of four | = | = | 50 cents |
| 4 | “ “ “ “ | = | = | 50 “ |
| 6 | “ “ “ “ | = | = | 50 “ |

Offices not having new fonts of rule will find it less expensive to take the fonts above quoted. Not quite so much is charged for the corner pieces when included in the regular fonts as when purchased separately. The standard price is charged for the straight rule, the extra cost being for the corner pieces.

BRASS RULES

In ordering Brass Rules it is important to state both No. and Initial. Unless otherwise noted, Brass Rules are made in 24-inch strips

STANDARD SIZES OF NEWSPAPERS

This table of sizes is based upon the standard sizes of newspapers, with columns 13 12-point ems wide and 6-point column rules. The adoption of these sizes is advisable especially in starting newspapers or putting in new outfits, thereby gaining desirable uniformity.

| | Standard Size of Paper. | Size of Each Page. | * Face Length of 6-pt. Col. Rules. | Length of Head Rules required. |
|---------------------------|-------------------------|-------------------------------------|------------------------------------|---|
| | INCHES. | INCHES. | INCHES. | |
| 4-Column Quarto | 22 x 30 | 8 ¹ / ₂ x 14 | 13 ³ / ₄ | 53 ¹ / ₂ Pica ems. |
| 5-Column Quarto | 26 x 40 | 11 ¹ / ₂ x 18 | 17 ³ / ₄ | 67 Pica ems. |
| 6-Column Quarto | 30 x 44 | 13 ³ / ₄ x 20 | 19 ³ / ₄ | 80 ¹ / ₂ Pica ems. |
| 7-Column Quarto | 35 x 48 | 15 ³ / ₈ x 22 | 21 ³ / ₄ | 94 Pica ems. |
| 8-Column Quarto | 40 x 52 | 17 ¹ / ₈ x 24 | 23 ³ / ₄ | 107 ¹ / ₂ Pica ems. |
| 5-Column Folio | 20 x 26 | 11 ¹ / ₂ x 18 | 17 ³ / ₄ | 67 Pica ems. |
| 6-Column Folio | 22 x 30 | 13 ³ / ₈ x 20 | 19 ³ / ₄ | 80 ¹ / ₂ Pica ems. |
| 7-Column Folio | 24 x 35 | 15 ³ / ₈ x 22 | 21 ³ / ₄ | 94 Pica ems. |
| 8-Column Folio | 26 x 40 | 17 ¹ / ₈ x 24 | 23 ³ / ₄ | 107 ¹ / ₂ Pica ems. |
| 9-Column Folio | 28 x 44 | 20 ¹ / ₆ x 26 | 25 ³ / ₄ | 121 Pica ems. |

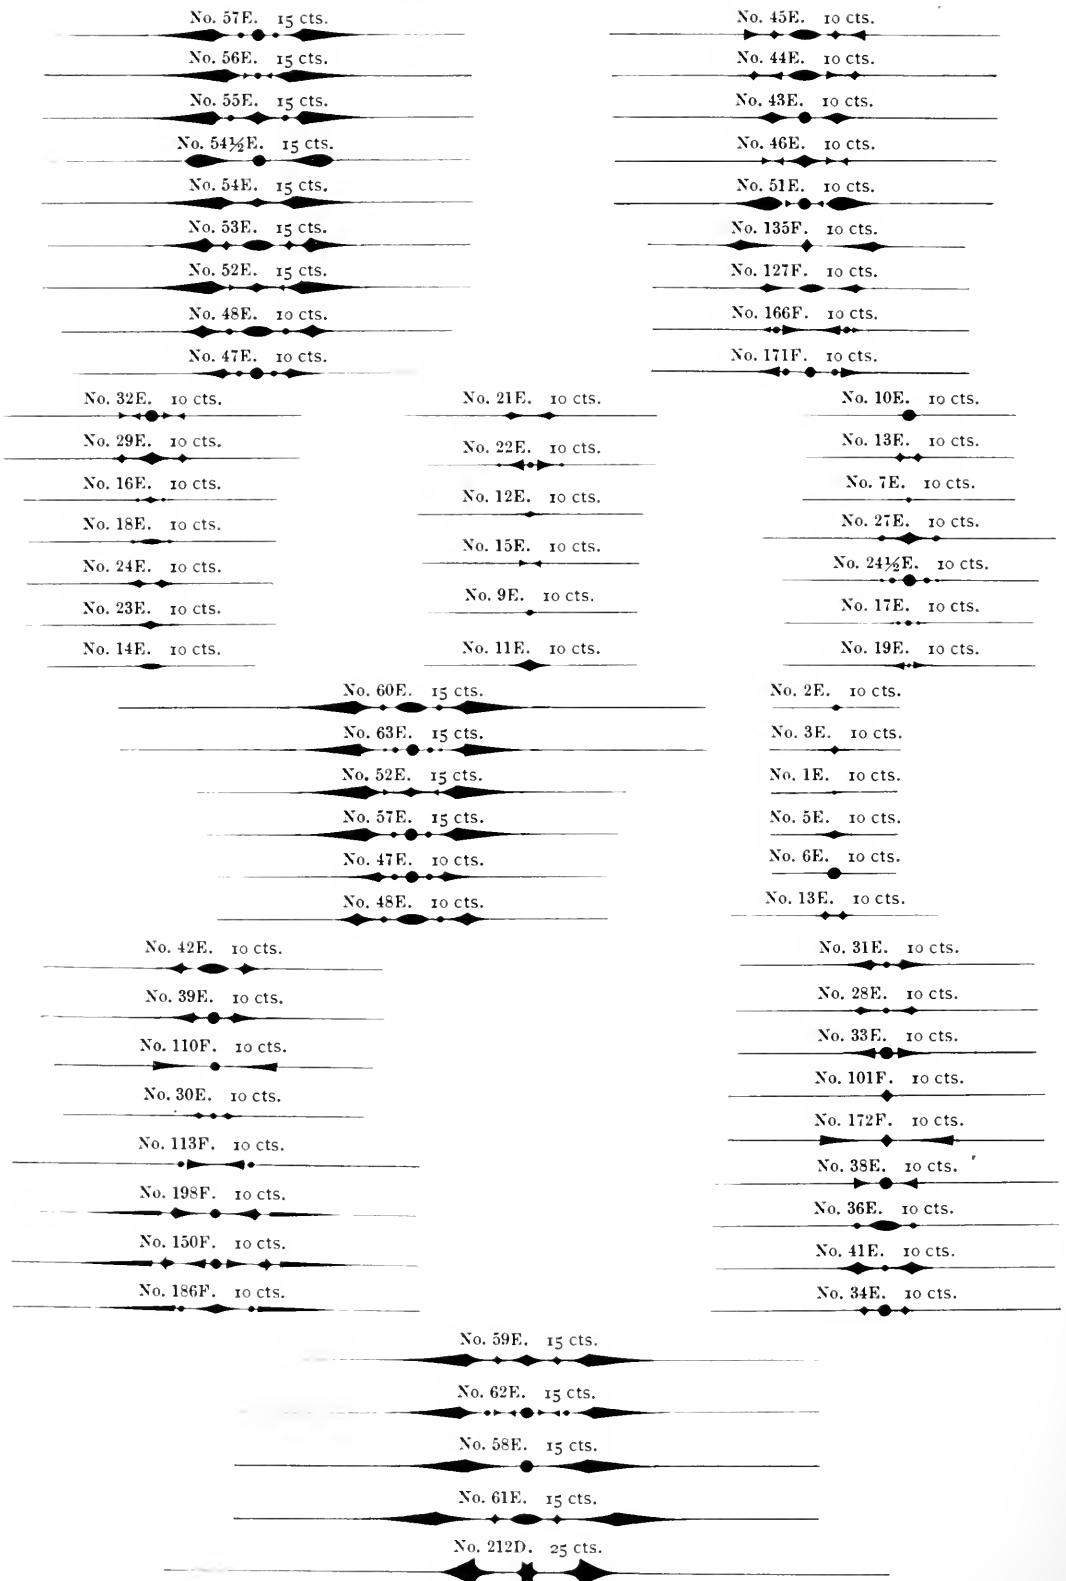

* Length of column rules for first page determined by size of headings, or say about two inches shorter than full length.

TABLE FOR NEWSPAPER ESTIMATES

Showing the number of ems of the different sizes of newspaper type in a line, the number of lines necessary to make one thousand ems, and the length in inches; the number of ems in the regular lengths of columns and the number of leads required. There are 66 13-em 2-point leads in one pound.

| ESTIMATED ON WIDTH OF STANDARD COLUMN, 13 EMS PICA. | 5½ POINT | 6 POINT | 7 POINT | 8 POINT | 9 POINT | 10 POINT | |

The superiority of a Brace cut out of solid Brass to one electrotyped from these Brass Braces is obvious, and those who furnish electrotyped Braces charge quite as much for them as we charge for these original Brass Braces.

Also, a Collection of Forty-five Beautiful Borders and
Thirty-nine Word Ornaments

PART XIX.

Wood Type

WOOD TYPE.

The series shown in this Specimen Book are selected from our Complete Specimen Book of Wood Type, which will be forwarded on application. It contains the most up-to-date, and also all the standard, styles of Wood Type, Borders and Ornaments.

Wood Type is priced by the letter, and sold in various sized fonts, as under. Font orders are subject to a liberal discount; small sort orders are subject to a smaller discount than is allowed on fonts. For prices and schemes of 4A and 5A fonts, see our Specimen Book of Wood Type.

- 3A cap font contains 75 letters.
- 3a lower-case font contains 65 letters.
- 4A cap font contains 106 letters.
- 4a lower-case font contains 90 letters.
- 5A cap font contains 120 letters.
- 5a lower-case font contains 104 letters.

Figures are put up separately.

Customers should bear in mind that End-Wood Type can be made any size desired. A wood-type letter increases in width in exactly the same proportion as it does in length. For example: If a 12-line letter is 2 inches wide, the same letter in 15-line will be 2½ inches wide, the increase being one-quarter each way.

Scheme of 3A 3a font with figures.

| Caps. 75 Letters | Lower Case 65 Letters | Figs. and Points. |
|------------------------|--------------------------------|-------------------------|

REVISED PRICE LIST PER LETTER.

This Price List Supersedes all Others Issued

The prices for all sizes of each style of type shown in this book can be found in this Revised Price List. The left-hand column gives the size of Type or lines Pica. The letters L, M, N, etc., at the top of table, give the class to which the letter belongs, and the figures in the different columns give the price per letter. The sizes of fonts are given above.

Always state whether CAPS alone are wanted, or CAPS and FIGURES, or CAPS, LOWER CASE and FIGURES, or CAPS and LOWER CASE, and how large a font or number of As.

Give full directions for shipping, unless it is desired to leave the matter to us, in which case we will ship the cheapest way, freight or express.

| LINES PICA. | CLASSIFICATIONS. | | | | | | | | | |

Part XX.

**EVERYTHING
FOR THE
PRINTER**

~ ~ American ~ ~
Type Founders Company

BRANCHES COVERING THE CONTINENT

1900

NOTICE TO BUYERS

The American Type Founders' Company offers only the best lines of Printing Material and Machinery, covering all the requirements of the printing office.

As the largest buyer in the world of this class of goods, it commands the best in the market at the lowest prices, and is in the best possible position to satisfy its customers.

Buyers of large or small outfits will always receive the best money's worth. Detailed estimates will be furnished, on application to the nearest Branch, upon receipt of information concerning the amount to be invested, terms required, and work to be done with such outfits.

PRINTERS' WOOD GOODS.

WOODEN MALLETS.

Made of thoroughly seasoned and selected stock; handles screwed in; finished in oil; attractive shape. The lignumvitæ mallets can be specially recommended. They are heavier than hickory mallets, and wear like iron.

Shows Handle
screwed in.

| | | | |
|---|--------|------------------------------------|-------------|
| Hickory, small, 2½×4½ inches . . . | \$0 25 | Lignumvitæ, 2¼×3½ inches | \$0 50 |
| Hickory, medium, 3×5 inches | 0 30 | Lignumvitæ, 3×5 inches | 0 60 |
| Hickory, large, 3½×6 inches | 0 40 | Lignumvitæ, 3½×5½ inches | 0 75 |
| IRON BOUND WOODEN Mallet | | | 1 00 |

PATENT RAWHIDE MALLETS.

This mallet is made entirely of rolled rawhide, except handle, which is of wood.

| | |
|---|--------|
| No. 4. Diameter, 2 in.; length, 3¼ in.; weight, 10 oz., each . . . | \$0 75 |
| No. 5. Diameter, 2½ in.; length, 4¼ in.; weight, 21 oz., each . . . | 1 50 |

RAWHIDE BOUND MALLETS.

The most durable, finest finished, and hand-somest made. Positively will not split. The spring of the hide-facing cushions the blow and prevents jarring the muscles.

| | |
|---|--------|
| Small 2 inch face | \$0 60 |
| Medium 2½ inch face | 0 75 |
| Large 3 inch face | 1 00 |

PRICE LIST OF CASES.

For illustrations of Cases, see pages 936 and 937.

**PATENT
NEW DEPARTURE
TYPE CASES.**

Shows three-ply case bottom, which will not warp nor crack.

Shows at AA how the three-ply bottoms are set into the front and side rails, so that the case slides on the rails instead of on the case bottoms.

Our cases all have patent "New-Departure" three-ply bottoms, which prevent splitting, warping and shrinking. These bottoms are set into the side and front rails (see AA), so that the case slides on the side rails. As the grain of the side rails and of the case-runs in stands and cabinets run the same way, the cases slide much easier and with considerable less wear and tear.

FULL-SIZE CASES.

Size, 32¼ × 16⅝ inches.

| | Clasp Cases. | Ordinary Cases. |

| Full-size Blank Case, to hold four Harris Rule Cases | 0 65 |

* See cut and description, page 934.

PATENT CLASP CASES.

These cases are of unusual strength, owing to the use of a brass clasp over the corner of each box and a long pin which is driven through center of each clasp and clinched, holding the partitions firmly to the bottom of the case. This feature, in combination with our "New-Departure"-case bottoms, makes these cases the strongest and most durable, especially for body type and in newspaper offices.

Section of Patent Clasp Case.

HARRIS RULE CASES.

Four Harris Rule Cases in a Full-size Blank Case. Price, \$4 65.

In HARRIS RULE CASES the rule cannot fall flat—must always stay on end. Pi is prevented, because each box is accurately adjusted for its special size—for instance, a 21-em rule will not go into the 20-em rule box. Generous provision is made for the smaller sizes—the most valuable sizes in a labor-saving font. The cases may be used in sets or separately, as Nos. 1 and 2 are complete in themselves. Four of them fit into a full-size blank case.

The rule referred to below is 2-point, which is the most used.

No. 1 Harris Rule Case holds two complete small fonts of Labor Saving Rule, each weighing 8 pounds, or 16 pounds in all. Each half of this case holds eighteen pieces each length from 1 to 8½ ems (varying by ens), and eighteen pieces each from 9 to 18 ems (varying by ems) and nine pieces each 19, 20, 21, 22, 24, 26 and 28 ems, besides boxes for right and left miters.

No. 2 Harris Rule Case holds one complete font of 16 pounds weight or less. It has compartments for thirty-six pieces each from 1 to 9 ems long (varying by ens), eighteen pieces each from 10 to 24 ems long (varying by ems), and eighteen pieces each of 26, 28, 30, 32, 34, 36 ems long, besides boxes for right and left miters. A large proportion of small lengths allowed for.

Nos. 3 and 4 Harris Rule Cases are designed to be used together to hold a font of rule suitable for a large office, weighing 32 pounds or less. Two and in some cases four boxes are used to hold the most-used sizes. Each case has its proportion of the small sizes, so that if it is desired to carry one case to a compositor's stand for use in rule work, the other is available in its regular place with a good working font. These cases have compartments for seventy-two pieces each from 1 to 9 ems long (varying by ens), thirty-six pieces each from 10 to 24 ems long (varying by ems), and eighteen pieces each from 25 to 36 ems long (varying by ems), and boxes for right and left miters.

| | |
|---|--------|
| Harris Rule Case No. 1, holds two 8-pound fonts | \$1 25 |
| Harris Rule Case No. 2, holds one 16-pound font | 1 00 |
| Harris Rule Case No. 3, } used together, hold one 32-pound font { | 0 75 |
| Harris Rule Case No. 4, } | 1 00 |
| Full-size Blank Case, to hold four of above | 0 65 |

COMPACT RULE CASE.

Has compartments for brass rule from 1 to 36 ems Pica, and from 1½ to 9½ ems Pica, with places for miters. Size outside, 7¾ × 15¼ inches. Four fit in a full-size blank case. For Full-size Rule Cases see page 933.

Price \$0 90

INDIVIDUAL LEAD OR RULE CASE.

In this a compositor may keep his much valued 12-to-Pica and other thicknesses of leads for justifying purposes, his pickups of dashes, rule, etc. The case can be kept in his drawer or on his galley rest. It has boxes from 1 to 9½ ems (varying by ems), from 10 to 22 ems (varying by ems), and from 22 to 28 ems (varying by two ems), with a long box for longer lengths. It is also useful for holding a small font of labor-saving brass rule.

Each, 7×7½ inches over all \$0 75

LEADER BOX.

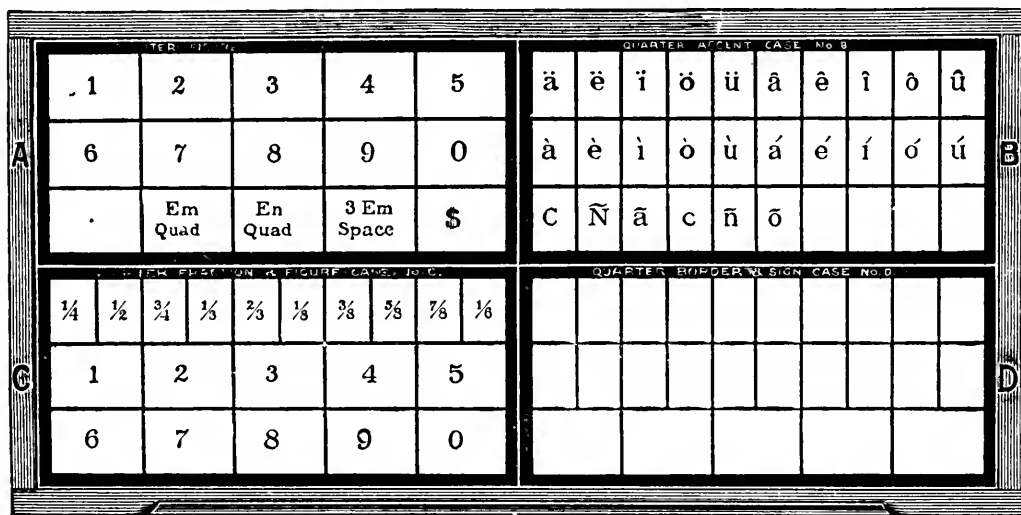

The handiest receptacle for leaders. Can be put on a cap case, on a stone, or on a galley rest, bringing leaders close to hand. One or more required in every office for every size of body type used.

Each, 5×8×1¼ inches over all . . . \$0 25
Per dozen 2 50

See May's Patented Leader Box shown on page 1075.

WISCONSIN COMBINATION "QUARTER" CASES.

Shows four "Quarter" Cases in Full-size Blank Case.

Signs, borders, accents, split fractions, although most expensive, are usually stowed away in odd boxes of cap cases, and are rarely to be found when needed. "Quarter" Cases supply a means of keeping these valuable sorts where they can be found. They can be placed on a cap case, on a stand, or on the stone, convenient to hand of compositor. In setting mathematical work, foreign languages, dictionaries, and special catalogues, these "Quarter" Cases will prove invaluable. We show a few schemes for laying signs, fractions, etc., but various other uses for special purposes will suggest themselves to the "intelligent compositor."

For Split Fractions and Commercial Signs.

For Algebraic and Medical Signs.

Quarter Case No. A, for Figures, etc. \$0 65
 Quarter Case No. B, for Accents, Split Fractions, etc. 0 65
 Quarter Case No. C, for Figures, Fractions, etc. 0 65
 Quarter Case No. D, for Signs, Borders, etc. 0 65
 Per set of four, in regular Full-size Blank Case 3 00

ILLUSTRATIONS OF CASES.

It is unnecessary to illustrate the most-used styles of cases. Nearly all the cases illustrated here have exceptional merit.

CALIFORNIA JOB CASE.

See "lay-out" on page 938

Has fourteen boxes less on cap side than the regular italic job case, thus giving more space for the cap alphabet. A more satisfactory case for the ordinary job font than the italic job case, especially in three-quarter size.

Full-size \$0 90
 Three-quarter 0 85

IMPROVED JOB CASE.

Holds caps, small caps, lower case and figures, or a cap and lower-case font (with figures) and an extra cap font. Will also hold three cap fonts, all with figures. Made full-size only.

Price \$1 20

NEW YORK JOB CASE.

Holds caps, small caps, lower case and figures. The small caps are placed on the same side as the lower-case boxes, and above them. The lower-case boxes are therefore smaller than in a California job case. Made full-size only.

Price \$1 00

PATERSON JOB CASE.

Holds caps, small caps, lower case and figures. The small caps are placed above the cap boxes, all of which are widened, thereby reducing the sizes of the lower-case boxes. A very useful case. Made full-size only.

Price \$1 00

DOUBLE LOWER CASE.

A most useful case. In most job fonts the caps occupy as much space as the lower case, while ordinary job cases give the caps one-half the room allotted the lower-case. In this case the space is divided equally between the caps and lower case. Made full-size only.

Price \$1 20

ROOKER CAP CASE.

Made only in Rooker size (28¼ x 14¼). Gives more space for caps and less for small caps than the regular cap case. Rooker cases are two inches narrower than ordinary cases, and cannot be used on the same stands.

Price \$0 88

ILLUSTRATIONS OF CASES.

YANKEE JOB CASE.

In two-third size, a case with cap boxes at the back is a necessity, but in full-size and three-quarter size this case is inferior in utility to other job cases.

- Full-size (32 cap boxes) \$1 00
- Three-quarter (32 cap boxes) 0 85
- Two-third (28 cap boxes) 0 75

SPACE AND QUAD CASE.

This is an absolutely essential case in offices where economy of time and material is a consideration. Each case holds eight sizes of spaces and quads. Made full-size only.

- Price \$1 00

METAL FURNITURE CASE.

A handy receptacle for metal furniture. There are compartments for 1, 2, 3, 4, 5, 6, 8, 10, 15, 20, 25 and 50 ems. The double-depth case takes three layers of furniture; the single-depth case takes two layers. The latter can be put in a full-size case stand or rack, and the double-depth case is for use on top of a stand or cabinet, or a special place can be made for it under the stone. Made full-size only.

- Double-depth \$2 00
- Single-depth 1 50

SCRIPT OR WOOD-TYPE CASE.

Although mostly sold for wood type, these cases are made so accurately as to be suitable for large script fonts. The movable partitions are adjustable by Picas. Nothing injures expensive script type so much as tumbling about in a case. The use of script cases will save type. Made in full- and two-third sizes.

- Full-size \$0 90
- Two-third size 0 75

MAMMOTH WOOD-TYPE CASE.

No. 3 (Mammoth) Wood-Type Case, 23x44 inches, with slotted sides. For special rack to hold this size case, see page 941. There are two more sizes of wood-type cases made. For prices see page 933.

- Price of No. 3 Wood-Type Case \$1 30

WELLS' TWO-FONT JOB CASE.

A new improved job case with extra large cap boxes, designed to hold two fonts of caps and figures. The boxes in this case are so arranged in size that there is no waste room. In dividing this case to hold fonts of capitals, figures and points, the aim has been to get as large boxes as possible for the letters, while the figures, points and odd characters have been disposed of in boxes no larger than their importance demands. By this means the greatest economy of space has been obtained.

The Well's Two-font Job Case, with extra large Cap Boxes.

The cap boxes in this case have each an area of 5¼ square inches, which is about one-third greater than that of a box in a regular news cap case. No change has been made in the "lay" of the case. The boxes are all in their regular positions, the same as in an ordinary cap or job case.

The figure boxes are all in the back row, it being the most convenient, as it is evident that when figures are not needed they are farthest removed. When these cases are used in a cabinet, this feature will be appreciated. One side of the case can be used for lower-case, if desired. Made in the "New Departure" style, with three-ply bottom, like all other cases manufactured by us.

This case can be substituted in any of our cabinets, in whole or in part, without extra charge. Price, 90 cents.

"Lay-out" for California Job Case shown on page 936

"Lay-out" for regular Job or Italic Case.

ROLL FRONT CASE RACKS

An entirely new feature in case racks. There has been a constant demand for a case rack that would take the old cases and utilize them in the form of a cabinet. Many printers have desired to do away with the ordinary case racks and substitute a cabinet, and thus increase the life of the type by keeping it free from dust; but on account of the expense involved and the fact that their old cases could not be sold or utilized, they have hesitated in making the needed improvement. This new case rack solves the problem. These Roll Front Case Racks are equal to cabinets in every way, and they really are cabinets and not case racks in the ordinary sense of the term. They are fitted with steel runs, and they are thoroughly up-to-date. The roll front is fitted with the finest brass desk lock. A single lock secures the entire tier of cases. These racks are made of ash, finished in antique oak, same as regular high-grade cabinets.

PRICES QUOTED ARE FOR CASE RACKS ONLY.

- | | |
|---|---------|
| No. 1. With racks for 16 cases; height, 45 inches | \$20 00 |

- Case pulls, 3 cts. each.

AUTOCRAT CASE STAND.

This is a printer's stand or frame in its simplest, most compact and convenient form. The most prominent feature is a galley tray, under each lower case, where compositors can empty their sticks by simply pushing the lower case up sufficiently to expose the galley, after which the case is drawn back to its place.

Each single stand accommodates two pairs of news cases, fifteen full-size job cases, and six news galleys. The double stand is made so backs of job cases come together, and will accommodate two pairs of news cases, thirty full-size job or triple cases and six galleys. A large space on top, back of the brackets, may be used for storing live or dead tied-up matter.

- | | | |

| No. 17. | Double City Stand, with racks for 30 full-size cases (see illustration) | 8 00 |

No. 15. Double Stand, with Galley Rest, and Racks for Twenty-four Full-size Cases.

No. 17. Double City Stand. The upper cases project over the lower, bringing the caps nearer the hand. There is a shelf to hold a galley under the lower case, which can be pushed back to permit matter to be emptied on the galley.

**CAUTION.—There are two widths of two-third cases in use. In ordering it is necessary to state exact width of two-third case the stand is required to hold, otherwise we will send stands to take in our standard width of two-third cases.*

NEW YORK SPACE-SAVING CASE STANDS.

New York Double Stand.

New York Quadruple Stand (see end view below).

These are *space-saving, rent-reducing stands*. Two New York Double Stands, holding sixty cases in racks and four pairs cases on top, occupy eighteen square feet of floor space, as against thirty square feet occupied by two ordinary double stands, holding at most forty-eight cases in racks and four pairs cases on top—a saving of twelve square feet. Two Double City Stands occupy a floor space of twenty-five square feet as against seventeen feet occupied by one Quadruple New York Stand—a saving of eight square feet. This saving is obtained by making the racks correspond to size of cases exactly, bringing forward the cap cases so that they do not overhang at the back of stand (as they do on ordinary stands), and extending the lower cases several inches into the alley.

End view of New York Window and Quadruple Stands.

OTHER POINTS OF SUPERIORITY.

The lower cases project into the alley several inches, affording the compositor ample leg room, and allowing him to get closer to the type. The angle of the lower case is just right for rapid setting. The upper case is raised above the lower, and brought forward closer to the compositor's hand, while not obstructing the figure boxes of the lower case. The cases are held on strong iron brackets, securely screwed to a hard-wood top, which is perfectly smooth, and very useful for storing tied-up matter or for other purposes.

The Window Stand is a rearrangement of the Double Stand, so that it occupies a square area, and is very suitable for placing opposite a window.

| | |
|---|---------|
| New York Single Stand, with racks for 15 cases | \$ 6 50 |
| New York Double Stand, with racks for 30 cases | 10 50 |
| New York Quadruple Stand, with racks for 60 cases | 18 00 |
| New York Window Stand, with racks for 30 cases | 10 50 |

CASE RACKS.

Made of hard wood, bolted together, and the higher racks are braced at the center with iron rods to prevent spreading.

| Full-size Cases. | Height. | |

| Double, to hold 60 cases | 84 inches | 18 00 |

Made to hold two-third and three-quarter cases at same prices. In ordering for two-third cases it is necessary to state exact width of cases, as there are two widths of two-third cases in use.

WOOD-TYPE CASE RACK.

Single, to hold 20 No. 3 Wood-Type Cases \$9 00
 A No. 3 Wood-Type Case is 23x44 inches over all.

Case Rack for Twenty Full-size Cases.

“AMERICAN-POLHEMUS” CABINETS.

All Hard Wood.

The object of the American-Polhemus Cabinet is to save time and space. Time is lost on the ordinary cabinets by stationing the compositor in front of twenty cases, all frequently in use by other men, who, when setting or distributing from them, keep the man at the cabinet idle. On the American-Polhemus Cabinets the job cases are unobstructed, and the compositor stands at the back, where he cannot be interrupted. If he is setting solid matter he can empty his sticks, without walking a step, on a galley kept under his lower case, as the cases are held by the Patent Tilting Bracket and Galley Rest. Illustrated on page 944.

Every inch of space on the American-Polhemus Cabinets is utilized to advantage. The galley top or bank is a most useful addition. The space between the cases is used as a sort of a galley cabinet. The top is flat, and tied-up matter may be kept on it, as the iron case brackets admit of easy access to the space under the cases and galley top. The brackets which hold the cases project into the alley eight inches, giving the compositor plenty of knee-room, while saving floor-space.

Back of American-Polhemus Triple Cabinet, showing arrangement of Body-letter Cases on the Patent Tilting Brackets.

PRICES OF AMERICAN-POLHEMUS CABINETS.

- No. 2. Single American-Polhemus Cabinet—Complete with 18 full-size California job cases, 1 pair of news cases, galley top, and 1 pair of patent tilting brackets \$35 00
- No. 1. Double American-Polhemus Cabinet—Complete with 18 full-size California and 20 two-third job cases, 2 pairs of news cases, galley top, 10 sort drawers or galley cabinet, and 2 pairs of patent tilting brackets 75 00
- No. 3. Triple American-Polhemus Cabinet—Complete with 18 full-size California and 40 two-third job cases (20 in a tier), 3 pairs news cases, galley top, 10 sort drawers and galley cabinet, and 3 pairs of patent tilting brackets . . . 110 00

STEEL-RUN AMERICAN-POLHEMUS CABINETS.

All Hard Wood.

These cabinets are similar to the American-Polhemus Cabinets, illustrated on these pages, except that the use of steel runs instead of wood runs increases their case-holding capacity without changing floor space or height.

- No. 4. Triple Polhemus Cabinets—Complete with 50 two-third and 25 full-size California job cases in three tiers (25 in a tier), 3 pairs news cases, galley top, 10 sort drawers and galley cabinet, and three pairs of patent tilting brackets. \$140 00
- No. 5. Double American-Polhemus Cabinet—Contains 25 full-size California job, 25 two-third job, and 2 pairs of full-size news cases on top, 10 sort drawers or galley cabinet, a galley top, and 2 pairs of patent tilting brackets 95 00
- No. 6. Double American-Polhemus Cabinet—Contains 50 full-size California job (25 in a tier), and 2 pairs of full-size news cases on top, a galley top, and 2 pairs of patent tilting brackets (*without sort drawers or galley cabinet*) . . . 95 00
- No. 7. Single American-Polhemus Cabinet—Contains 25 full-size California job, 1 pair of full-size news cases on top, a galley top, and 1 pair of patent tilting brackets 47 00

Front view of No. 3 Triple Polhemus Cabinet, showing Jobbing Cases, Sort Drawers, Galley Cabinet, and Galley Top on Bank.

CHOICE OF CASES.

Full-size California and two-third job cases will be furnished unless otherwise specified. Triple, regular job or italic, cap or lower cases, can be furnished, if desired, at the same prices. If rule, border or script cases are ordered, the difference in cost of cases will be added to the list price.

In Double Polhemus Cabinets Nos. 1 and 5 be sure and state which you prefer—sort drawers or galley cabinet.

Cabinets are constructed of ash, with antique oak finish.

WISCONSIN WINDOW CABINET.

All Hard Wood.

Specially designed for placing in front of a window, as it does not obstruct the light, of which the cases on top get the full benefit. Two men may work undisturbed at the sides, while the job cases in front are convenient for other men. The top is flat, and useful for holding tied-up type.

These cabinets have the patent tilting bracket and galley rest, which enables a compositor to empty his stick without leaving the cabinet by simply tilting his lower case, as shown in the cut, thus exposing the galley.

Weight, crated, about 375 pounds. Width, 35¾ inches ; height, 44 inches ; depth, 20½ inches.

No. 1. Wisconsin Window Cabinet, with 2 pairs of patent tilting brackets, 18 full-size California job cases, and 2 pairs of news cases on top \$36 00

No. 2. Wisconsin Window Cabinet, with 2 pairs of patent tilting brackets, 23 full-size cases and steel runs, and 2 pairs of news cases on top, same height as No. 1, 47 00

PATENT TILTING CASE BRACKET.

Used on Wisconsin Window and American-Polhemus Cabinets.

B B (outline) shows bracket holding case in position for setting. Shaded cut shows bracket tilted up, allowing compositor to empty on galley below lower case, which is more clearly shown in cut of Wisconsin Window Cabinet printed above. These brackets are also supplied with all American-Polhemus Cabinets.

Per pair \$2 00

WISCONSIN HARD-WOOD CABINETS

With "New Departure" Cases.

Twenty-Case Wisconsin Cabinet with Flat Top, showing Double Case Bracket, Style A*, attached to top, for holding two pairs of cases.

See page 1059 for prices of Double Case Brackets, Style A.

Twenty-Case Wisconsin Cabinet with Galley Top and Copy Drawer.

Although made of hard wood, these cabinets are sold at the same prices as ordinary cheap-looking stained cabinets. Three-quarter and full-size cabinets are furnished with California job cases, described on page 936, which are preferable to italic cases, as they afford more room for the caps. The bottoms are made flush with the floor, to prevent pi from getting underneath. The sides are double paneled and very tastefully moulded. Double case brackets may be put on top of the flat-top cabinets, making a very convenient stand, the regular height from the floor. *Galley-top cabinets are kept in stock with twenty cases only, but can be furnished for twelve and sixteen cases to order, though not recommended.*

OPTION :—Purchasers desiring special assortment of cases in lieu of the California job case, can make selection to suit their requirements. If higher-priced cases are selected, the difference in price is added to the list price of the cabinet.

AMERICAN STEEL-RUN CABINETS

Hold 50 per cent. more type in same floor space occupied by Regular 20-Case Cabinets.

By substituting steel for wood in the runs, the awkward upper projections on the fronts of regular cabinet cases (which in the ordinary are put on to hide the wooden runs) are dispensed with, and ten more cases are got into the same space. Cases are easier to set out of, and *all cases are within easy reach of compositors of average height.*

The cabinets are made of hard wood, polished, braced in center to prevent spreading, and California job cases (giving one-third more room for caps by dispensing with two superfluous rows of boxes) are used instead of italic cases.

The height of the 30-case cabinets is 53 inches ; of the 40-case, 68 inches.

The illustration herewith shows the steel run used in American cabinets. Screws are countersunk.

Shows Steel-Run with Countersunk Screws.

OPTION.—Purchasers desiring special assortment of cases in lieu of the California job case, can make selection to suit their requirements. If higher-priced cases are selected, the difference in price is added to the list price of the cabinet.

**WISCONSIN CABINETS WITH STEEL RUNS.
FILLED WITH "NEW DEPARTURE" CASES.**

The merits of the modern Steel Run Cabinets have met with general recognition, and the best offices are now being equipped with these economical additions to the printing office. Where rents are high and space is limited these cabinets are especially recommended. They save twenty-five per cent. in space in the smaller sizes, and by using the high cabinets containing forty, fifty and sixty cases the saving is enormous. Space is utilized in the upper part of these high cabinets that was not occupied before. The same result is obtained by using high cabinets that is obtained in the eighteenth-story office building.

The Capacity is Enormously Increased while the Ground Space Occupied Remains the Same.

Every case is easily accessible, because the ones at the top of the high cabinets can be taken out and brought down to the proper level.

See illustration of steel-run with countersunk screws on opposite page.

| | Double Case Brackets, per pair | | | | 1 25 |

Nos. 2, 8 and 14 are correct height to use with patent tilting brackets, in same manner as on Polhemus cabinets shown on page 944.

The Fifty-case and Sixty-case cabinets are furnished in one or two tiers, as desired. Brass label holders attached to any cabinet at an additional price of five cents per case list.

PORTER'S PATENT EXTENSION-FRONT STEEL-RUN CABINET.

The sides of these cabinets are extended four inches beyond the fronts of the cases. These extensions serve the printer in two ways: (1) A case near the top of a cabinet may be taken from its rack and placed in a more convenient position for setting from, and will be held by the extensions without withdrawing another case. (2) The extensions permit cases to be drawn out further from the racks than is possible in other cabinets, making it easier to set out of the rear boxes. In addition, these cabinets have all the best points of other cabinets, such as steel runs, "New-Departure" cases, hard wood throughout, and are stronger than any other cabinets. The extension sides make it practicable to use higher cabinets, containing more cases in a tier, than can be advised where ordinary cabinets are used.

No. 7 Porter Steel-Run Cabinet.

LIST PRICES.

| | Height Inches. | With Full-size California Job Cases—Flat Top. | With Full-size Blank Cases for Electrotypes. |
|---|-------------------|---|--|
| No. 1. 25 cases, single tier | 46 | \$43 00 | \$38 00 |

| No. 7. 46 cases, double tier, with two pair tilting brackets and two pairs news cases on top . | 43 | 90 00 | . . . |

These cabinets are 35½ inches wide and 22 inches deep. Depth of the extension front is 4 inches. FOR OPTION ON CASES, see page 946.

ROWEN BORDER AND SCRIPT TYPE CABINETS.

Rowen Border Cabinet with Twenty Cases.

These cabinets supply the long-felt need of a proper receptacle for borders, keeping them in compact shape and preserving the face.

The cases in these cabinets are 10×12 inches inside, and are tilted sufficiently to keep the type on its feet. The borders or type are held between movable division strips, which are 18 points wide, while the slots into which these strips fit are set 6 points apart, so that they can be adjusted to hold 6, 12, 18, 24, 30, 36, 42, 48, 54, 60, or 72 point bodies, while such irregular and seldom-used bodies as 8 and 9 point may be carried in the 12-point drawers, or special strips may be procured for them.

For script type a quantity of metal pinch springs is furnished with each cabinet, for inserting between the different letters in a font, so that if all the letters "d" are removed, the pinch spring holds the letters "e" on their feet. The advantages of keeping delicate scripts in cases where the faces of the letters are not subject to friction and scratching will be apparent to all.

Rowen Border and Script Type Cabinet with Four Drawers.

LIST PRICES.

| | |
|--|---------|
| No. 1. 4 drawers, one tier, height 12 inches | \$ 8 00 |
| No. 2. 6 drawers, one tier, height 16 inches | 10 50 |
| No. 3. 10 drawers, one tier, height 25 inches | 16 00 |
| No. 4. 16 drawers, two tiers, height 21 inches | 25 00 |
| No. 5. 20 drawers, two tiers, height 25 inches | 30 00 |
| No. 6. 30 drawers, two tiers, height 35 inches | 45 00 |
| No. 7. 40 drawers, two tiers, height 44 inches | 60 00 |

Each case will hold 30 feet of 6-point, or 24 feet of 12-point, or 20 feet of 18-point, or 17 feet of 24-point, or 15 feet of 30-point, or 13 feet of 36-point borders.

HANDY SORT CABINETS.

These cabinets are fitted with serviceable sort drawers which should supplant the various cigar-box-tin-can arrangements which disgrace so many offices. The drawers are 8 × 20 inches over all, and 2½ inches deep. The cabinets are very strong, made of hard wood, and remarkably low-priced. The drawers, which are also for sale separately, have movable partitions, and may be adjusted to the special requirements of any printing office. All drawers have strong bronze drawer-pulls, whether sold in cabinets or separately.

A picture of the drawer is shown below. Drawers are sold separately if required.

Handy Sort Cabinet, with Thirty Drawers.

| | |
|--|-------------|
| Cabinet with 10 Handy Sort Drawers | \$12 00 |
| Cabinet with 20 Handy Sort Drawers | 23 00 |
| Cabinet with 30 Handy Sort Drawers | 35 00 |
| Cabinet with 40 Handy Sort Drawers | 47 00 |
| Cabinet with 50 Handy Sort Drawers | 59 00 |
| HANDY SORT DRAWERS, each | 0 90 |

Sort cabinets made to order to fit any space, or to any dimensions, at proportionate prices.

PAPER AND CARD STOCK CABINETS.

Made very strongly of hard wood. High-priced papers and cardboard should be kept in a dust-tight receptacle, to prevent wastage and economize space. The drawers have extension backs, and are strongly constructed.

No. 1. 12 drawers, each drawer holding 22½ × 28-inch cardboard, or smaller.

Price \$37 00

No. 2. 12 drawers, each drawer taking full sheet of 28 × 42 inches.

Price \$48 00

The cabinets are 48 inches high. The drawers are 2½ and 5 inches deep, and have movable partitions.

No. 1 Paper Stock Cabinet. Occupies 26 × 34 inches floor space.

No. 5 Wood-Type Cabinet, with Galley Top. Occupies nine square feet floor space, and affords one hundred and twelve square feet for storage of type.

WOOD-TYPE CABINETS.

Very substantially constructed of hard wood. The cases are slotted on the sides, and have movable strips which may be adjusted to Picas. The cases in the Mammoth Cabinet (23 X 44 inches) have a center bar, and cases in the Regular Cabinet (23 X 32 inches) have no center bar.

These cabinets afford the most economical method of keeping wood type. The top of cabinet is available for use in laying out lines. They save the time lost in climbing to shelves, and the wood type is kept clean and is less liable to warp.

| | Flat Top. | Galley Top. |
|---|-----------|-------------|
| No. 1. 12 cases, 23 X 32 inches | \$24 00 | \$27 50 |
| No. 2. 16 cases, 23 X 32 inches | 30 00 | 33 50 |

| No. 6. 20 cases, 23 X 44 inches | 48 00 | 52 00 |

WOOD-TYPE CASE RACK.

To hold twenty No. 3 wood-type cases (made to order) \$9 00

For prices of wood-type cases, see page 937. No. 3 Wood-type cases are 23 X 44 inches over all, and the price is \$1 30 each.

BOOKBINDERS' CABINETS.

Made of hard wood, with bronzed pulls on each case. The cases are made in exactly the same style as printers' cases. These cabinets occupy a space of 20 X 20 inches, and may be put on or under a bench. "A place for everything and everything in its place" is a rule bookbinders should live up to, and these cabinets enable them to do so.

- Cabinets with 6 cases . \$ 8 00
- Cabinets with 10 cases . 12 00
- Cabinets with 15 cases . 16 50

BOOKBINDERS' CASE.

Half cap case, 16 X 16 1/4 inches, without bronze pull, each \$0 60

Case used in Bookbinders' Cabinet.

INDEXED ELECTROTYPE CABINET.

Fitted with the special cases illustrated below, each furnished with strong adjustable slotted partitions, each case numbered in front, and each section in the case designated by initial label, for which a secure holder is provided. The cuts in each lengthwise section are separated and held in place by shallow crosswise slats. An Index Book is furnished with each cabinet in which the cuts are indexed as follows:

| ORIGINAL CUT | | | NAME OF CUT | ELECTROTYPES | | | | |
|--------------|---------|----------|----------------|--------------|---------|-----------|---|---|
| DRAWER | SECTION | DIVISION | | DRAWER | SECTION | DIVISIONS | | |
| 12 | D | 3 | Bicycle | 31 | E | 1 | 2 | 3 |
| 12 | A | 2 | Lawn Mower | 33 | A | 4 | 5 | 6 |
| 12 | E | 3 | Sewing Machine | 35 | B | 1 | 2 | 3 |
| 12 | D | 4 | Factory Plant | 30 | C | 7 | 8 | 9 |

Nos. 6, 12, and 18 Cabinets, containing 60 Cases.

These cabinets meet in every respect the requirements of not only printers but of all manufacturing concerns that use cuts largely. Printers will do a favor to their customers of this class by calling their attention to these new cabinets. They are substantially and handsomely made of ash, finished in antique oak. The cases slide on steel runs, so that they take up the least possible space. The dimensions, weight and prices are given on next page.

Case furnished in Indexed Electrotype Cabinets.

Note that every cut is in a distinct compartment, and that as many sections and divisions of sections can be made as are desired. The plan of the index printed above refers to the case shown here.

PRICE LIST OF INDEXED ELECTROTYPE CABINETS.

View of full-length Slotted Section Slats.

The Division Slats, which are shallow, fit into these Section Slats as shown in cut on preceding page.

| No. | Size of Cases Inches. | Height Inches. | Price. |

| 17. | With 50 full-size cases 16×32¼ | 84 | 75 00 |
| 18. | With 60 full-size cases 16×32¼ | 99 | 90 00 |

The fifty-case and sixty-case cabinets are furnished in one or two tiers, as desired.

SPECIAL NOTICE.—The above prices include the cabinets fitted with a full equipment of division slats, including five of the slotted section divisions for each drawer in the two-third size cases, and six for each drawer in the three-quarter and full-size cases; also with a large assortment of cross divisions, in various lengths. Each drawer is fitted with a metal number plate, as shown in the illustrations on preceding page. One index book is furnished with each cabinet.

ELECTRO AND CUT CABINETS.

These cabinets are filled with blank cases, and are made of polished ash, with bronze case-pulls. The cases have extension backs. In addition to the ordinary use of the printer, these cabinets can be recommended to advertisers for keeping their wood cuts, etc., for keeping samples of hardware, confectionery, fancy stationery, for seeds, and for many other purposes.

All sizes can be supplied with galley tops at an advance of \$3.00 on flat-top prices, but galley tops are not recommended except on 20-case cabinets.

Flat-Top Sixteen-Case Electro Cabinet.

| No. | Size of Cases Inches. | Height of Cabinet. | With Flat Top. | Galley Top. |

| No. 9. | 20 full-size blank cases 16×32¼ | 43 inches | 25 00 | 28 00 |

See page 946 for prices of Steel Run Cabinets with Blank Cases. Also page 948 for prices of Porter Extension-Front Cabinets with Blank Cases.

HANDY LETTER BOARD CABINETS.

Handy Letter Board Cabinet with Sixteen Boards.

For the storage and safe keeping of job work these cabinets are unrivaled. Their cost will be saved in a few months by the prevention of pi. They occupy a floor space of 16×19 inches, with letter boards of 12×15 inches inside, and are made of hard wood throughout, in a solid and substantial manner. Boards are closed at sides and back, and are rabbeted in front to receive galleys. They are well-named "Handy." For job work within their size—and this the larger variety of such work—these small boards are much superior to the larger boards usually put under imposing tables, as it is a back-breaking job to get a form from these large boards when they are full of type.

It is distinctly an economy to place dead and live forms in such a receptacle as this, rather than to incumber useful space on an imposing stone, the type on which is always liable to damage. The protection they afford from dust is also worthy of consideration.

| | |
|--------------------------|---------|
| With 10 boards | \$10 50 |
| With 12 boards | 12 00 |
| With 16 boards | 15 00 |

Other sizes made to order at proportionate prices.

HARD-WOOD LETTER BOARDS.

Made of selected stock, smooth and true, with closed sides and backs, rabbeted in front to allow matter to slide on galleys easily. These boards have projecting backs so that they can be pulled out of the racks to the full extent of their inside measurements.

| | |
|---|--------|
| No. 1, 21¼×20½ inches outside, fits two-third case stands | \$1 20 |
| No. 2, 26¼×20½ inches outside, fits three-quarter stands | 1 40 |
| No. 3, 32¼×20½ inches outside, fits full-size stands or racks | 1 70 |

INK AND ROLLER CABINETS.

A very necessary article of printing-office furniture. The use of it will result in a saving of ink and rollers, which will speedily pay for the cost of cabinet.

| | |
|---|--------|
| No. 1, with shelf for ink, shelf for brayer and ink slab, and brackets to hold 6 eighth and 6 quarto rollers | \$6 50 |
| No. 2, with shelf for ink, shelf for brayers and ink slabs, and brackets for 6 each eighth, quarto and half-medium rollers | 9 50 |
| No. 3, with shelf for ink, shelf for brayers and ink slabs, and brackets to hold 12 each eighth, quarto and half-medium rollers | 13 00 |

GALLEY CABINETS.

Made of thoroughly seasoned Hard Wood, in the most substantial manner.

Three-tier Galley Cabinet with Galley Top, to hold Sixty-six Galleys.

One-tier Flat-top Galley Cabinet, to hold Twenty Galleys.

Particular attention is directed to the galley cabinets of larger capacity. They are very desirable in the larger offices, and are designed to carry an immense weight of type safely. All these cabinets are made of hard wood. All flat-top cabinets are made same style as the one-tier cabinet illustrated above. All galley-top cabinets same as the three-tier cabinet shown on this page.

The "galley-top" cabinets are of much stronger construction than the "flat-top," and may be ordered with or without galley top, as desired, at the same prices.

| | With Flat Top. | With Galley Top. | Boxing. |
|---------------------------------------|----------------|------------------|---------|
| 1 tier to hold 20 galleys | \$ 8 00 | \$14 00 | \$0 50 |
| 1 tier to hold 30 galleys | 11 50 | . . . | 0 75 |
| 2 tiers to hold 40 galleys | 15 00 | 25 00 | 1 00 |
| 2 tiers to hold 50 galleys | 18 50 | . . . | 1 25 |
| 2 tiers to hold 60 galleys | 22 00 | . . . | 1 50 |
| 3 tiers to hold 66 galleys | . . . | 36 00 | 2 00 |
| 4 tiers to hold 88 galleys | . . . | 47 50 | 2 50 |
| 6 tiers to hold 132 galleys | . . . | 62 00 | 3 00 |
| 9 tiers to hold 198 galleys | . . . | 85 00 | 4 00 |

NOTE.—The shelves in the larger cabinets should be numbered, and the proof of the galley should be numbered to correspond with the number on shelf, thus saving all the time required to locate galleys that are not so numbered. Iron number plates, made for numbering shelves, can be supplied at the following prices, net :

| | | |
|--------------------------------|-------------------------------|-------------------------------|
| 1 tier (20 galleys) . . \$1 00 | 2 tiers (50 galleys) . \$1 75 | 4 tiers (88 galleys) . \$3 00 |
| 1 tier (30 galleys) . . 1 25 | 2 tiers (60 galleys) . 2 00 | 6 tiers (132 galleys) . 4 00 |
| 2 tiers (40 galleys) . 1 50 | 3 tiers (66 galleys) . 2 25 | 9 tiers (198 galleys) . 5 00 |

LINOTYPE MATRIX CABINET.

Has roll curtain front, with lock. Made of hard wood, beautifully finished, and very substantial. Each drawer is $14\frac{1}{4} \times 15$ inches inside, and holds 142 running inches of matrices set edgewise. A locked tool drawer, $4\frac{1}{2}$ inches deep, is placed at the bottom, which also holds the space bars on a brass rod.

- No. 1. 6 matrix and 1 tool drawers, height $29\frac{1}{2}$ ins. \$22 00
- No. 2. 8 matrix and 1 tool drawers, height 34 ins. 28 00
- No. 3. 10 matrix and 1 tool drawers, height $38\frac{1}{2}$ ins. 34 00
- No. 4. 12 matrix and 1 tool drawers, height 43 ins. 40 00

Six metal slugs, same shape and size as a matrix and $\frac{3}{4}$ -inch wide, furnished with each drawer. These hold up the matrices at ends of lines.

Eight-Drawer Linotype Matrix Cabinet.

Detailed Section of Matrix Drawer, showing Matrices in place.

SPECIMEN CABINETS.

Made of ash. These cabinets are handsomely constructed, and will be an ornament to any office.

The drawers have movable partitions, and are made in two depths— $2\frac{1}{2}$ inches and 5 inches. The No. 1 cabinet is the proper height for placing a letter-copying press on.

The methodical classification and preservation of specimens in a cabinet enables customers to decide on what they want quickly, and in many cases suggests other requirements. Let the public see what you have to sell, and they will become buyers.

- No. 1. 8 drawers, 26 inches wide by 19 inches deep by 37 inches high \$14 00
- No. 2. 12 drawers, 26 inches wide by 19 inches deep by 53 inches high 20 00

No. 1 Specimen Cabinet, 26 inches wide, 37 inches high, and 19 inches deep.

MOVABLE GALLEY RACKS.

Regular Galley Rack with Movable Galley Brackets.

Union Movable Galley Rack.

UNION MOVABLE GALLEY RACK.

The Union Movable Galley Rack holds 30 galleys, and is mounted on strong casters so that it can be moved at will to the most convenient position for doing the work in hand. Union Movable Galley Rack, holding 30 galleys \$21 00

REGULAR GALLEY RACK.

The Regular Galley Rack is intended for placing against the wall. The brackets are secured on a very strong hard-wood frame.

**LABOR=SAVING
REGLET
CASES.**

Nos. 3, 4, 5, 6 are made same style as illustration.

The reglet lies flat, and varies by ems up to 51 ems, and by 5 ems in longer lengths. Nos. 1 and 2 are square boxes, in which reglet is put in on end, and varies by 10 ems up to 60 ems, with 72 and 120 ems added in the No. 2 case. One-half the pieces in each case are Pica body; the other half, Nonpareil body.

Reglet Case No. 4. 2100 pieces, \$8 00.

| Case. | No. of Pieces. | No. of Yards. | Lengths in Case. | Price. |

LABOR=SAVING FURNITURE, WITHOUT CASES.

| | |
|---|--------|
| Half font of 280 pieces, in a box | \$2 75 |
| Single font of 560 pieces, in a box | 5 00 |
| Double font of 1120 pieces, in a box | 10 00 |
| Mammoth font of 1530 pieces, in a box | 25 00 |

LABOR=SAVING FURNITURE.

This Labor-Saving Furniture is thoroughly oiled, and cut to the point standard. Every piece has the size stamped on the end.

Cases are made *with* or *without* partitions. The usefulness of the font is doubled by having it in a case with partitions.

A single case contains 560 pieces, divided into 10 pieces, each 10, 15, 20, 25, 30, 40, 50 and 60 ems long by 2, 3, 4, 5, 6, 8 and 10 ems wide.

A half case contains half the number of pieces held in a single case.

THE No. 7 MAMMOTH CASE

is especially designed for large offices, and contains the following assortment of selected furniture, from 10 to 160 ems long: 270 pieces each 2-line, 3-line and 4-line furniture; 225 pieces each 5-line and 6-line furniture; 135 pieces each 8-line and 10-line furniture—assorted in 10, 15, 20, 25, 30, 40, 50, 60, 70, 80, 90, 100, 120, 140 and 160 ems lengths. There is a larger proportion of the narrower and most-used sizes than of the wide furniture.

- No. 1. Half case contains 280 pieces, with partitions . . . \$ 6 00
- No. 2. Half case contains 280 pieces, without partitions . . . 5 00

- No. 7. Mammoth case, designed for large offices, with partitions, no door (see description above) . . . 40 00

No. 3. Single Case, with Partitions and Door.

No. 7. Mammoth case, designed for large offices, with partitions, no door (see description above)

No. 7. Mammoth Labor-Saving Furniture Case.

LABOR-SAVING LEAD RACKS.

Two-tier Wisconsin Lead Rack ; 4 to 12½ by ems,
13 to 60 by ems.

Eureka Lead Rack.

Four-tier Wisconsin Lead Rack ; 4 to 12½ by ems,
13 to 60 by ems twice.

PRICES.

Two-tier Wisconsin Lead Rack \$6 00

Takes leads from 4 to 12½ ems (varying by ems), and from 13 to 60 ems (varying by ems), the length being stamped over each compartment. Compartments are eight inches high. Will hold 750 pounds of leads and slugs.

Four-tier Wisconsin Lead Rack \$9 00

Has two compartments each for all sizes in the two-tier rack, and is similar in design and construction. Will hold 1500 pounds of leads and slugs.

Eureka Lead Rack \$2 50

Boston Lead Racks, set of four 5 40

- No. 1 holds 4 to 15 ems lengths 0 90
- No. 2 holds 16 to 30 ems lengths 1 20
- No. 3 holds 31 to 45 ems lengths 1 50
- No. 4 holds 46 to 60 ems lengths 1 80

Boston Lead Racks.

MAKE-UP TABLES.

These tables are used for making-up and carrying forms either to the beating table or matrix-rolling machine (or elevator, if the stereotype room is not on the same floor with the composing room), and are very substantially built of hard wood with patent double-roller revolving casters. The iron top is either smoothed off or covered with brass—the latter being preferred by the leading newspaper offices.

| Size of Matter. | Price, Iron Top. | Price, Top Covered with Brass. |
|------------------------|------------------|--------------------------------|
| 15×20 inches | \$40 00 | \$50 00 |

IMPOSING TABLES AND MARBLE STONES.

Square-leg Imposing Table.

The imposing stone is an important piece of furniture in every printing office, and should be carefully selected with a view of getting the best the market affords. Our line is unsurpassed. The tables are made strong and serviceable, and fitted with the best hard marble tops and a strong coffin.

| | Price of Stone. | Square-leg Table and Stone. | Round-leg Table and Stone. |

COFFINS.—When coffins only are desired, they can be had in any size, at 75 cents per running foot the long way.

A "coffin" is a hard wood frame which serves as a bed for the stone, protects its edges, and affords a rest for galleys when used for sliding off matter.

Round-leg Imposing Table.

IMPOSING TABLES WITH LETTER BOARDS.

No. 9. With 36×60-inch Marble Top; has 32 Letter Boards, each 17½×26 inches inside.

No better disposition of the space underneath an imposing table can be made than to use it for letter boards. If the type is dead, it is shifted from the stone to the board without loss of time; if the matter is alive, it is handy for imposition.

These tables are made in the most substantial manner, of hard wood, and are strongly and firmly bolted together. The boards are made of hard wood, closed at sides and back, and are rabbeted in front to receive galley when sliding off type.

No. 10. With 40×80-inch Marble Top; has 48 Letter Boards, each 19½×22½ inches inside.

Prices with Hard Marble Stones.

STANDING GALLEYS.

Made to Order.

Buyers may have these made to any dimensions they desire, at prices proportionate to those quoted below for the sizes and styles commonly used.

The space underneath may be utilized in various ways. In place of the case racks, as shown in the cuts, galley shelves and racks or letter boards can be put in. In ordering Standing Galleys, or in sending for estimates of cost, it is necessary to be *explicit* as to measurements and other requirements.

The regular width of single columns is three inches; of double columns, six inches; but these may be varied. The column strips are made of the same material as ordered for the top.

| No. | Length Over All. | Material Used on Top. | What the Racks Hold. | 5 Single Columns. Top 20 ins. wide. | 6 Single Columns. Top 23 1/2 ins. wide. | 7 Single Columns. | Double Stand (racks back to back), with racks for 12 cases | 16 00 |

Made for full-size, three-quarter or Rooker cases at the same prices.

WROUGHT IRON HORIZONTAL STANDING GALLEY.

With All-Brass Top.

The Wrought Iron Standing Galleys, with columns running horizontally (see cut), have iron racks and all-brass tops. The brass strips screwed on top are L-shaped, making the partitions only a little wider than column width, but leaving enough room for the fingers to lift the type, thus reducing the width of the top, making it more convenient to reach the upper rows. The columns are made to any desired length and width.

The cut on this page is an illustration of the No. 6 size, which is 12 feet long, with iron racks for 32 full-size cases.

| No. | Length of Rack. | What the Racks Hold. | 5 Single Columns. | 6 Single Columns. | 7 Single Columns. | 8 Single Columns. | 9 Single Columns. | 10 Single Columns. |

WROUGHT IRON LONGITUDINAL STANDING GALLEY.

With All-Brass Top.

Made entirely of brass and wrought iron. The top is covered with sheet brass, and screwed on the hard-wood top from underneath.

Standing galleys with columns running longitudinally are designed for dead matter, and are almost indispensable. Uniform distribution is guaranteed, as the compositor is compelled to take the type from the top, and gets it into the cases regularly; consequently the type gets an even wear. The front is provided with a channel or gutter for the water used in wetting the type to run off into a receptacle. Any size made to order.

Wrought Iron Standing Galley, with All-Brass Top. This illustrates one 7 feet long and 26 inches wide.

Price, per single column, 26 inches deep, in banks not less than 5 feet long \$3 50

MOVABLE DRYING RACKS.

The frames of both these racks are of hard wood, bolted together, and mounted on strong casters, so that they can be easily moved when loaded. The shelves of the Chicago Rack are framed all around with hard wood, while those of the New York Rack are framed on ends only.

No. 1 New York Drying Rack.

No. 6 Chicago Drying Rack.

NEW YORK DRYING RACKS.

- | | |
|---|---|
| No. 1. 20 shelves, each 24×36 in. . \$19 00 | No. 3. 20 shelves, each 28×42 in. . \$23 00 |
| No. 2. 30 shelves, each 24×36 in. . 23 00 | No. 4. 30 shelves, each 28×42 in. . 32 00 |

The No. 1 rack (the cheapest) gives a drying area of one hundred and twenty square feet, while actually using only six square feet of your costly floor space.

CHICAGO DRYING RACKS.

- | | |
|---|--|
| No. 5. 12 shelves, each 2×2 feet . . \$19 00 | No. 6. 10 shelves, each 2×3 feet . . \$22 00 |
| No. 7. 10 shelves, each 2½×4 feet . . \$26 00 | |

This rack is the most substantial movable drying rack made. Although it has fewer shelves than a New York, the extra space between the shelves is a distinct advantage, as on small jobs the sheets can be handled without moving the shelf on which they are placed. When not in use the shelves may be put out of the way, as illustrated in cut.

Figure 2. End View of Interlocking Device.

BEST RACKS FOR LARGE EDITIONS.

The Kærner Drying Racks, described on opposite page, have saved large firms thousands of dollars per year by enabling them to utilize their floor space to the utmost extent, making slip-sheeting unnecessary on very many jobs and preventing wastage by handling sheets. The interlocking device and method of inserting the slats into the sides is very plainly illustrated in Figure 2. No large establishment can afford to use wall-racks now that these effective racks, used in connection with trucks, will save their cost every month in the year.

KÖERNER'S PATENT INTERLOCKING DRYING RACKS.

(United States Patent, No. 392,735; Canadian Patent, No. 28,739.)

Fig. 2. Interlocking Racks Stacked with Paper, straight and rigid.
(See illustration of Interlocking Device on preceding page.)

These racks are for establishments which work on long runs, for color work, and for lithographers. They are used on *Puck* and *Truth*, and the American Lithographing Company has over 25,000 of them in its various establishments in New York City alone.

With these racks sheets are taken direct from the fly of the press, and may be stacked ceiling-high in a perfectly straight and rigid pile, which cannot be knocked over by accident, and with no more weight on the bottom than on the top sheets. This pile is a most effective drying room, occupying only the floor space of one rack, and from the time the sheets are fed into the machine until ready for shipment they need not be handled. The interlocking device, which makes the pile straight and rigid, is shown in Figure 2. Each rack is firmly locked on its neighbor, but each slides with ease on the rack immediately below it. They save handling, all the time of that operation, and the consequent waste of paper through offset, smearing, finger-marks and tearing. In many cases these racks save expensive slip-sheeting. They circumvent electricity by receiving the sheet direct from the fly. They insure evenness of temperature, and thereby assist in getting a perfect register on lithographic work. They save seventy-five per cent. of floor space over any other method of drying sheets, and from one to two per cent. of paper, and a vast amount of time. A further saving of time may be effected by placing the racks as they come from the fly-board on a printer's truck, made to take these racks (see "Printers Truck"). A pile of racks can be moved quicker, safer and easier on the truck than a single armful can be moved by hand. The racks have hard-wood sides with wide soft-wood slats, and are very strongly put together.

Fig. 1. Köerner's Racks on Printer's Truck.

NET PRICES.—Special Quotations Made on Car-load Lots.

These racks are made to order, and sizes will be varied to suit purchasers, at prices approximate to those quoted here :

Other sizes made to order at proportionate prices. Special quotations given on large orders.

**END-WOOD
CUTTING
BOARDS.**

Made of end-wood, kiln-dried maple, two inches thick, any size desired. Each piece is grooved on all sides, and spliced and glued to the adjoining pieces, the result being the most durable and perfect cutting board which can be made.

Per square inch, face measure, for plain end-wood boards, without iron rods . . \$0 01½
Per square inch, face measure, for reinforced boards, with iron rods and binding strips 0 02

DIAGONAL GRAIN CUTTING BOARDS.

Made of kiln-dried maple. The diagonal grain blocks are the best procurable for this purpose.

8×12 Board, diagonal grain, per pair \$1 75
8×12 Board, straight grain, per pair 1 20
Larger sizes, straight grain, per square foot . . 0 90
Larger sizes, diagonal grain, per square foot . 1 25

CUTTING STRIPS.

For Hamilton's Patent Cutting Stick, described below.

| | |
|---|--------|
| Under 38 inches, per dozen, net | \$0 25 |
| 38 inches and not exceeding 54 inches, per dozen, net | 0 40 |
| 55 inches and longer, per dozen, net | 0 50 |

HAMILTON PATENT CUTTING STICK

Consists of a main body piece (A), made to fit the groove of your paper cutter. The body piece has a groove or recess in it, which holds a small strip (B) one-quarter of an inch square. This removable strip is the cutting surface, and is held in place by a steel clamp (C), which is drawn up by the bolts (D). The cutting strips, being square, can be used on four sides, thus giving the same amount of service as the large-size sticks heretofore used.

SEE THAT B?

- A** is the body piece made to fit groove in cutter.
- B** is the cutting strip on which knife strikes. It is one-fourth inch square, and is just as effective as if it was one and one-quarter inch square, also cheaper, and always fits.
- C** is the steel clamp which holds the cutting strip and prevents warping.
- D** is the screw which grips the clamp to the body piece.

ADVANTAGES.

1. The steel strip or clamp (C), running the extreme length of the main body piece, and firmly screwed thereto, effectively prevents springing and warping, which cannot be prevented on ordinary cutting sticks.
2. There is no wear on the body piece, and as it is fitted exactly to the groove of your cutter your troubles from ill-fitting sticks (necessitating packing, etc.) cease.
3. The cutting strips are all made to a uniform standard and are interchangeable, and thus there is an absolute certainty of them fitting.

HOW TO ORDER.

1. Give size square the main body piece is to be. Be particular on this point, and see that groove in cutter is accurately measured. 2. Give length of stick. 3. State how far from *front* edge of stick the knife strikes. 4. State whether knife cuts from right to left or left to right. In ordering cutting strips give the exact length required. All strips are cut to a standard uniform gauge, and are sure to fit.

Prices are net.

Larger pieces squared up, any size desired, at 1 cent per square inch.

LABOR-SAVING TINT BLOCKS.

These consist of strips of engravers' maple, with polished face, cut to even Picas and Nonpareils in width. A font consists of two pieces each 1, 1½, 2, 2½, 3, 3½, 4, 5, 6 and 8 ems Pica wide, all eight inches long. All the printer has to do to make a tint is to set his panel to even Picas, select a tint strip of same width, and cut it the desired length.

Price, per font, net \$1 00

MAPLE BLOCKS.

The following are standard sizes, and are kept in stock at factory. Other sizes made to order for 1½ cents per square inch. Minimum charge, 25 cents. Prices are net.

| | | | |
|----------------------------|--------|--------------------------|--------|
| 10 × 10 inches | \$1 00 | 15 × 15 inches | \$2 25 |

HAMILTON NEWSPAPER FILE.

Made of cherry, finished in oil, with brass fastenings and polished steel thumb-screws. The method of opening and closing this file is novel and simple. The clasp end of file has a flat-headed thumb-screw (see cut), which is passed through a slot, and by giving the screw a quarter turn the file is securely locked. When the head is turned parallel with the file it opens instantly.

Price, each \$1 25

Fastening, closed.

THE "WELLS" LONG WOOD QUOINS.

These new quoins with their long bearing surface will increase the use of wooden quoins to a still greater extent. About the only advantage the metal quoin has over a wooden one is the long bearing. In using these quoins a perfect lock-up is secured, for the quoins are so long that a great pressure is secured without severe driving.

There is only one quoin, and any two quoins make a pair. They are beveled on one side only. No time is lost in looking for rights and lefts, and this is the secret of their success.

Straight furniture can be used and no side sticks are required. Every practical printer will appreciate this great advantage.

These quoins are improved by a top notch, which greatly assists in unlocking the forms. They are made in four sizes, all working in pairs with straight furniture, or they can be used singly with side sticks. Printers will recognize the superior advantages of this improved wooden quoin. They are put up in neat paper boxes, properly labeled, each box holding 100 quoins.

PRINTERS' MACHINERY.

CHANDLER & PRICE GORDON PRESS.

A most popular press, and over 10,000 are in use. They are built to withstand both use and abuse. Side arms and shaft are made of forged steel, without seam or weld. Cam rollers are made of hardened tool steel. Impression throw-off is positive and easy to operate. The grippers are depressible, and cannot get under the rollers. Chase clamp is safe and instantaneous.

For prices of extra chases, see page 1085.

Chandler & Price Fountain.

The Buckeye Fountain.

GALLY UNIVERSAL PRESS.

The Gally Universal Press is made in three styles, which are described on the following pages.

Excels all other types of platen presses because: (1) The bed and frame are cast in one piece, securing rigidity and keeping all shafts in line in spite of irregularities in floor or foundation. (2) The platen moves up squarely against the type form, giving a perfectly square impression. (3) The platen has nine supports, and is extra heavy, and is the only platen capable of sustaining the powerful impression necessary to secure the best results on large forms of cuts. (4) The impression can be thrown off instantly, the throw-off being controlled by a bar directly behind the platen. (5) The impression can be changed instantly all over the platen, varying from the imperceptible to an eighth of an inch. (6) The platen opens out widely, making it easy to feed paper into it. (7) The ink fountain is as efficient as the fountains on the highest grade cylinder presses. It is the most perfect fountain for a platen press ever made. (8) The operations of ink distribution and "inking" the form are distinct, and each performed by a separate set of rollers. In addition to the fountain ductor roller, there are four ink distributors (two of composition, two of iron) which supply two inking cylinders, from which the three form rollers receive a fresh, distributed supply of ink at each impression. On all other types of presses the form rollers have to distribute the crude ink as it leaves the fountain. (9) The form rollers can be held against the inking cylinders for distribution, while getting up color, and need not touch the type form. (10) The ink fountain can be divided by partitions for printing two or more colors at one time. (11) The weight and strength are greater than in any other platen press, as it is designed to do work that cannot be safely attempted on any other type of press.

The Gally Universal is designed for use by the best class of printers. In the hands of competent pressmen the press is the most durable, and will do first-class work in perfect register longer than any other press. We can refer purchasers to presses which have been in constant use for twenty years, doing perfect work to-day, and bidding fair to give the best results for years to come.

**PRICES OF GALLY UNIVERSAL PRESSES.
F. O. B. FACTORY.**

The following parts are included with each press: Ink fountain, power fixtures,* combination belt shifter and brake, three chases, one roller mould (for which two chases will be substituted, if preferred), six form roller stocks, four distributor roller stocks, two ductor roller stocks, twelve roller wheels (six large and six small), two iron lateral distributors, two feed tables, one small and one large wrench, one socket wrench, one chase latch wrench, and treadle fixtures. If treadle fixtures are not wanted, two chases will be sent instead.

If desired, we will cover one set of roller stocks with composition in lieu of roller mould.

* Power fixtures include fixtures on the press only.

BOXING FOR EXPORT: Quarto Medium, \$7 00; Half Medium, \$10 00; Half Super-Royal, \$15 00, net.

DESCRIPTION OF THE THREE STYLES.

STYLE No. 1.

This is the regular press, adapted for general commercial letterpress work.

| | | |
|-------------------|-------------------------------------|----------|
| Quarto Medium, | 10×15 inches inside chase | \$350 00 |
| Half Medium, | 13×19 inches inside chase | 450 00 |
| Half Super-Royal, | 14×22 inches inside chase | 515 00 |

STYLE No. 2.

This style differs from Style No. 1 in that it is more heavily built and has a steel section in large gear wheel, and is specially adapted to the finest of work.

| | | |
|-------------------|-------------------------------------|----------|
| Half Medium, | 13×19 inches inside chase | \$500 00 |
| Half Super-Royal, | 14×22 inches inside chase | 575 00 |

STYLE No. 3.

This style differs from Style No. 2 in that it is more powerful and more heavily built, and is adapted by different combinations of special devices to different kinds of special work. It has heavier fly-wheel with outside floor support and extra wide driving pulleys for wide driving-belt. This press will do successfully all kinds of regular printing-office embossing, and in its different combinations is adapted to hot or cold work.

STYLE No. 3, COMBINATION A.

For letterpress printing of the highest grade, cold embossing, stamping, and all work that can be executed on a platen set to print at the height of type.

| | | |
|-------------------|-------------------------------------|----------|
| Quarto Medium, | 10×15 inches inside chase | \$450 00 |
| Half Medium, | 13×19 inches inside chase | 600 00 |
| Half Super-Royal, | 14×22 inches inside chase | 650 00 |

STYLE No. 3, COMBINATION B.

For letterpress printing and (in addition to all work that can be done on Combination A) book-cover inlaying, and cutting and creasing. This combination is fitted with a movable 1/8-inch steel platen plate and a movable 1/8-inch brass platen plate, the latter for use in cutting and creasing.

| | | |
|-------------------|-------------------------------------|----------|
| Quarto Medium, | 10×15 inches inside chase | \$470 00 |
| Half Medium, | 13×19 inches inside chase | 626 00 |
| Half Super-Royal, | 14×22 inches inside chase | 676 00 |

STYLE No. 3, COMBINATION C.

For letterpress printing and hot embossing (in addition to all work that can be done on Combinations A and B). This combination is fitted with a steam blank and pipe connections 3/8 inch thick, movable 1/8-inch steel plate on steam blank, a movable 1/8-inch steel platen plate, a movable 1/8-inch brass platen plate, one cast-iron .475-inch platen plate, and one cast-iron .595-inch platen plate with tympan clamps attached. This combination is fitted for use with dies 1/4 inch thick.

| | | |
|-------------------|-------------------------------------|----------|
| Half Medium, | 13×19 inches inside chase | \$738 00 |
| Half Super-Royal, | 14×22 inches inside chase | 800 00 |

STYLE No. 3, COMBINATION D.

For letterpress printing, printing on wood (not exceeding one inch in thickness) and cold embossing. This combination is fitted with a 7/8-inch movable platen blank and a 1/8-inch movable steel platen plate. Cutting and creasing can be done on this combination by adding a 1/8-inch brass platen plate.

| | | |
|-------------------|-------------------------------------|----------|
| Quarto Medium, | 10×15 inches inside chase | \$474 00 |
| Half Medium, | 13×19 inches inside chase | 629 00 |
| Half Super-Royal, | 14×22 inches inside chase | 679 00 |

PRICES OF GALLY UNIVERSAL PRESSES—Continued.

STYLE No. 3, COMBINATION E.

For letterpress printing, printing on wood (not exceeding one inch in thickness) and hot embossing, and all work that can be done on Combinations A, B and C. This combination is fitted with steam blank and pipe connections, 7/8-inch movable cast-iron platen blank, one .405-inch movable cast-iron platen blank, 1/8-inch steel platen plate, a movable steel plate on steam blank and a movable 1/8-inch brass platen plate.

| | | |
|-------------------|-------------------------------------|----------|
| Half Medium, | 13×19 inches inside chase | \$738 00 |
| Half Super-Royal, | 14×22 inches inside chase | 800 00 |

SPECIAL ADAPTATIONS.

Gauges and special appliances furnished for all No. 3 Presses to order at an extra cost. The No. 3 Presses will be built to order, specially adapted to any work for which they can be used, at a reasonable extra cost to the customer.

SPECIAL FEATURES OF THE GALLY UNIVERSAL PRESS.

TWO TYPES OF PLATEN PRESSES.

The Universal Press, when invented and patented in 1869-70, differed radically both in its fundamental principles and labor-saving appliances from any other platen press in use at that time. Since then platen presses everywhere are divided into two recognized types or classes, each taking the name of the original inventor: the "Gordon" type, with its hinged or "clam-shell" movement of bed and platen, as imitated with slight variations under a great variety of names, all distributing ink by means of a disc, and the "Gally Universal" type, with its fixed bed, sliding platen, square impact of impression on the form, solid frame and cylindrical ink distribution.

IMPRESSION.

The ideal impression is given by a Washington Hand Press, and the impression given by the Gally Universal is similar, and is perfect in practice and in theory. No other type of platen press can give a perfectly square impression.

The platen is massive, and is secured to the platen bridge by four controlling screws which pass through the bridge, and is supported at the corners and in the center by five adjustable screw supports, giving nine supports in all. Thus the utmost strength and an unyielding impression is obtained.

The platen movement in relation to the bed is illustrated in Figs. 2 and 3 (sectional drawings from the inside).

Fig. 2 shows the platen open at the feeding position, supported by the rockers (R) on the slideways (s). The movement is controlled by the draw-bars, which connect with a steel shaft (A) passing through the platen bridge. As the draw-bars pull the platen toward the bed it rocks forward until the flattened toes (e) of the rockers rest on the slideways (s), as shown in Fig. 3.

Fig. 2.

Fig. 3.

The platen is now half an inch from the type form, and exactly parallel to it, and the locking lugs (*N* and *H*) have engaged the slideways at top and bottom, preventing the platen from tipping. Thus secured, the platen slides squarely to the type form, taking a direct face impression. The platen then slides back and rocks to the feeding position again. The curve of the rockers (*R*) is struck from a point at the center of gravity of the whole moving piece, so that the movement is accomplished with a trifling expenditure of effort.

DISTRIBUTION OF INK.

The superiority of the Gally Universal Press is in no point more apparent than in the distribution and application of ink to the form. In Fig. 10 is shown the Gally Universal system of ink distribution. *C* is the main distributing cylinder, and *S* is the secondary distributing cylinder. The composition distributing rollers (*e* and *e'*) revolve on the distributing cylinders, and on top of the distributors are two metallic rollers (*v* and *v'*) with a steady lateral movement in opposite directions, constantly crossing and recrossing the lines of distribution. The ink is supplied from the fountain (*F*, Fig. 10) to the distributing cylinder (*C*), once at each impression, by the ductor roller (*H*), in an evenly spread line, immediately after the form rollers have left the cylinders to ink the form; and before the rollers have completed the rolling of the form and returned to the cylinders the applied ink is thoroughly distributed by the distributors (*e e'*), so that no undistributed ink can ever reach the form rollers or be applied to the form.

Fig. 10.

The distribution of ink is constant while the press is in motion, whether the form rollers (1, 2, 3) are in contact with cylinder or on the form. The cylinders, rollers and lateral distributors, as shown in Fig. 10, are made of different diameters on uneven measurements, so that their lines of contact are not repeated while revolving.

On presses with disc distribution the form rollers must distribute their own ink and convey it to the form, while on the Gally Universal these two functions are performed by two distinct sets of rollers. In the former case the work is necessarily imperfect; in the latter, both processes give perfect results.

INK FOUNTAIN.

The Gally Universal ink fountain is as complete as the ink fountain of any first-class cylinder press. Every part of it is under positive control. The movement of the fountain cylinder (*R*, Fig. 19) is regulated by a ratchet lever. The ink is carried from the cylinder (*R*) to the distributing cylinder *C*, Fig. 10, by a composition ductor roller. In nearly all ink fountains the regulating screws press directly against the steel blade, and in setting for a fine feed have a tendency to bind the fountain cylinder. In the Universal ink fountain (Fig. 19) *A* is a steel blade, *e* is rubber packing, and *a* is a very thin strip of steel against which the screws (*T*) are set. The rubber (*e*) furnishes an elasticity which prevents the blade from binding, while giving a perfect cut off. With this safeguard a press boy may be trusted to regulate the fountain. The fountain may be removed easily from the press to be cleansed, and is made interchangeable so that an extra fountain for colors may be put on in a few moments.

Fig. 19.

ADJUSTMENT OF IMPRESSION AND THROW-OFF.

The Gally Universal Press was the first to have a quick, easy method of adjusting the impression, and the Gally invention is still unexcelled. The theory of modern fine printing calls for a minimum of tympan packing, and to get this a fine adjustment of the platen impression is necessary. The labor as well as the inaccuracies of platen adjustment by means of the set screws make that method impracticable. Mr. Gally's invention is practically instantaneous, and allows of very fine adjustment or a total throw-off of the impression by the same device, which is located immediately behind the platen, in front of the pressman. The impression is regulated equally all over the surface of the platen by means of the adjusterslides (*L*), which can be moved up or down, increasing or decreasing impression from a tissue paper's thickness to 1/8 of an inch. These slides (*D*) are notched, and the latch, which is the lower end of the throw-off handle (*H*), engages in this notch. When it is desired to throw off impression, the handle (*H*) is pulled, the latch is disengaged, and the adjuster bar (*BB*) drops down, carrying the platen back and preventing it from taking an impression.

View of Impression Adjuster and Throw-off Bar, showing Notched Impression Adjuster Slides.

When it is desired to throw off impression, the handle (*H*) is pulled, the latch is disengaged, and the adjuster bar (*BB*) drops down, carrying the platen back and preventing it from taking an impression.

GALLY UNIVERSAL EMBOSSING PRESS.

These are the largest embossing presses made, and combine strength, power, speed and facility for handling work easily in a degree unequalled by any other press. They are designed for extra heavy hot or cold process embossing, and book-cover stamping ("smashing"). The mechanical principles employed to give impression, power, and to throw-off impression, are the same as described on pages 977 and 978. Nothing better demonstrates the correctness of the mechanical principles on which Gally Universal Presses are built than their applicability to all degrees of power and strain. Every other type of platen press has its limitations—a point where it gets unwieldy and inefficient.

PRICES OF PRESS ONLY.

| | | |
|--------|--|----------|
| No. 1. | 21¼ × 22-inch bed-plate, 18 × 20 -inch chase | \$800 00 |
| No. 2. | 24 × 26-inch bed-plate, 22¾ × 24¾-inch chase | 900 00 |

PRICES OF EXTRA ATTACHMENTS.

| | |
|--|----------|
| Steam blank, complete, with pipe connections, for No. 1 Embosser, with steel die plate | \$105 00 |
| Steam blank, complete, with pipe connections, for No. 2 Embosser, with steel die plate | 118 00 |
| Steel platen plate for No. 1 Embosser | 19 50 |
| Steel platen plate for No. 2 Embosser | 26 00 |
| Cast-iron platen blank for No. 1 Embosser | 19 50 |
| Cast-iron platen blank for No. 2 Embosser | 26 00 |
| Gas blank | 200 00 |

Each press is complete with power fixtures on press.

Each press is furnished with three chases (or one cast-iron bed blank in lieu of chases, at option of purchaser), two feed tables, one wrench, one belt-shifter and one brake.

Gross weight, boxed, of embossing presses are: No. 1, 3400 pounds; No. 2, 4300 pounds.

Boxing for export: No. 1, \$10 00; No. 2, \$15 00—net.

Prices are f. o. b. factory.

GALLY UNIVERSAL STAMPING PRESS.

This is a very powerful press, built especially for stamping book covers, making signs and photo-mounts. The only fast-running press made that is sufficiently powerful to do this kind of work satisfactorily. Speed at least 1800 impressions per hour.

| | |
|---------------------------------------|-----------|
| Size of bed, 24 × 26 inches | \$1600 00 |
|---------------------------------------|-----------|

FOR HOT WORK.

| | |
|-----------------------|----------|
| Steam blank | \$150 00 |
| Gas blank | 200 00 |

GALLY UNIVERSAL PAPER-BOX CUTTING AND CREASING PRESS.

(See "Paper Box Making" at foot of this page.)

This is the only Cutting and Creasing Press on which the cutting form can be placed "out of center" without injury to the cutting rule or detriment to the work. Mr. Gally's latest patented improvement on these presses holds the platen to perfect register on an unbalanced form. This is a very important matter, as is fully understood by all those engaged in the manufacture of folding paper boxes and similar articles.

PRICES.

With Brass Platen Plate and Power Fixtures on Press.

| | | |
|----------|--|----------|
| No. 1. | 22 × 31 ¾-inch bed-plate, 20 × 30 -inch chase | \$700 00 |
| No. 1 ½. | 24 ¼ × 31 ¾-inch bed-plate, 22 ½ × 30 ¼-inch chase | 800 00 |
| No. 2. | 25 × 33 -inch bed-plate, 23 ¼ × 31 -inch chase | 900 00 |
| No. 4. | 27 ½ × 41 ½-inch bed-plate, 27 × 40 -inch chase | 1200 00 |

Prices are f. o. b. factory.

Each press is furnished with a ⅛-inch brass platen plate, three chases, two feed tables, one wrench, one belt-shifter and one brake.

Boxing for export: Nos. 1 and 1 ½, \$15 00; Nos. 2, and 4, \$20 00, net.

See page 992 for Extra Heavy Overhead Fixtures for Embossing and Cutting and Creasing Presses.

FOLDING PAPER BOX MAKING.

The process of making folding paper boxes is simple. The stock used is manilla board, made specially for the purpose. A cutting and creasing press is the same as an ordinary printing press, except that it is larger, has to be stronger, and does not require an inking apparatus. The shape of a box having been decided on, a form is set up with steel cutting and brass creasing rules—the former to cut out waste margins and to make slits, and the latter to crease or score the lines on which the stock in the box must bend when set up for use. It is usual to cut and crease as many boxes at one time as can be cut out from a full-sized sheet. The box leaves the press flat. It is then folded once and glued on one edge, and delivered flat. Any printing required is done before cutting and creasing. Any good compositor will understand the process after reading above explanation and examining a folded paper box. The glueing is done by a machine of moderate cost.

THE "PEERLESS" PRESS.

Of well-established reputation, smooth running, noiseless, easy to make-ready on, easy to feed, easy to run by treadle, with an effective throw-off, well built, exceptionally strong, and with a powerful toggle movement. The throw-off is positive and easy, and convenient to handle. The platen is sustained in the center by the toggle, and is strongest where platens are generally weakest, enabling the Peerless to do embossing and paper-box cutting and creasing, which tax a press very severely. It is a fast press.

ARMY PRESS.

This is the lowest-priced press on which a newspaper of small circulation can be printed. The cylinder is stationary, but adjustable for impression by regulating screws at each end. The bed and form pass under the cylinder, and an impression is taken at each forward and backward movement.

Each press is furnished with two chases; patent quoins and key, side and foot sticks, roller frame and cast roller, oiler and wrench.

| | |
|---|----------|

THE CRANSTON PRESSES.

These presses have always been built on high-grade lines. The motto of the maker, painted conspicuously in the factory, "First learn to do a thing well, then learn to do it quickly," has been consistently carried out, and it can safely be affirmed that the Cranston presses are unexcelled in fine workmanship, true mechanical principles, and superior materials, all which result in durability, smoothness, and general satisfaction. The new series of 1897 have numerous up-to-date improvements, and some sizes have been changed for the better convenience of printers. The numerous users of Cranston presses will be more than pleased with the new series.

THE CRANSTON NEWSPAPER PRESS.

**Two-Roller,
With Rack and Pinion Distribution.**

Built of the best material; furnished at a moderate price; put to practical tests;—it has proved by constant use to be an economical press to buy. The runners on both track and table are steel; the shafts, rolls, studs, shoes and wearing parts are also steel. All gears and racks are cut from the solid. The press is provided with air springs, tapeless delivery, noiseless gripper motion, continuous fly cam, adjustable feed guides. The fountain is placed high on the stand, thus giving easy access to bed of press. The form rolls are made of wrought iron pipe, and are of large size, easily placed in position and adjusted. There is a brake, a fountain cover, reel rod for blanket and tympan, and a guard for distributing rack.

| Size. | Inside Bearers. | Matter Covered. | Length of Base. | Width of Base. | Weight Boxed. | Price. |

An additional charge for table distribution.

Each press is furnished with overhead fixtures complete (except when furnished with hand power only), blanket, wrenches and one set stocks, cast ready for use, also one extra set stocks and iron steps.

THE CRANSTON IMPROVED NEWSPAPER PRESS.

Two-Roller, with Rack and Pinion Distribution.

The Improved Newspaper Press has been materially changed in construction and general appearance. All racks and gears have wide faces, and are cut from the solid. The press has air springs; tapeless delivery—wheels adjustable to any size sheet; patented device for controlling motion of sliders; patent stop and reversing motion; noiseless gripper motion; continuous fly cam; feed guides that are capable of the finest adjustment; large size form rollers; long register rack and segment; deep fountain; cover for fountain; convenient arrangement for adjusting fountain roll; cylinder distribution.

Every convenient feature that the price at which it is offered will permit is put on this press, effecting a saving of time and labor for which the Cranston presses are well and favorably known.

Each press is furnished with overhead fixtures complete, blanket or hard packing, wrenches, iron steps, two complete sets stocks—one set cast with composition ready for immediate use.

THE CRANSTON IMPROVED BOOK AND NEWSPAPER PRESS.

Two-Roller, with Rack and Pinion Distribution.

The Improved Book and Newspaper Press has all of the features which made the Improved Newspaper Press the best newspaper press in the market, and in addition has a separate heavy cast-iron base plate which gives additional strength and solidity to the machine, and makes it possible to run it at a higher rate of speed without jar or injury to the press. It is especially designed for fine book, newspaper and general job printing. For accuracy of register and convenience of making ready it is unexcelled. The workmanship and wearing qualities are unsurpassed.

| Size. | Inside Bearers. | Matter Covered. | Length of Base. | Width of Base. | Weight Boxed. | Price. |

Each press is furnished with overhead fixtures complete, blanket or hard packing, wrenches, iron steps, two complete sets stocks—one set cast with composition ready for immediate use.

THE CRANSTON PATENT IMPROVED TWO-ROLLER PRINTING PRESS.

For Fine Book, Commercial and Newspaper Printing.

This press is carefully made in every detail. The stock and finish are unexcelled. The tracks are wide, and provided with steel rolls and runners. The wearing parts—shafts, knuckles, shoes, studs—are of steel. The gears and racks are cut from the solid, and have wide faces. The press has air springs; patent silent slider motion, which insures uniform travel of the sliders with the table; patent stop and reversing motion; improved feed guides; patent adjustable side-guide leaf on feed table, which can be set for the greatest precision of register.

The fly is operated by a silent motion, the cam having a continuous surface.

The fountain basin is deep, and will carry a large supply of ink. It is placed high on the stands, and easy access is thus given to the bed of the press.

The Cranston combines the essential features: great strength, unyielding impression, fine distribution, exact register, with convenience in adjustments and make-ready. It is operated with light power, and cannot but give satisfaction both in quantity and quality of work produced.

*Commercial Series.

Each press is furnished with overhead fixtures complete, blanket and hard packing, wrenches, iron steps, and two complete sets stocks—one set cast with composition and ready for immediate use.

THE CRANSTON-VICTOR COMMERCIAL PRESS.

Two-Revolution, with Four Rollers.

Various methods of engraving having been developed, and their utility practically demonstrated, the demand has been created for a press that will bring out delicate lines of half-tone, process, etched, photo-engraved plates, and work of this description, giving that clear and distinct impression without which the best results are not attainable from such plates. The new Victor Two-Revolution Four-Roller Commercial Press is especially designed for this class of work. Possessing as it does the patented features of our larger sizes, it is, like them, solidly constructed, giving an *unyielding impression* and an *ample inking surface*. Its size is convenient and sufficiently large to meet all demands for work of this class, while the speed provides for rapid production. Many features are embodied in this press for convenience in make-ready, etc. The distribution is a complete system, by means of which every particle of inking surface is *evenly* and *thoroughly* covered. The movements are easily adjusted and positive in their action. The cam has a continuous surface, and the sheets are laid lightly on the table without smut or off-set. Adjustable fly-fingers. The height of the press is such that it can be fed from the floor, and it is built with special reference to convenience in working about it. Its register is *faultless*. This press is the result of careful study, and embodies suggestions from practical printers regarding the requirements for printing this special work. The very satisfactory results obtained from those in use prove conclusively that the Victor will meet all requirements made upon it.

The speed is equal to all reasonable demands for fine printing.

| Size. | Inside Bearers. | Matter Covered. | Length of Base. | Width of Base. | Weight Boxed. | Price. |
|------------|-----------------|-----------------|-----------------|----------------|---------------|--------|
| No. 2A . . | 26×38 in. . | 21½×34 in. . | 6 ft. 5¾ in. . | 4 ft. 5¾ in. . | 7500 lbs. . . | ————— |

Each press is furnished with overhead fixtures complete, blanket or hard packing, wrenches, two complete sets stocks—one set cast ready for immediate use.

A WISE PURCHASE.

The No. 2A Cranston-Victor Press is a money-maker. Fine job printing, from small circulars to any size within its capacity, can be done at high speed and with the finest results. In a printing establishment doing general work of all grades this press will prove exceedingly useful and profitable. Its construction and features are such that making ready can be done quickly. It takes in a great range of work which cannot be so profitably printed on a larger press.

THE CRANSTON-VICTOR TWO-REVOLUTION PRESS.

Two-Roller.

The track has wide runners, laid with steel. The table has three supports—two in the track, one on a center bearing placed on the girt—thus giving three continuous bearings through the line of impression without interference of a third track. Cylinder and lifting shafts, rolls, shoes, knuckles, are of steel. The smaller parts are built with a view to the greatest possible wear.

The mechanism for lifting the cylinder is simple, effective, and controlled by cam movements. No strain and no wear. Steel bearings.

The press has air springs; patent device for controlling motion of sliders; all gears and racks have wide faces, and are cut from the solid; distribution unailing; large-size form rollers, with bearings convenient and secure, easily placed in position and as easily removed; fly cam with continuous surface; deep fountain basin; arrangement for adjusting fountain roll; cover for fountain; adjustable bearers; hard-wood feed table; patent improved feed

guides and side-guide leaf on feed table; patent stop and reversing motion; automatic leaf-lifting device for preventing the tongues or guides from catching and tearing the tympan while reversing press; arrangement for throwing reel wheels on or off while making ready. The movements are all conveniently and easily adjusted, and positive in their action.

The speed of this press is all that can be obtained from any press of corresponding size and style.

| Size. | Inside Bearers. | Matter Covered. | Length of Base. | Width of Base. | Weight, Boxed. | Price. |
|------------------|------------------------|------------------------|----------------------------|-----------------------------|---------------------|--------|
| No. 2A | 26×38 inches | 22×34 inches | 6 feet 5¼ inches | 4 feet 5¼ inches | 7,500 lbs. | _____ |
| No. 4 | 34×50 inches | 30×46 inches | 8 feet 6 inches | 5 feet 7½ inches | 14,500 lbs. | _____ |
| No. 5½ | 38×54 inches | 34×50 inches | 9 feet 6½ inches | 5 feet 11½ inches | 16,000 lbs. | _____ |

Each press is furnished with overhead fixtures complete, blanket or hard packing, wrenches, iron steps, two complete sets stocks—one set cast with composition ready for immediate use.

The entire frame of the press is solid and compact. The tracks on both the table and runners are wide, laid with steel, and the rolls traversing on them are of the same material accurately gauged to size. The lifting mechanism for the cylinder is a direct cam motion, plain in construction, smooth running, operated with light power, requiring no weight. The shafts, cams, knuckles, studs, rolls, shoes, and all wearing parts, are of steel, and built with view of greatest possible resistance to wear. The shoes are securely fastened and doweled to the rack hangers. The cylinder has heavy flanges. The impression surface is strongly braced and supported. The press has hard-wood feed table; fly cam with continuous surface. Ample provision is made securing distribution and register. This is a press that can be easily handled, with movements plain and direct in action, adjustments readily and conveniently made, resulting in the greatest economy of time and labor.

This press is provided with a trip, which may be thrown on or off at any point of the stroke of bed. The reciprocating motion of the table is controlled by air springs which are simple and effective, having a plain valve which is in itself direct acting without any complicated attachments. The sheets are delivered to the fly by the tape-roller, which is as practicable on all our presses, the uniformity in travel is thereby insured. The patent stop and reversing motion enables the feeder to stop the press instantly at any desired point, and run it backward, thereby effecting economy of time and labor, as he has absolute control of the press without leaving his position. The automatic leaf-lifting device prevents the tongues or guides from catching or tearing the tympan while reversing press.

less delivery. The down-delivery attachment gives a positive and unfailling delivery of sheets on the fly table. As far as practicable on all our presses, the adjustments are made with thumb nuts. The sliders are attached to the table by our patent slider motion, and uniformity in travel is thereby insured. The patent feed guides and adjustable side-guide leaf on feed table can be adjusted with the utmost precision without leaving the feeder's platform. Reel wheels are readily thrown on or off while making ready. The patent stop and reversing motion enables the feeder to stop the press instantly at any desired point, and run it backward, thereby effecting economy of time and labor, as he has absolute control of the press without leaving his position. The automatic leaf-lifting device prevents the tongues or guides from catching or tearing the tympan while reversing press.

COTTRELL TRIUMPH COUNTRY PRESS.

With Patent Air Springs.

Adapted for printing newspapers, pamphlets, posters, circulars, and all classes of commercial printing. Conforms in construction, design, durability and finish to the high reputation of the manufacturers.

The press is supplied with patent air springs, the resistance of which is increased or decreased according to the speed of the press. It is well known that the faster the speed the greater strength of spring is required. The patent air spring covers these requirements. If the press is running at five hundred per hour, the spring can be easily regulated for that speed; and if running at fifteen hundred per hour, the proportionate increase of spring can be obtained, and so up to the highest speed of which this press is capable. The air spring is provided with an automatic throw-off that releases the pressure when the press is stopped, and the pressman can move the bed to and fro without compressing the spring. When the press is started, the spring is applied automatically.

The patent hinged roller-frame permits of the rollers being instantly uncovered for removal or for other purposes without unscrewing the sockets. The rollers can be taken out and put back without changing their set. The well-fountain is used, being easily regulated and cleansed, and it is set high, giving easy access to the form. The distribution is ample—two three-inch rollers covering the full form. The bed has four supports while under impression, thus securing a clear, even impression. The shoes, tracks and rollers are of hard steel. The gearing is accurately cut, which, together with the registering rack and segment, insures perfect register.

The Triumph Press is built with table, rack and cam distribution, or with the rack and cam distribution, as per illustration on this page.

The Triumph Press can be fitted to run by hand power, when so desired. Tapeless delivery furnished, when required, at an extra charge.

Back-Up Movement.
Hinged Roller-Frame.

It has many advantages and improvements, including patent air springs, patent tapeless delivery, back-up movement, hinged roller-frame, and iron steps and feeder's stand, and in its manufacture quality is placed first and cost afterward.

It is a press of excellent design, of the best materials, and of high speed. By manufacturing them in large quantities, and building but two sizes, the price is put within the reach of the printer of moderate means.

It is a fast press—1600 per hour is easily possible on the larger and 2000 on the smaller size.

It has four bearings under the bed for extreme rigidity and strength, and steel tracks and steel rollers. There is a heavy flange on the ends of the cylinder as an added element of strength.

The patent air spring forms an easy cushion for the bed in passing the centers, is under perfect control, and can be readily adjusted for the different speeds. The air spring has a new automatic throw-off, so that in turning over the centers by hand the spring is not compressed.

The patent back-up movement is a great convenience and a labor-saver.

The patent hinged roller-frame permits the form rollers to be instantly uncovered for removal or other purposes without unscrewing the sockets. The rollers can be taken out and put back without changing their set.

The well fountain is used, being easily regulated and cleaned. It is set high, giving easy access to the form.

Furnished with table and rack and cam distribution at an extra charge, or only with rack and cam distribution as illustrated.

Sizes and List Prices, with Rack and Cam Distribution.

| Size of Bed Inside of Bearers. | Size of Form Covered by Two Rollers. | List Price. |
|-----------------------------------|---|----------------|
| No. 3, 26×37 inches | 22×33 inches | \$1500 00 |
| No. 5, 33×47 inches | 28×43 inches | 1800 00 |

Table distribution, \$75 00 extra.

Price includes hard-packing or rubber blanket, wrenches, two sets of composition roller stocks, roller moulds, countershaft, two hangers, two four-speed cone pulleys and driving pulley, boxing and shipping.

COMBINATION PAPER JOGGER.

“The two joggers give perfect satisfaction. Find draft for settlement, and send us twenty more at your earliest convenience, following sizes.

“RAND, McNALLY & Co., Chicago.”

Made with wings, to be instantly removed if desired. No projecting rod on front side to tear clothes. This of itself is worth the price of a jogger. Patent attachable wings for small joggers, by which letter-heads, etc., can be evened up.

| | | |
|--------------------------|-------|---------|
| 24×36 inches, or less | | \$15 00 |
| 36×48 inches, or less | | 18 00 |
| Larger than 36×48 inches | | 20 00 |

OVERHEAD POWER FIXTURES.

Overhead Fixtures consist of countershaft, two self-adjusting hangers with oil cups, two cone pulleys and driving pulley. Send size and speed of driving shaft with your order. Driving pulley of different diameter will be furnished, if necessary, to insure proper speed.

If the cone pulley for line shaft is wanted “split,” add 10 per cent. to prices quoted below.

All sizes and styles of pulleys, hangers, shafting, etc., furnished at bottom prices. (See Condensed Price List on following page.)

OVERHEAD FIXTURES FOR JOB PRESSES.

TRIBUNE NEWSPAPER FOLDER.

All Iron Frame.
Working Parts Steel and Iron.
All Movements Positive.
No Sprocket Chains.
No Lost Motion.

This is a folder of the highest grade of construction and efficiency, without a superior for its purpose on the market, and sold at such moderate net prices as to make so-called "cheap" folders highly expensive in comparison—durability and reliability considered. It has no makeshift devices. It folds on the same principle as the high-grade book machines. The simplest folder made.

Made in one size only, 36×48 inches, which takes in any size sheet, whether folio or quarto, from 22×32 to 36×48 inches.

Paster and trimmer can be furnished at time of purchase or added afterward.

Made with three- and four-fold deliveries. Three-fold work is delivered in a receiving box, while four-fold work is delivered in a packer, as shown in illustration.

In the hands of a competent operator it will fold ordinary sixteen- and thirty-two-page work.

* Weight, about 900 pounds. Power required, about one-tenth of one-horse power. Speed, 3000 folio or quarto sheets per hour.

LIST PRICES.

| | |
|--|-------------|
| For hand feed | \$400 00 |
| Paster and trimmer (no extra charge for this when insetting or covering attachment is ordered) | 25 00 |
| Fixtures for attaching to press, net | 50 00 extra |

TRIBUNE NEWSPAPER FOLDER.

LIST PRICES—Continued.

- Insetting attachment** inserts a two-page or four-page sheet or supplement between the fourth and fifth pages of a publication, folding either ten or twelve pages and pasting and trimming the entire publication.
 Net \$100 00 extra.
- Covering attachment** outsets two pages upon eight pages, making a ten-page publication; or outsets a four-page cover or supplement upon eight pages, making a twelve-page publication. It pastes and trims.
 Net 100 00 extra.

The net price of this thoroughly reliable and durable Folder is very little more than asked for inferior affairs which in the end will prove to be most expensive and least satisfactory. This Folder is made to do perfect work for many years.

UNIQUE IRON-FRAME FOLDER.

Built by the maker of the Bennett Economical Folder, shown on following page, to overcome the objections to wood-frame folders.

For hand-feed or attachable to any back-delivery cylinder press.

- | | |
|---|----------|
| To fold sheet 32×44 inches, three- and four-fold, with paster and trimmer for eight-page work | \$300 00 |
| To fold sheet 36×50 inches, three- and four-fold, with paster and trimmer for eight-page work | 300 00 |
| Folio inserting attachment | 60 00 |
| Quarto inserting attachment | 100 00 |
| Folio and quarto inserting attachment, combined | 125 00 |
| Quarto covering attachment | 100 00 |
| Fifth or post-office fold | 75 00 |
| Hand feed and attachable in one machine | 50 00 |
| Attachments for front-delivery press | 25 00 |

Floor space of 32 × 44-inch folder is 40 × 56 inches; of 36 × 50-inch folder, 46 × 62 inches.

BENNETT ECONOMICAL FOLDER.

Has a strong, wooden frame, with working parts of iron. Delivers at third and fourth folds, and can be changed without stopping machine. Has pasting and trimming attachment for eight (8) page work. Built in hand-feed, or attachable to any cylinder press, front or back delivery. All journals are of tool steel, with journal boxes three diameters long, hung in self-adjusting pivot hangers, making it possible to remove any fold roll, driving or rock shaft in a few moments and replace in line, and there is not a gear on the machine but can be reached conveniently and removed easily. All adjustments are made by screw, each tape tightened independently, and drop of fold blades can be regulated by the "turnbuckle" adjustment to one-hundredth of an inch. There are side guides to insure accuracy in folding, whether a sheet comes from a press or feed-board.

No extra charge for press fixtures in attachable machines, except for front-delivery press.

LIST PRICES.

| | |
|---|----------|
| 32×44 (6-column quarto), or 36×50 (7-column quarto), including paster and trimmer | \$240 00 |
| Folio supplement attachment, with paster | 50 00 |
| Quarto supplement attachment, with paster | 85 00 |
| Folio and quarto supplement attachment, combined | 125 00 |
| Cover attachment for eight pages | 100 00 |
| Fifth or post-office fold | 50 00 |
| Hand-feed and attachable in one machine | 50 00 |
| Attachments for front-delivery press | 25 00 |

THE BENNETT COUNTRY QUARTO FOLDER.

This machine is exactly the same as the Economical Folder, except that, instead of regular packing boxes at the third or fourth fold, it has a packing box at the fourth fold and a drop box at the third fold.

| | |
|--|----------|
| 6 or 7-column quarto, including paster and trimmer | \$200 00 |
|--|----------|

Hand-feed or attachable to press.

GALLEY PROOF PRESSES.

AMERICAN PROOF PRESS.

Built in the most substantial manner, thoroughly braced, with accurate bed and cylinder. The cylinder is much heavier than on the average proof press, and consequently gives a much better impression. The best proof press made.

With Iron Stand.

- No. 1, 10×31 inches inside \$30 00
- No. 2, 16×31 inches inside 42 00

Without Stand.

- No. 1A, 10×31 inches inside . . . \$22 50
- No. 2A, 16×31 inches inside . . . 30 00

Each proof press is furnished with blanket, brayer frame and stock.

American Proof Press.

CHALLENGE PROOF PRESS.

The circumference of the cylinder is the same measurement as the printing surface of the bed, the cylinder revolving once from stop to stop. The No. 1 cylinder weighs 85 lbs.; other cylinders of proportionate weights. The cylinder is covered with finest quality felt blanket, and a brayer is furnished with each press, excepting those without iron stand. Nos. 1 and 2 have shelf for paper underneath the cabinet.

No. 1 Challenge Proof Press.

| Size. | Inches. | Price. |
|---------|-------------------------------|---------|
| No. 0, | 9 × 27, with iron stand . . | \$25 00 |
| No. 1, | 10¼ × 32, with iron stand . . | 30 00 |
| No. 2, | 16½ × 35, with iron stand . . | 40 00 |
| No. 00, | 9 × 27, without iron stand, | 15 00 |
| No. 01, | 10¼ × 32, without iron stand, | 20 00 |
| No. 02, | 16½ × 35, without iron stand, | 30 00 |

ECONOMIC PROOF PRESS.

This is the cheapest proof press made. It has no bed, but consists of a roller and braced side frame.

ECONOMIC

10×34 inches inside, complete with blanket and weight mould \$13 50

A mould is provided for casting weights which can be placed inside the cylinder to increase pressure according to character of the work.

FELT BLANKETS FOR PROOF PRESSES.

See page 1070 for prices of Felt Blankets.

WEB SUCCESS SELF-INKING PROOF PRESS.

This press is self-feeding and self-inking. The 12-inch and wider presses will hold one or two webs of paper and prove two galleys or forms simultaneously. In addition to a great saving of time, there is a saving in paper, as the length of the proof sheet is adjusted automatically to the length of the matter to be proved—if the take is short, the paper used is correspondingly short. The printing cylinder is of iron covered with vulcanized rubber, giving a perfect impression. The impression is adjustable, as on any cylinder press. There are two form rollers, and a ductor roller which conveys the ink from ink fountain to the inking cylinder. These presses are easy to operate, and in the larger printing establishments are economical, one of them doing the work of four ordinary galley proof presses and doing it better. They are in use by the majority of the leading newspapers throughout the world.

PRICE LIST.

| | |
|-----------------------------------|----------|
| 10-inch bed, single web | \$300 00 |
| 12-inch bed, single web | 325 00 |
| 12-inch bed, double web | 350 00 |
| 18-inch bed, single web | 375 00 |
| 18-inch bed, double web | 400 00 |
| 24-inch bed, single web | 475 00 |
| 24-inch bed, double web | 500 00 |

MAILING SUCCESS PROOF PRESS.

Used by the "Ladies' Home Journal," and Similar Publications.

| | |
|---|----------|
| 15-inch bed, to take six 30-inch mailing galleys; mounted on castors, with feed-board | \$450 00 |
|---|----------|

HERALD-SUCCESS SELF-INKING PROOF PRESS.

Similar in principle to the web proof press described on opposite page, except that the paper is either laid on the form or fed from a feed-board. The illustration shows press with feed-board, although many are sold without feed-board. This press is designed for use in job offices, in the mailing departments of papers of large circulation, for proving full pages of newspapers, etc. It prints beautifully, bringing out half-tone illustrations clearly in all details. These presses are in use in the best printing offices of the world. List of users, with descriptive circular, sent on application.

PRICE LIST.

| | |
|---------------------------|----------|
| 10-inch bed | \$250 00 |
| With feed-board | 300 00 |
| 12-inch bed | 275 00 |
| With feed-board | 335 00 |
| 18-inch bed | 300 00 |
| With feed-board | 375 00 |
| 24-inch bed | 400 00 |
| With feed-board | 490 00 |

IDEAL HAND CYLINDER PRESS.

The type form on this press is stationary. The cylinder is moved over the tympan by link belts running over sprocket wheels at each end of the press, and it prints a sheet at each forward or backward movement. The cylinder is made of steel, and is held firmly to the tracks by truck-wheels which run in a groove on the under side of the tracks. The boxes which hold the cylinder at each end, and in which it revolves, are connected by a stretcher rod running above the cylinder, which prevents side friction. The impression is regulated by four screws—two on each side—which raise or depress the bearers on which the cylinder runs. An effective inking apparatus is supplied, but is extra. A number of Ideal Presses are in use, and intending purchasers may gather how satisfactory they are to the users by reading the following extracts from a great many commendatory letters received:

“My wife ran off 300 an hour on it the first day it was put up.” *** “With it our inexperienced pressman has made the following speed: 750 impressions in 75 minutes; 475 in one hour; 100 in 11 minutes. We run a regular lick of 100 every 15 minutes, or 400 per hour.” *** “The press is so simple that the veriest novice can set it up, and so light-running that a boy may operate it with ease.” *** “It is far superior to my old Washington for speed and quality of work.”

- No. 1. 8-column folio or 5-column quarto, size of bed, 28½×43 inches \$200 00
 - No. 2. 9-column folio or 6-column quarto, size of bed, 33¾×48¼ inches 225 00
 - No. 1. Floor space, 31×55. Weight, 700 pounds. Shipping weight, 975 pounds.
 - No. 2. Floor space, 35×60. Weight, 800 pounds. Shipping weight, 1100 pounds.
- Frisket for either size, furnished to order only, \$6 00. Extra tympan, covered, for either size, \$7 00.

IDEAL INKING APPARATUS.

There are two inking cylinders (A and B), one of which (A) revolves by means of the hand crank, and while revolving it automatically vibrates. The inking roller (D) rests on the inking cylinders and receives its supply of distributed ink. When the roller (D) is pushed toward the form, the automatic sheet-steel drop-leaf ink table (C) descends on the bed of the press and the roller (D) passes easily on to the type form. When the roller returns, the ink table (C) resumes its perpendicular position automatically. The Ideal Inking Apparatus is not furnished with the Ideal Press unless specially ordered.

- No. 1, for 8-column folio or 5-column quarto . \$30 00
- No. 2, for 9-column folio or 6-column quarto . 32 00

Hand Roller with Two Handles, including Extra Core :

- No. 1. 20 inches long, for 8-column single page \$3 75
- No. 2. 22 inches long, for 9-column single page 4 25

WASHINGTON
HAND
PRESS.

With and
Without Patent
Rolling Bed.

Washington Hand Press with Patent Rolling Bed. Built solely by American Type Founders Co.

| Platen. | Bed. | | |
|------------------|---|--|----------|
| 14×18 inches . . | 17 ×21 inches | | \$150 00 |
| 16×21 inches . . | 20 ×25 inches | | 175 00 |
| 20×25 inches . . | 24 ×29 inches | | 200 00 |
| 23×31 inches . . | 25¾ ×34¾ inches, for 6-column folio | | 200 00 |
| 23×35 inches . . | 26½ ×39 inches, for 7-column folio | | 225 00 |
| 25×39 inches . . | 28½ ×42 inches, for 8-column folio or 5-column quarto | | 250 00 |
| 27×43 inches . . | 31½ ×47½ inches, for 9-column folio | | 275 00 |

WITH PATENT ROLLING BED.

The patent rolling bed runs on rollers instead of sliding, and thus much exertion is spared the pressman, and the work is done quicker.

| Platen. | Bed. | | |
|------------------|--|--|----------|
| 23×35 inches . . | 26½ ×39½ inches, for 7-column folio | | \$250 00 |
| 25×39 inches . . | 28½ ×43½ inches, for 8-column folio or 5-column quarto | | 275 00 |
| 27×43 inches . . | 31½ ×47½ inches, for 9-column folio | | 300 00 |
| 29×43 inches . . | 33 ×48 inches, for 6-column quarto | | 325 00 |

Above prices include two pairs of points, one wrench, one sheepsfoot, pair of bearers, and one extra frisket.

As a rule we can supply second-hand Washington Hand Presses of all sizes on demand.

THE AMERICAN JOB PRESS COUNTER.

For Platen Presses.

The above cut shows Counter attached to an 8x12 Chandler & Price Gordon.

We place this counter on the market after testing its merits thoroughly and believing that the printer will appreciate a reliable counter with which he can keep an accurate record of the number of impressions on his job presses. The counter registers *only when the impression is on.*

There is absolutely no strain whatever on the counter or attachment, the movement being positive and easy, and when once it is set needs no further attention. It can be attached to almost any Gordon press. Give size and make of press when ordering.

Any number wheel can be set forward or backward without disturbing the others.

There are no screws used in the entire construction, and the parts are so put together that they cannot get out of order or become disarranged while in use.

The pawls or dogs are so made that there are no corners to wear off and make the counting uncertain.

Price \$12 00

The above cut shows Counter fastened on left feed table of Gally Universal Press.

Price \$10 00

AMERICAN COUNTING MACHINE.

Has no superior for strength, accuracy, reliability. Can be set to zero, or any number, with the fingers with the greatest ease. There are no springs inside this counter, and all movements of the figure-dials are so positive that it is impossible for them to miss registering. The case may be screwed to the wall or on a table, and the lever can be set to any position, and will work from front or back. The figures are cast solid, nickel-plated, and are very legible.

Price \$10 00

See illustration of this Counter attached to a C. & P. Gordon and a Universal Press on opposite page.

DURANT COUNTER.

This counter gives perfect satisfaction. It is as reliable as it is strong, durable, and attractive.

No. 2, with Alarm Gong.

- No. 1, 4-dial, counts 10,000 . . . \$ 8 00
- No. 2, 5-dial, counts 100,000 . . . 10 00
- No. 3, 6-dial, counts 1,000,000 . . . 12 00
- No. 2A, 5-dial, with 4-inch gong, to give alarm at each 100 15 00

DOUBLE DIAL ALARM COUNTER.

This counter is so constructed that the lower dials show the number run like the usual counter. The upper dials are the alarm device, and can be set (instantly without taking from the case, by thumb-screw or key) to any desired number you wish to print, and when that number is printed the bell will ring. To illustrate: Set the alarm on 600, if that is the number you wish to run, with lower dials on ciphers. First revolution of the machine the lower dials will show 1, and the upper dials 599 or one less, and so on until 600 is run, when the upper dials will stand at (000) ciphers and the bell will ring. Any time you look at the counter

it will show how many yet to run. Perfectly simple in construction. No more springs are used than in an ordinary counter, and all are made of best piano wire. This counter has an iron case, and very legible figures.

No. 1. Double Dial Alarm, 5x8, 1/2-inch figures, registering 100,000 \$15 00

WETTER NUMBERING MACHINES.

THE BETTER WETTER.

The latest successful development in Numbering Machines, for use with or without type on printing presses. This is the only typographic numberer that prints nothing but the figures, without "No.," a period, or any other affix or suffix intended to act as plungers or to prevent the printed sheet from being smeared by the revolving figures. The pressure of the platen or cylinder on the figures operates the mechanism which changes the numbers and also an ingenious bearer, which raises automatically and holds the printed sheet off the figures while they are changing. This bearer does not print on or indent the paper.

The Better Wetter is made with that perfection in construction and materials which have made all "Wetter" Machines famous.

This is the smallest machine of its kind, being 7/8-inch wide, the length depending upon the number and thickness of figures required. *Type can be set close up to the machine on all sides.*

Four regular styles of figures made. Styles J and K kept in stock. Styles L and M furnished at short notice.

The Better Wetter.

Style J 1234567890 Style K 1234567890

These Styles used on both the Better Wetter and No. 1 Wetter.

Style L 1234567890 Style M 1234567890

No. 1, actual size, Style J.

No. 1 WETTER NUMBERING MACHINE.

This is the regular machine, of which thousands are in use all over the world. Permits printing and numbering at one impression. Can be used on any make of press. Numbers automatically from the unit to its full numerical capacity. It can be used with or *without* the character "No." Other characters, such as a star, parenthesis, fist, cipher, or any letter, can be used to either precede or follow the figures. Produces clean, smooth and distinct figures. Styles of figures J and K are most used, and are kept in stock, but Styles L and M can be furnished upon short notice.

The 5-wheel style J machine occupies a surface space of 7/8-inch in width by 1 1/4 inches in length.

PRICES OF No. 1 WETTER AND THE BETTER WETTER.

| | |
|---|---------|
| Style J or K or L or M, five wheels, numbering up to 99999 | \$25 00 |
| Style J or K or L or M, six wheels, numbering up to 999999 | 28 00 |
| Style J or K or L or M, seven wheels, numbering up to 9999999 | 31 00 |

In ordering state which machine is required, and state style of figure and number of wheels desired. Unless otherwise ordered, the 5-wheel style J Better Wetter will be sent.

SPECIAL WETTER NUMBERING MACHINES.

See description and prices on opposite page.

Made to Order only.

No. 3.

No. 4.

No. 3. WETTER MACHINE FOR SMALL RAILROAD WORK.

(See illustration on opposite page.)

Numbers on extreme end, as shown on diagram. Plunger is at foot of machine, and does not strike the printed sheet. Occupies only 3/8-inch space on ticket when locked in form.

1234567890

Style of Figures for No. 3 Machine.

| | | |
|--------|--------------------------------------|---------|
| No. 3. | 5-wheel (figures as above) | \$25 00 |
| No. 3. | 6-wheel | 28 00 |
| No. 3. | 7-wheel | 31 00 |

No. 4. WETTER MACHINE FOR NUMBERING CASH SALE SLIPS.

(See illustration on opposite page.)

Made to number automatically from 100 to 1, or 50 to 1. Object of numbers running backward is to avoid expense of collating sheets after printing. Can be made to number forward. After printing to 100 or 50 they commence again at 1. Plunger wheel can be made with a letter wheel to print A, B, C, D, E, F, G and H, or letter slides may be used in plunger, and any of these letters or the character "No." can be used at will by turning the wheel until the desired letter is on top.

Price, 3-wheel, with letter wheel \$25 00

No. 5. WETTER DUPLEX MACHINE FOR NUMBERING DUPLEX RAILROAD TICKETS.

Numbers tickets on both sides and also on stub at one impression. Ticket numbers generally run from 1 to 100 or 0 to 99, and changes consecutively the book number which runs from 1 to 9999 or 1 to 99999. Can be arranged to change once at every one hundred impressions of ticket number, or can be made stationary, so that changes can be made by hand. There are three machines to a set—one for stub and one for each side of the ticket, to be used in same manner as ordinary Wetter Numerer, needing no attachment of any kind.

Set of three machines, net \$120 00

No. 7. WETTER MACHINE FOR NUMBERING BOND COUPONS.

Numbers with or without serial attachment. 7/8-inch wide, and can be used on narrowest bond coupons. Letter wheel can be placed on end to indicate serial No. A, B, C, D, E, F, G, H, I or J; or the serial letter or character "No." can be placed close to figure, thus—A1.

No. 8. WETTER MACHINE FOR NUMBERING LOTTERY TICKETS.

These are considerably more than type high, and the printing-press bed must be sunk or cut out so it will take in a thickness of two inches. We can supply presses for this purpose. Denominations of the figures can be spelled out under and over the figures in any language. Parenthesis marks can be placed at each side of a figure, thus—(1) to (9). At changing to 10 the parenthesis is moved back one step, and may be changed to include all figures until the full number (99999) is printed. Prices on application. Send full details and samples of work required. We show example of the figures used.

THE IMPROVED WETTER NUMBERING MACHINE.

The Improved Wetter Numbering Machine is just type-high, locks up in any form like a small cut, can be used on any job or cylinder press; prints clean, sharply-defined figures without any perceptible wear, is small and compact enough to allow type matter to be set close to the figures, and it will number anything from 1 up to as high as you wish to number with accuracy and precision. All parts interchangeable.

Styles J and K, five-wheels \$15 00
 Styles J and K, six-wheels 18 00

The new-pattern Monitor Numbering and Paging Machine.

This machine excels all others in quality, durability and simplicity, and particularly in the construction of the heads. They are dust-proof and ink-proof. The arbor has twice the bearing surface, insuring perfect register and twice the durability. The impression on one sheet or 1/2-inch thickness is the same. Can be changed by a single hand-screw to number 2, 4, 6, 8, 10, or 1, 3, 5, 7, 9, or consecutively or repeatedly. The table is adjustable. Power attachments can be added any time to foot-power machines. Power attachment is operated by an eccentric, thereby producing an evenness of motion, noiseless and positive.

| | | |
|---|----------|----------------------|
| With one four-roll steel figure-head | \$235 00 | Foot Power. \$185 00 |
| With one six-roll steel figure-head | 245 00 | 195 00 |

| Six-roll, to number 1,000,000 | 70 00 |

Prices of numbering heads include one repeater. Styles of figures sent on application.

BATES AUTOMATIC NUMBERING MACHINES.

These very superior machines operate consecutively, duplicate and repeat, and the changes are made instantaneously by simply moving the pointer on the dial. The figures are cut in steel and print perfectly. The movement of the figures is entirely automatic from 1 to the full numerical capacity of the machine. The figures receive ink automatically from a thick felt pad. The mechanism, material and finish are unsurpassed. Weight about 16 ounces. These machines are all furnished with special retarding device, which absolutely prevents the figures from ever getting out of alignment. Another great feature is that the ciphers are depressible, which makes the wearing even on all parts of these machines. The mechanism of the Bates Automatic Numbering Machine is internal, and it is entirely enclosed, so that it is not liable to get out of order or get clogged by dust. The ink-pad box is so arranged that the ink pad can be easily re-inked without soiling the fingers. The gauge plate is slotted, corresponding with the number of wheels of the machine, so that the exact location of the figures can be absolutely determined.

In lieu of Duplicating movement machines can be supplied with any one of the following movements at same prices: Triplicating, Quadruplicating, Quintuplicating, Sextuplicating, but are not carried in stock, being made to order only.

Bates Machine, one-half actual size.

CHANDLER & PRICE PAPER CUTTER.

It is built from new designs by scientific methods. It has ample metal, properly distributed to withstand strains. The back gauge and clamp interlock, clamping as narrow as one-half inch. The fingers of the clamp have a broad surface, to avoid creasing the stock. All gauges are accurately squared with the knife. The back gauge extends to within one inch of the side gauge, and is divided and adjustable for book trimming or squaring small work. All parts are strictly interchangeable, and accurately fitting replacements may be ordered by number.

Made by one of the most reliable builders of printing machinery in the world.

| | |
|-------------------|----------|
| 23-inch | \$100 00 |
| 26-inch | 130 00 |
| 30-inch | 175 00 |

CHALLENGE LEVER PAPER CUTTER.

Has set screws and gibs in the frames for taking up wear of knife-bar.

The 25-inch cutter is provided with both front and back stationary side gauges, which are cast on the side frame, and are accurately squared to knife and back gauge. The 30-inch and 32-inch cutters have, in addition to these, an extra side gauge in front, adjustable to either side; also a split back gauge, useful in trimming pamphlets. They are provided with the interlocking back gauge and clamp, for cutting narrow widths, without extra cost.

| | |

| 30-inch | 200 00 |
| 32-inch | 225 00 |

PEERLESS GEM PAPER CUTTERS.

DETAILS OF CONSTRUCTION.

| Weight, Unboxed. | Thickness of Knife Bar. | Thickness of Knife. | Depth of Knife. | Diameter Lever Shaft. | Diameter Steel Lever Connection Shaft. |
|---------------------|-------------------------|---------------------|-----------------|-----------------------|--|
| 30-inch . 1340 lbs. | 1 3/4 in. | 1/2 in. | 5 in. | 2 in. | 1 1/8 in. |
| 32-inch . 1425 lbs. | 1 3/4 in. | 1/2 in. | 5 in. | 2 in. | 1 1/8 in. |

Superior in every detail and in the leverage, cutting with greater ease to operator, and returning from cut with the least possible exertion, owing to their perfect balance. The frame is stronger, heavier and better braced; the knife thicker and deeper, insuring a truer cut and longer life; the lever is adjustable; the balance weight is now hung inside the frame, thus saving floor room. There are split back gauges, side gauges, and a front enameled measuring gauge. Unexcelled in construction, materials used, and finish.

| | |
|-----------------------------|----------|
| 23-inch, cuts 23 1/4 inches | \$100 00 |
| 25-inch, cuts 25 1/4 inches | 125 00 |

| 32-inch, cuts 32 1/4 inches | 200 00 |

Compare details of construction given above with those on other cutters.

25-INCH PEERLESS GEM CUTTER.

Excels all other cutters of its size in weight, ease of cut, strength, durability and finish. It is built on the same design as the Peerless Gem in all points, except that the lever is fixed on the shaft instead of being adjustable. The weight is 825 pounds, unboxed; has $4\frac{1}{2} \times \frac{3}{8}$ -inch knife; $1\frac{3}{4}$ -inch knife bar. The best money's worth ever offered in a 25-inch paper cutter.

The leverage both while cutting and returning is perfect, reducing the exertion of cutting to a minimum.

The balance weight is hung inside the frame to save floor space.

Style of 25-inch Peerless Gem Cutter.

25-inch, cuts $25\frac{1}{4}$ inches \$125 00

23-INCH PEERLESS GEM CUTTER.

Style of 23-inch Peerless Gem Cutter.

No other cutter of this size, or about this size, equals the new 23-inch cutter. It weighs 725 pounds, unboxed; has $4\frac{1}{2} \times \frac{3}{8}$ -inch knife, and $1\frac{3}{4}$ -inch knife bar. Built on the Peerless-Gem principle, it has leverage of maximum power and easy return, and all the features of the 25-inch Peerless Gem Cutter. It is not possible to build a better cutter for the money asked.

The balance weight is hung inside the frame, thus saving floor space and removing an annoying obstruction.

23-inch, cuts $23\frac{1}{4}$ inches \$100 00

RELIANCE LEVER PAPER CUTTER.

| | |
|-------------------|--------|
| 16-inch | \$4 50 |
| 18-inch | 6 00 |

Utility Paper Cutter with Iron Stand.

Iron stands are made for each size, and are recommended where bench room should be saved.

CLIPPER PAPER CUTTER.

Designed for cutting small work, such as labels, circulars, etc. Has a patented reversible clamp, which cuts very narrow strips and leaves no marks on the paper. The lever is pulled forward to cut. Quality of construction is A1.

Cuts and squares 12 inches . . . \$40 00

ADVANCE POWER CUTTER.

This is the lowest-priced Power Paper Cutter on the market, and can be recommended to buyers with whom low price is a prime consideration.

The Advance Power Cutter is fitted for hand or steam, is solidly built, the frame is firmly stayed by two substantial cross-braces, upon which is bolted the arch that supports the center of the bed, making it perfectly rigid and firm under pressure of clamp or knife.

It is fitted with the interlocking back gauge and clamp, by which paper may be cut to within half an inch of the knife.

It has brass figured rules in bed, back and front.

The throw-off is automatic and stops the knife instantly; it may be thrown off at any point, thus obviating possible waste of paper through error.

The knife has a dip-cut, which will be duly appreciated by all requiring a power paper cutter.

The slideways in which the knife bar moves is faced with steel gibs secured and adjusted by means of three set-screws on each side, so that any wear in the slideways may be taken up quite easily.

This is a very convenient style of cutter, as it will be found to be an effective and easily operated hand-power cutter at times when other power is not available.

| | |
|--------------------------------------|----------|
| 30-inch, squares 30 inches | \$300 00 |
| 33-inch, squares 33 inches | 350 00 |

CHALLENGE POWER PAPER CUTTER.

This cutter is provided with side gauges, back and front ; an extra reversible side gauge for front table ; split back gauge ; interlocking back gauge and clamp, for cutting narrow widths ; brass figured rules in bed, back and front. The slideways on which the knife bar moves are faced with gibs controlled by set screws, so that all wear in the slideways may be taken up.

| | |

| 40-inch, squares 40 inches | 750 00 |

PREMIUM CARD CUTTER.

This is the popular, general, all-round machine, with a twelve-inch blade, meeting the requirements of a medium-sized cutter. A distinctive advantage is secured by a peculiar arrangement of the joint, by means of which a sheet of any length may be cut. By the simple adoption of a spring overhead, connected by a cord attached to the handle, the cutter is adapted to rapid work where a great number of small pieces of uniform size are to be cut.

Price \$10 00

MANUFACTURER'S CUTTER.

This is a strong machine, having a twenty-four inch blade, adapted as a whole to any reasonable work for which such a cutter may be used. An essential feature for manufacturing purposes is the *automatic grip or binder*, which securely holds the work in position before the descending blade begins to cut and throughout its movement. This machine has been long and favorably known to the trade.

Price \$25 00

STUDIO CUTTER.

Has a ten-inch blade but no front gauge. Intended for small and light work. Makes a good clean cut.

Price \$3 00

SUCCESS CARD CUTTER.

A well-made, reliable cutter, with movable side and front gauges. 12-inch knife . \$10 00

MONITOR TABLE SHEARS.

Style of 34-inch Extra Heavy Monitor Table Shears.

The Monitor Extra Heavy Table Shears are especially adapted for cutting the heaviest boards for bookbinders and for cutting perfectly square and clean edges. The knife-bar head is adjustable laterally and vertically, and another adjustment at the head enables the knife bar to be swung either way, so as to secure its perfect alignment with the bed, and insure a perfect shear cut. The screws holding the knife-bar head are $1\frac{3}{8}$ inches in diameter, and are turned at an angle of 55 degrees, which prevents the knife bar from springing. The clamp is parallel, and descends upon the whole sheet at once when the foot is placed on the clamping treadle. The gauge is operated by a hand wheel attached to a geared pinion and rack. The rack is of steel. One revolution of the hand wheel moves gauge four inches. The table is scored both ways, and is provided with side and end adjustable gauges.

Style of 32-inch Monitor Table Shears.

| Monitor Table Shears, 34 inches, extra heavy | \$150 00 |
| Monitor Table Shears, 32 inches | 110 00 |

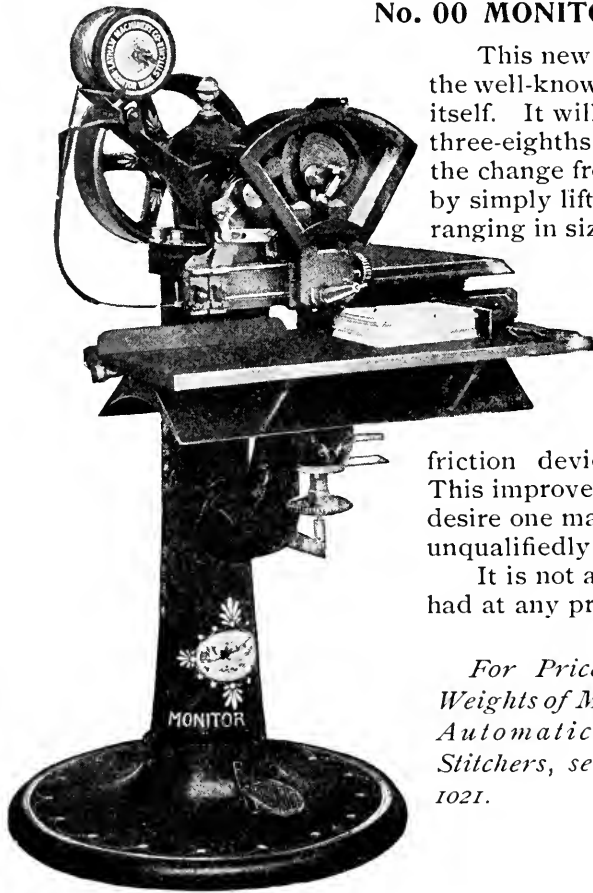

MONITOR AUTOMATIC WIRE STITCHERS.

No. 00 MONITOR WIRE STITCHING MACHINE.

This new machine combines all the good points of the well-known No. 0 with valuable features peculiar to itself. It will handle work from one sheet to one and three-eighths inches in thickness, either flat or saddle, the change from one to the other being made instantly by simply lifting off or replacing the flat table. Wire ranging in size from No. 25 round to No. 19 to 21½ flat can be used with equal facility, an ingenious improvement in the feeding mechanism insuring the smallest wire being fed without bending or kinking. The spool tension is so arranged that just enough wire for one staple is delivered at a time, doing away with friction devices which require constant adjusting. This improved Monitor will be welcomed by those who desire one machine to handle a variety of work, as it is unqualifiedly guaranteed to do all that is claimed for it.

It is not a low-priced machine, but the best to be had at any price.

*For Prices and
Weights of Monitor
Automatic Wire
Stitchers, see page
1021.*

No. 00 Monitor Wire Stitcher.

The No. 00 Monitor will handle the largest range of work of any wire stitcher in the world.

No. 0 TWENTIETH CENTURY MONITOR WIRE STITCHER.

Our No. 0 is designed for flat or side stitching only, and has a range of work from ¼ inch to full 1¾ inches. It has all the same mechanism as the No. 00, with the exception that it does not have the saddle table for doing saddle stitching. It is provided with automatic clamp, if desired, for soft, spongy paper, which compresses the book firmly while being stitched, thus avoiding the breaking or tearing of the top and bottom sheets, or cover.

No change of parts for various thicknesses of work.

Guaranteed to stitch up to its fullest capacity.

No. 0 Monitor Wire Stitcher.

Will stitch from ¼ inch to 1¾ inches.
Designed for flat work only.

MONITOR AUTOMATIC WIRE STITCHERS.*(Continued.)***TWENTIETH-CENTURY MONITOR WIRE STITCHER.**

The Twentieth-Century Monitor Stitchers are undoubtedly the finest stitchers ever produced. They will stitch one thickness of tissue paper with No. 30 wire up to their fullest capacity with round or flat wire without change of parts. Our latest improved spool tension works automatically, and at each stroke of the feed lever it releases sufficient wire only for the next staple. Users will appreciate this improvement. It has an indicator numbered 1, 2, 3, 4, 5, 6, which is adjusted instantly for various lengths of staples. The cutter is now provided with a separate cutting blade, which has two cutting surfaces, and which can be replaced at a cost of a few cents (heretofore new cutters cost \$1.25 each). This cutter can be taken out of machine or replaced by hand without the use of tools. The new straight and roll-feeding attachment feeds the wire into the machine perfectly straight, and produces a perfect square staple, which is absolutely necessary to accomplish thick, heavy stitching. Also provided with wire straightener, automatic gauge, flat and saddle table, back and side gauges, etc.

No. 1 Twentieth Century Monitor Wire Stitcher.
Capacity, $\frac{7}{8}$ inch.

No. 1 $\frac{1}{2}$ is of the same design.

**No. 2 $\frac{1}{2}$ MONITOR
WIRE STITCHER.**

The No. 2 $\frac{1}{2}$ Monitor is especially adapted for large pamphlet and calendar work. It has a drop of 16 inches, or a reach from clincher block to stand of 11 inches. It is constructed with a roll-feeding device which feeds the wire between two steel rollers, producing an evenness of feed and every staple of even length. Also equipped with improved spool tension, automatic gauge, flat and saddle table, gauges, etc.

This size machine can be run at a great speed, and is a big money maker.

No. 2 $\frac{1}{2}$ Monitor Wire Stitcher.
Capacity, $\frac{1}{4}$ inch.

No. 1 $\frac{3}{4}$ and No. 2 are of the same design.

For Prices and Weights of Monitor Automatic Wire Stitchers, see page 1021.

MONITOR AUTOMATIC WIRE STITCHERS.

(Continued.)

No. 3 MONITOR WIRE STITCHER.

This No. 3 Monitor is provided with all the improvements as on the more expensive stitchers, and will do stitching as neatly and as quickly.

It is built on a leverage movement, is very simple, does not get out of order nor break. With care this machine will earn its purchase price in a few weeks.

*For Prices and Weights of
Monitor Automatic Wire Stitchers,
see page 1021.*

No. 3 Monitor Wire Stitcher.
Capacity, $\frac{1}{4}$ inch.

No. 4 MONITOR WIRE STITCHER.

For Foot Power.

To reach the demand of small offices not provided with power, we herewith show a small foot-power stitcher at a price to bring it within the range of all medium-sized offices.

It feeds direct from a spool, making its own staples (at a cost of less than two cents per thousand). Will stitch both flat and saddle work without change of parts for different thicknesses of work or different sizes of wire. It has its own pedestal, similar to our power machines, and is of the same high standard of workmanship and material.

Uses thick and thin round wire from Nos. 25 to 30.

No. 4 Monitor Wire Stitcher for Foot
Power.
Capacity, $\frac{1}{4}$ inch.

| No. 4 | Direct Feed (Treadle)—capacity, 2 sheets to 1/4 inch; uses 25, 26, 27, 28 and 30 round wire | . 270 lbs. | 100 00 |

All of the above have flat and saddle table except No. 0

TENNIS BOOK-SEWING MACHINE.

Designed for stitching blank books of every kind, and pamphlets and books not exceeding a thickness of three-eighths inch. Will sew through back or center, making stitches one-inch, half-inch, or quarter-inch long. Books sewed by this method are durable, and open perfectly. This machine is in use in almost every prominent blank-book factory in the United States.

In ordering steam power it is necessary to state diameter of shaft from which belt will be run to machine.

Length of Stitches.

For foot power, with stand and table \$60 00
 For steam power, with variable speed, stand and pulleys, complete 70 00

PERFECTION WIRE STITCHERS.

Perfection Stitchers, as shown on this and following page, have for a number of years given invariable satisfaction with a minimum of trouble. They are exceedingly well made and strong. The adjustment from one length of staple to another is accomplished by changing a pin from one hole on dial plate to another.

These stitchers take wire from spools, and make staples from round or flat wire of any desired length within the capacity of each machine.

PERFECTION "G" WIRE STITCHER.

Power or Treadle.

Capacity, two sheets to almost 7/8-inch. Large trough and flat table. Uses 20 to 28 gauge wire.

- For steam power \$250 00
- For treadle and power combined 265 00
- For treadle only 260 00

No. 7 NEW PERFECTION WIRE STITCHER.

This machine has all modern improvements. It sets automatically for all thicknesses of work. The patent table is changeable from flat to saddle, or *vice versa*, without removal. There is an extra length of space between clinchers and

frame to accommodate large calendars and extra large publications. Constructed expressly to stitch heavy work with light wire, without change of parts, although heavy wire can be used if desired. Has the roller-feed device in its latest improved form, and patent supporting and clinching devices which are unexcelled.

Will stitch from one sheet to 3/4-inch, and will run wire as fine as No. 25, and also flat wire, 21x25, without changing any parts.

Price, complete \$300 00

PERFECTION "A" WIRE STITCHER.

Hand or Foot Power.

It is adapted for work varying from two sheets to one-fifth inch in thickness. May be used with flat table or saddle, with wire of from 23 to 30 gauge. The saddle is extra long.

Perfection "A" Wire Stitcher, for hand or foot power \$90 00

PERFECTION "C" WIRE STITCHER.

For Steam Power Only.

Specially adapted for pamphlet binding, stitching calendars, and all work up to one-fifth inch. Extra long saddle and flat table. Takes 23 to 30 gauge wire.

Perfection "C" Wire Stitcher, for steam power only \$150 00

BOOKBINDERS' WIRE ON SPOOLS.

The success of every wire stitching machine depends largely upon the quality of the wire used. We sell the best made.

A spool holds five pounds of wire. A case contains 20 spools (100 lbs.). Spools are 10 cents extra each, and are returnable less transportation charges. Do not return spools without previously sending us notice, as such notice may enable us to save you some expense.

As a rule, our prices for case lots (100 lbs of one size) are two cents per pound less than the single-spool price.

Current price list of wire will be sent on application, which consumers can depend upon as being the lowest obtainable for the best quality of wire.

The fluctuations in the cost of metals make it impossible to publish a standard list of prices.

GAUGES OF WIRE.

Round : Nos. 18 and 19
 Nos. 20, 21, 22
 Nos. 23, 24, 25, or 30 s.
 Nos. 26, 27, 28
 No. 30

Flat : Nos. 19×21, 19×21½, or 10 s.
 Nos. 20×23 and 20×25
 Nos. 21×25 or 60 s.
 Nos. 24×29

Wires Nos. 10 s, 30 s, and 60 s, are for Thompson machines only.

PERFECTION No. 4 WIRE STITCHER.
(POWER)

Specially Constructed for Stitching All Sizes of Calendars.

The Perfection No. 4 Wire Stitcher is the most perfect machine of its capacity extant, having up-to-date features not to be found in any other stitcher, and at a more than reasonable price.

The instant recognition and quick sales given this machine by the trade generally is proof positive of its being up to and beyond the high standard of the well-known Perfection Wire Stitchers.

The special features of the No. 4 Wire Stitcher are an improved spring-roll wire feed, an improved patented feed gear, improved wire-cutting devices, and an improved patented staple supporter. The saddle is extra large, and there is 15-inches of a drop to the arm of machine. The table, which is extra large, has 12 inches back space. These machines are simple, rapid and almost noiseless in operation.

Price \$250 00

Capacity, 2 sheets to 1/2 inch. Wire used, 23 to 28 gauge.

SUCCESS WIRE-STITCHING MACHINES.

These machines are the sole occupants of the field between the crude staple binders and expensive wire stitchers. The No. 1 is for hand lever only; capacity, 3/16-inch for both flat and saddle work. It makes its own staples. A forty-cent spool of wire will make more than 14,000 staples, and 14,000 ready-made staples cost \$2.10, showing a saving on staples alone of \$1.70 on every 7000 pamphlets stitched, besides doing better and neater work. The No. 2 is a much heavier machine, working on the same principle by lever or treadle. It takes a regular five-pound spool of wire. Its capacity is 3/8-inch; has flat and saddle table; distance from stitch to back is eight inches. These machines are guaranteed by the makers.

- Success Wire Stitcher No. 1, for lever only; capacity, 3/16-inch \$40 00
- Success Wire Stitcher No. 2, with treadle; capacity, 3/16-inch 65 00
- Spools of wire for No. 1, each 0 40

The No. 2 Stitcher takes regular five-pound spools of No. 25 wire.

BOOKBINDERS' WIRE ON SPOOLS.

The wire we carry in stock is the very best procurable, and it will be sold at prices as favorable as any prices obtainable elsewhere for the same grade of quality.

There is no economy in poor wire, as the trouble it occasions much more than offsets any saving in the first cost.

The standard sizes are printed on page 1023, but without prices, as the fluctuations in the cost of metals make it impracticable to publish a standard list. Current price list will be sent on application, which consumers can depend upon as being the lowest obtainable for the best quality of wire.

The table below will save users of wire a great deal of time, and enable them to estimate accurately the cost of wire in each job and the amount necessary to order.

WIRE STAPLE TABLE: SHOWING NUMBER OF STAPLES TO ONE POUND OF WIRE.

To ascertain the number of staples to one pound of wire, measure *full length* of wire in staple, go to first column on left of table and pass down same until you reach the size that corresponds with staple measured; pass along to right until you reach size of wire used, shown by top row of figures. Example: If your staple measures 1½ inches, and the size of wire is No. 28, there are 11,940 staples to one pound, as shown in table.

| Length of Wire in Staple. | 18 | 19 | 20 | 21 | 22 | 23 | 24 | 25 | 26 | 27 | 28 | 29 | 30 |

No. 6 ACME TREADLE STAPLE BINDER.

**The Only Staple Binders
Which Will Not Clog.**

The No. 6 Acme Wire Staple Binder does a greater range of work, and does better work, than any other staple binder. At one stroke of the treadle it drives, clinches and releases the staple, each operation being independent, though continuous. It holds two hundred and fifty staples at a charge, and round or flat and fine or coarse staples may be used. Staples are fed automatically to driver by positive pressure on both legs, and clogging is prevented by a device which effectually prevents more than one staple getting under the driver at a time. The clinch is perfect on any thickness. There is ample room for putting in and taking out work, as the driver arm lifts more than an inch above the table after each clinch. There is a space of $8\frac{1}{2}$ inches under the arm for calendar work. The treadle has a positive movement. Every machine is furnished with a strong iron stand. Will bind to a thickness of $\frac{1}{4}$ inch through any kind of paper, and is furnished with both flat and saddle-back tables, with gauges on the flat bed. For hard or coated papers, when the work is heavy, flat wire staples are used.

Acme Staple Binder No. 6.
For treadle, with flat and saddle tables.

Price, \$40.00

PRICES OF ACME TREADLE STAPLE BINDERS.

| | |
|--|---------|
| No. 6, Acme Wire Staple Binder, capacity $\frac{1}{4}$ -inch and under, on all kinds of paper, for round or flat wire, with table and treadle complete | \$40 00 |
| No. 4 Acme Wire Staple Binder, capacity $\frac{1}{4}$ -inch and under, on ordinary printing paper, for round fine wire only, with table and treadle complete | 27 00 |

For prices of Staples, see following page.

No. 4 ACME TREADLE STAPLE BINDER.

**The Only Staple Binders
Which Will Not Clog.**

The No. 4 Acme is very similar in appearance to the No. 6, and will stitch the same thickness on ordinary paper, but it uses only round fine staples, which cannot be used successfully on coated or filled paper unless such work is light. This machine is specially adapted for stapling the average run of pamphlets, calendars, sample work, etc. It does both flat and saddle-back work. It has the device for prevention of clogging, and the clinching is done by the pressure of the blade while driving the staple. Holds two hundred and fifty staples at a charge.

**UTILITY OF THESE
MACHINES.**

The addition of one of the Acme Treadle Staple Binders to the plant of small or moderate-sized printing offices, in towns in which there are no binderies, will make it easy and profitable to bind pamphlets, receipt books and other work. In towns where there are binderies they enable printers to save time, save handling of stock, and to avoid losses and damage in transit. All the staple binding machines in use were invented by one man, and the Acmes are the latest and most efficient. Like all such machines there is a certain knack to be acquired in order to handle them to the best advantage. Operators should read directions (which accompany the machines) very carefully.

Acme Staple Binder No. 4.

Price, \$27.00

STAPLES FOR ACME BINDERS.

| | |
|---|--------|
| For Acme Binder No. 6: No. 20, $\frac{3}{16}$ inch, round; No. 21, $\frac{1}{4}$ -inch, round; No. 22, $\frac{5}{16}$ -inch, round; No. 23, $\frac{1}{4}$ -inch, flat; No. 24, $\frac{5}{16}$ -inch, flat—per box of 5000 of one size | \$1 25 |
| For No. 4: No. 20, $\frac{3}{16}$ -inch, round; No. 21, $\frac{1}{4}$ -inch, round, and No. 22, $\frac{5}{16}$ -inch, round—per box of 5000 of one size | 1 25 |

**ACME
STAPLE BINDER
No. 1.**

The most satisfactory low-priced staple binder made. *It will not clog*, as only one staple can get under the driver at one time. The frame swings on a pivot, and lifts high enough to give ample room for putting in and taking out the work—an advantage not obtainable on other low-priced staple binders. It holds one hundred staples at a charge. Binds $\frac{1}{4}$ -inch and under. The staple is fed automatically under the driver, which descends and drives it through the paper, the pressure clinching the staple tight on the under side. Uses flat staples only.

Price \$6 00
 Staples : No. 23A, $\frac{1}{4}$ -inch, flat ; No. 24A, $\frac{5}{16}$ -inch, flat—per box of 5000 of one size 1 25

**SURE SHOT
STAPLE
BINDER
No. 1.**

The most reliable binder for office use. Holds one hundred staples at a charge. Works on the same principle as the Acme No. 1, described above, but has no lever. Binds from two to fifty sheets.

Price \$3 00
 Staples : No. 23A, $\frac{1}{4}$ -inch ; No. 24A, $\frac{5}{16}$ -inch—per box of 5000 of one size 1 25

BREECH LOADER STAPLE BINDER.

This is a handy machine for office use. Can be put to a great variety of uses. Binds paper or pamphlets from two to fifty sheets with wire staples; holds one hundred staples at a charge; feeds them out automatically; inserts them into the work, and clinches them on the under side.

Price \$3 00
 Staples: C, $\frac{3}{16}$ -inch; D, $\frac{1}{4}$ -inch; E, $\frac{5}{16}$ -inch—per box of 1000 0 50

Only one size of staples in a box.

HERCULES WIRE STAPLE BINDER.

For Hand or Treadle.

The cheapest treadle staple binder. Binds paper to thickness of $\frac{1}{4}$ -inch. Staples can be inserted three inches from margin. No table is supplied. The machine is screwed on a bench, and the treadle is screwed to the floor, connecting by means of a rod and spring.

Sold also for hand power only. Only one size of staples in a box.

Price, with treadle \$10 00
 Staples: F, $\frac{3}{16}$ -in.; G, $\frac{1}{4}$ -in.; H, $\frac{5}{16}$ -in.; K, $\frac{3}{8}$ -in.—per box of 5000 of one size 1 25

OTHER STAPLE BINDERS.

No. 7 Staple Binder binds paper $\frac{5}{16}$ inch thick. Complete with table and treadle . . . \$32 00
 No. 9 Staple Binder binds paper $\frac{1}{4}$ -inch thick. Complete with table and treadle . . . 36 00
 No. 8 Saddle Back Staple Binder takes $\frac{3}{16}$ -inch staples only; designed for saddle-back work, but will take flat work by adding flat table; with saddle back only, \$30 00; with flat and saddle-back tables 31 50
 Lightning Staple Binder No. 1 staples through $\frac{1}{4}$ -inch paper; No. 2 staples through $\frac{5}{16}$ -inch paper; each complete with treadle 24 00

WIRE STAPLES.

The following are the prices of staples for Staple Binders not illustrated:

For No. 9 Staple Binder: Staples No. 1 $\frac{1}{2}$, $\frac{3}{16}$ -inch long; No. 2, $\frac{1}{4}$ -inch long; No. 3, $\frac{5}{16}$ -inch long—per box of 5000 of one size \$1 25
 For No. 8 Saddle Back Staple Binder: Staples No. 1, $\frac{3}{16}$ -inch long—per box of 5000 1 25
 For No. 7 Staple Binder: Staples No. 4, $\frac{3}{16}$ -inch long; No. 5, $\frac{1}{4}$ -inch long; No. 6, $\frac{5}{16}$ -inch long; No. 6 $\frac{1}{2}$, $\frac{3}{8}$ -inch long—per box of 5000 of one size 1 25
 For Lightning Staple Binder No. 1: Staples No. 7, $\frac{3}{16}$ -inch long; No. 8, $\frac{1}{4}$ -inch long; No. 9, $\frac{5}{16}$ -inch long—per box of 5000 of one size 1 25
 For Lightning Staple Binder No. 2: Staples No. 10, $\frac{3}{8}$ -inch long; No. 11, $\frac{7}{16}$ -inch long; No. 12, $\frac{1}{2}$ -inch long—per box of 5000 of one size 1 25

MONITOR ROUND-CORNER, PUNCHING, INDEX CUTTING MACHINE.

Combination Machine, for Power, complete, \$180.00.

Combination Machine, Foot Power, complete, \$120.00.

A very desirable machine. By foot, it cuts easily through card or paper $1\frac{1}{2}$ inch thick ; by power, 3 inches. The table, besides having adjustable guides and a full-length clamp to hold the work during the cut, is movable from right to left, or *vice versa*, by means of a rack and gear operated by the hand wheel in front. A graduated scale and index above the table enables the operator to work quickly and with accuracy. The knives, Nos. 1, 2 and 3 (illustrated), or three of one No., are furnished with each complete machine.

By removing sliding table and index scale, and substituting a punch or round-corner cutter for the index knife, this machine is easily changed into a punching machine or round-corner cutting machine. In ordering punches and dies be guided by following diagram, and order by number or initial on diagram.

| | |
|---|----------|
| For foot power, complete with sliding table and index scale, one index knife, one punch and die, and three round-corner knives ; weight, crated, 435 lbs. | \$120 00 |
| For power, complete with same attachments as above ; weight, crated, 550 lbs. | 180 00 |
| Foot Power Index Machine, with round or square knife | 100 00 |
| Extra punch and die, per set | 2 50 |
| Extra round-corner knives, each | 1 50 |
| Extra index knives, each | 2 50 |

MONITOR PUNCHING AND ROUND-CORNER CUTTING MACHINES.

Furnished for power or foot power. With foot power will cut easily through card or paper 1½ inches thick, and with power through card or paper 3 inches thick. The cutter block is furnished of either wood or composition metal which does not injure the knives, and is so set as to be readily adjusted or removed. The head is rigid, and there is no spring or deflection in the punch or cut.

Order punches by the initials and numbers on the diagram printed on opposite page.

Each machine ordered for round-corner cutting is furnished with one each of the three knives illustrated on opposite page, or three knives of any one size, if desired.

- Foot Power Round-Corner Machine, with three knives (shapes of knives illustrated on page 1030) \$75 00
- Foot Power Punching Machine, with one punch and die 75 00
- Power Round-Corner or Punching Machine, heavier pattern, with extras as above, each 135 00
- Round-corner knives, each 1 50
- Punch and die, per set 2 50

For Power.

JOB BACKER.

This has ample strength and is accurately fitted. It is extra heavy and reinforced at the corners. The boxes are phosphor bronze, and the screw and jaw are of steel.

- No. 0 takes 19-inch book \$65 00
- No. 1 takes 21-inch book 70 00
- No. 2 takes 24-inch book, extra heavy . . 80 00
- No. 3 takes 29-inch book, extra heavy . . 90 00
- Boxing extra.

SPECIAL NOTICE.—We are prepared to quote favorable prices for all kinds of bookbinders' machinery and tools, new or second-hand. In writing for quotations time will be saved if the requirements of customers are very specifically stated.

THE STERLING ROUND-CORNERING MACHINE.

**Simple in Construction
Moderate in Price
and Rapid.**

**Designed to meet the
Requirements of
Bookbinders and
Printers.**

The Sterling Round-Cornering Machine is the best built machine for the purpose ever devised, and is particularly desirable in printing offices and binderies which aim to be progressive. It is thoroughly new in design, and the fact that the United States Patent Office has allowed all claims in their broadest and most comprehensive form, proves that the invention is original.

It costs very little to round-corner a thousand catalogues or booklets with this machine. A boy of average intelligence can do the job in from ten to fifteen minutes. A thousand cards can be round-cornered in much less time.

Every part of the machine is made with the utmost care, and none but the very best materials are used in its construction.

Price \$15 00

H. B. Brooks, Bookbinder and Manufacturing Stationer, Salem, Mass.: "Enclosed find check for \$15.00 for the Round-Cornering Machine. I have found the machine satisfactory in every particular, and the printers and binders who first investigate and adopt the Sterling will be sure to get better profits and more of them."

Richard Evans, Blank Book Manufacturer, New York: "I am more than pleased to say that the Sterling Round-Cornering Machine is giving me the greatest satisfaction."

J. P. Corvell, Printer and Publisher, Easton, Pa.: "I am well pleased with your Cornering Machine, and regard it as a most useful article, and use it daily."

E. W. Raymond, Printer, Independence, Iowa: "The Sterling Round-Cornering Machine is just what I wanted. It's a dandy!"

THE "PROGRESS" FOOT-POWER ROUND-CORNERING AND PUNCHING MACHINE.

Round Corner Cutter Attachment for "Progress" Punching and Round-Cornering Machine.

This machine is very heavy and nicely finished. The stand is cast in one piece, has adjustable gauges, and built in such a manner that the knife will not spring. All punches and dies are hardened and drawn to the proper temper, and are turned off center, forming an eccentric by which the male die can be made to register accurately with the female die, and securely locked in the correct position. Punches and dyes are interchangeable and adjustable from 1 1/4 up to 11 inches. Any size of punch can be used. A small size punch will go through 3/8-inch paper, and a large punch through 1/4-inch paper. Three knives and four punches with each complete machine. Four punches with punching machine only. The corner-cutting attachment has an automatic clamp which securely holds paper while being cut.

This machine is the latest of its kind on the market, and is guaranteed to be strictly as represented.

| | |
|--|----------|
| Price, complete | \$125 00 |
| Price, without corner-cutting attachment | 110 00 |
| Extra punches and dies, per set | 2 50 |

THE ROSBACK MULTIPLEX PUNCHING MACHINE.

The frame is extra heavy, with finished bearings, and is securely braced and bolted. The driving shaft is also large, and has four-inch bearings on each end, thus insuring a straight down stroke, without spring.

The head which operates the punches is arched, and supported on each end by long guide pins, nicely fitted. Any portion of the machine can be used without unnecessary strain to the rest of the machine.

The punches are made from the best of tool steel (drill rod), and travel through guides with a bearing of five inches in length. The punch passes through this guide a little off center, forming an eccentric, by which the male die can be made to accurately line with the lower die. These guides are adjustable up and down, and act as strippers.

The dies are inserted in iron blocks, and slide in a dove-tail slot, locking separately, for the reason that *each and every one may be set and locked immediately*. This absolutely does away with any accidental moving of same, which may be caused in many ways. Again, should any die holder become worn by constant use, it can be safely locked with any number of other die holders that you may desire to use. This is a very important point.

All punches and dies are interchangeable. This machine will punch through one-half inch of paper. It will punch one or twenty holes at each operation, any size from $\frac{3}{8}$ inch down. Adjustable to any distance between holes from $1\frac{1}{4}$ inches upwards. Six round-hole punches and dies with each machine. Open-hole work, as used in loose-leaf ledgers, etc., can be done on this machine. Will admit a sheet of paper full 28 inches wide and any length. Built in one size only.

| | |
|---|----------|
| 28 inches, steam power ; net weight, 600 lbs. | \$250 00 |
| 28 inches, foot power ; net weight, 550 lbs. | 225 00 |

THE CHALLENGE BOOK STABBER.

For use on clamp of paper cutter. Needles can be set any distance apart within a space of seven inches, and stab one sheet to three-quarter-inch thick. Invaluable in any printing office.

It is especially handy in binding pamphlets of all descriptions, stenographers' note books, memo. tabs, receipts, order blanks, etc.—in fact, all kinds of check binding is easily, neatly and quickly done.

By reference to the illustration below it will be seen that the stabber is easily attached to the clamp of the cutter.

The comb-like piece in the illustration is the stripper, and is attached to the bed, of the paper cutter, acting as a stripper and a back gauge for the work.

Cheapest and most efficient device for the purpose made.

Challenge Book Stabber Adjusted on a Paper Cutter Ready for Use.

Price, complete \$4 00

HAND STABBING MACHINE.

For stabbing pamphlets, receipt books, etc., by hand or foot power. Built of iron, and made to fasten to a bench or table. The position of the needles can be easily and quickly changed, as they move laterally in a slot, and are held by set screws.

For hand power \$25 00
 For foot power 50 00
 Needles, per dozen 3 00

MULTIPLEX MONITOR PUNCHING MACHINE.

This latest improved Power Punching Machine, which is giving perfect satisfaction wherever used, is constructed on correct mechanical principles, and every detail has been thoroughly and carefully considered. The frame is very heavy, solid and substantial, and securely braced. The head, to which the male dies are attached, is held in position by two side rods, thereby insuring a true and perfect perpendicular motion. The punches travel through guides four and three-quarters inches in length, the punch passing through the guide a little to one side of its center, forming an eccentric by which the male die can be adjusted to accurately register with the female die and rigidly locked in the correct position. These guides can be set close to the paper, and act as strippers to remove the work from the punches.

Holes can be punched with this machine through about one-half inch of paper, making perfectly true and smooth perforations, which can be spaced from 1½ inches to 25 inches apart, and from one to twenty made at each operation.

Operating shaft below connects to head by side rods by means of a projecting hub, on which a collar of the side rod operates. This removes any possible lateral motion or strain to the head.

When ordering, give size of holes desired by number, from cut shown above. Dies furnished for loose-leaf ledgers or for special purposes at small additional cost.

Price, complete with six punches \$250 00
 Extra punches and dies, per set 2 50
 Net weight, 680 lbs. ; crated, 800 lbs.

No. 4 PUNCHING AND HAND EYELETTING MACHINE.

Can be used for Eyeletting by Hand by
Substituting Punches for Eyelet Sets.

Punch and Die.

This is the proper machine to use with eyeletting machines shown on preceding pages. Except on cloth, good work cannot be done unless the hole is punched out *clean* before eyeletting. The No. 4 Machine will do work up to $\frac{3}{8}$ -inch diameter (No. 3 Calendar Eyelet) and has a reach of $6\frac{1}{2}$ inches back of plunger, and an adjustable gauge for all kinds of work.

By removing the punch and die and substituting an eyelet set, this machine may be used for eyeletting by hand feed, and will do perfect work.

| | |
|---|---------|
| No. 4 Punching Machine, with treadle, and one punch and die | \$20 00 |
| Extra punch and die, per pair | 2 50 |
| Eyelet set, per pair | 2 50 |

COMBINED EYELET PUNCH AND SET.

An indispensable tool in the printing office. Punches the hole and sets the eyelet. Takes only one size of eyelet (No. 2 Skirt).

| | |
|------------------------------------|--------|
| Price, complete | \$2 25 |
| Eyelets, per box of 1000 | 0 50 |

Sizes of punches and dies correspond with eyelets made. Order by number.

THE PETIT FOOT-POWER EYELETTING MACHINE.

This is not recommended for the general work of printing offices and binderies, but is perfectly adapted to special work requiring eyelets not exceeding $\frac{3}{32}$ -inch inside, known as No. 1 "C. Z." It will take the smallest eyelet, $\frac{1}{16}$ -inch inside, known as "D. E."

It is a perfect feeding machine, 12 inches high, 9 inches deep, weighs only 17 pounds, and is very easy to operate.

| | |
|--|---------|
| No. 1. The Petit, with one roadway | \$30 00 |
| Extra roadways, each | 12 00 |

EYELETS.

The largest eyelet used is "No. 3 Calendar," smallest is "D. E.," $\frac{1}{16}$ -inch inside. The eyelets in most common use are "No. 3 Calendar" and "No. 2 Skirt" (as illustrated). The prices of eyelets in large quantities vary from time to time, and special quotations will be given when required.

Smallest quantity sold 10,000 in one box, except No. 3 Calendar, which are put up in boxes of 5000. They are also packed in bulk cases containing 250,000 of any size.

| | |
|---|--------|
| No. 3 calendar eyelets, per box of 5000 | \$3 75 |
| No. 2 skirt eyelets, per box of 10,000 | 4 50 |

Special quotations for larger quantities.

Sizes of Eyelets.

The cuts show exact sizes of each eyelet when set in the material eye-letted.

The heavy figures under cuts indicate the size of punch and die to be used with eye-lets.

SELF-FEED FOOT POWER EYELETING MACHINES.

With Removable Roadways.

THE VICTOR.

Has a reach from eyelet set to back of arm of 6½ inches, and will set an eyelet in the center of a square 13×13 inches. Will set eyelets in paper, metal, leather, cloth, etc.

The eyelet roadway or feed channel is made to feed but one size eyelet; if other size eyelets are used on machine, an extra roadway is necessary. When ordering machine, specify by name the eyelet for which machine is to be fitted. If extra roadways are wanted, be particular to state the size of eyelet to be used. It takes only a few moments to change one roadway for another on machine.

The Victor is easy to operate, weighs 30 pounds, is 14 inches high, 15 inches deep, and is a perfect working machine and very durable.

| | |
|---|---------|
| No. 2. The Victor, with one roadway | \$40 00 |
| Extra roadways, each | 14 00 |
| Power attachments, extra | 40 00 |

In ordering, send samples of eyelets to be used, as the roadway will feed only one size of eyelet. An extra roadway is required for each size of eyelet.

THE ROYAL.

Differs from the No. 2 Victor in the reach only, which is 9 inches, setting eyelets in a square 18×18 inches.

It weighs 45 pounds, is 15 inches high, 16 inches deep, and is a perfect working and very durable machine.

| | |
|--|---------|
| No. 3. The Royal, with one roadway | \$45 00 |
| Extra roadways, each | 16 00 |
| Power attachments, extra | 40 00 |

In ordering, send sample of eyelet to be used, as the roadway will feed only one size of eyelet. An extra roadway is required for each size of eyelet.

**MONITOR EXTRA HEAVY PERFORATOR.
ROUND-HOLE—POWER.**

This Extra Heavy Perforator embodies those points which not only render it capable of doing the very highest grade of work, but which give it durability, thereby securing a minimum of wear.

This machine is massive and strong in its construction, securely braced, as can be seen by the illustration above. The side guides for the head are supported by a cross brace above the head, thereby insuring a true and perfect perpendicular motion. This supports the head so thoroughly that a portion of the machine can be used without displacement of any portion of the needle bar.

The head is connected with operating shaft below by side rods, which are joined to the head by means of a projecting hub, on which the collar of the side rod operates. This removes any possible lateral motion or strain to the perforator head.

The power pulley is large, affording an abundance of leverage for conveying the power.

| | |
|---|----------|
| 28-inch Power Perforator, extra heavy | \$275 00 |
| 24-inch Power Perforator, extra heavy | 250 00 |

Weight, net, 28-inch, 418 lbs. ; 24-inch, 380 lbs.

MONITOR FOOT-POWER ROUND-HOLE PERFORATORS.

This machine makes a perfect perforation, and is durable. One of the chief points of improvement is the fact that the needles are directly under the center of the head, and in line with the side rods. This allows a perfect, even draw with the least possible wear of the pins, die and stripper.

Another important improvement is the stripper. As ordinarily made they are of a flat piece of brass that needs to be of moderate thickness. To obviate this, the same thickness of brass is used for stripper, attached to an angle bar, but it extends behind and two inches upward in the back, positively preventing any springing in the center of the stripper. There is also a bevel on the front edge of the stripper, which enables the operator to see the line of needles at all times before entering the paper.

The bed-plate on which the steel die is placed is made of sufficient weight to allow no spring under the dies.

| | |
|--|----------|
| 24-inch, foot power | \$100 00 |
| 28-inch, foot power | 125 00 |
| Weight, net, 28-inch, 340 lbs. ; 24-inch, 318 lbs. Guaranteed. | |

**GEM TREADLE PERFORATOR.
Made in Four Sizes.**

This machine is made of the best material, has hardened and tempered steel dies, and the perforations are round, as on postage stamps. Needles bent by accident or otherwise can be removed very easily and others inserted, as they are all independent of each other.

One hundred extra needles, one pair of pliers, one screw driver, one file for sharpening needles, and directions for operating, sent with each machine.

| | |
|--------------------------------------|---------|
| Gem, perforates 15 inches | \$40 00 |
| Gem, perforates 20 inches | 50 00 |
| Gem, perforates 24 inches | 60 00 |
| Gem, perforates 28 inches | 70 00 |
| Extra needles, per hundred | 0 50 |

THE ROSBACK POWER PERFORATOR.

This machine is built strong and durable, and makes a perfect perforation. The frame is securely braced and bolted, so as to prevent its being racked or twisted out of shape by transportation or otherwise, causing undue wear on the needles and die. A very excellent feature of this machine, and one that will be appreciated by the operator, is the sliding slotted plates, steel or brass, on front of needle-bar (see cut), which enables him to easily and quickly provide for stubs of checks, etc., rendering a portion of the needles inoperative. To do this, he has but to loosen the thumb screws on the sliding plates, move the plates to a position over that portion of the paper he wishes to perforate, tighten the thumb screws, and the perforator is ready for work.

The needles are thrown slightly off center, in order that the end sliding plate may extend beyond the guide pin, thus enabling the operator to have the same length of adjustment with this point has been overlooked in every other make. The stripper has a heavy flanged back, consequently is stiff and will not spring. The bed on which the die plate is fastened is about one-half inch thick, thus insuring a solid cutting surface.

PRICES.

| | Weight. | With P. & P. Feed Gauge. | Without P. & P. Feed Gauge. |
|----------------------------------|------------------|--------------------------|-----------------------------|
| 28 inches, steam power | 425 lbs. | \$210 00 | \$175 00 |
| 24 inches, steam power | 375 lbs. | 185 00 | 150 00 |

P. & P. PATENT FEED GAUGE.

For any round-hole perforator \$35 00

In ordering this gauge, please state size of your perforator.

ROSBACK HAND PERFORATOR.

This perforator, as is seen in the cut, is a strong and durable machine, and is thoroughly guaranteed as such. It perforates full ten inches, and by turning the sheet makes a perforation of twenty inches across the sheet. It makes a round hole—fifteen to the inch.

The springs are incased in the body of the machine near either end of the needle bar, thereby preventing the bar from tilting or tipping.

The stripper is double-flanged, which renders it stiff and firm, and not liable to spring or careen.

A needle accidentally bent can be removed and another inserted in its place by simply removing the screws A and B, and detaching the needle stop, removing the defective needle and replacing it with a new one—the whole operation requiring but a few minutes' time. In like manner any number of needles can be easily removed so as to perforate any length from 1 to 10 inches. This feature will particularly recommend it to those who know by experience how much time and patience are required to replace defective needles in cheaper machines.

Hand Perforator, 10 inches ; net weight, 65 lbs. \$35 00

FRANKLIN HAND PERFORATOR.

Perforates ten inches, and is provided with gauges on both sides, so that the sheets may be turned and fed in again, making a continuous perforated line of twenty inches. The pins make round holes, like the perforations on a sheet of postage stamps. Fifteen holes to an inch.

Hand Perforator, 10 inches \$25 00

HAND EMBOSSING PRESS.

**For Embossing
Monograms,
Crests, etc., on
Envelopes and
Stationery.**

Embossed work on envelopes, note paper, menus, and other fine stationery, is the most stylish form of printing. The process is simple. Dies cost from \$1.00 to \$5.00, according to elaboration of design. Dies are made of steel. The counter is usually made of bristol board, thin rubber cloth and thin paper, and is fastened to bed-plate with glue or gum arabic. The inks are made from dry colors, mixed with white damar varnish. The ink is smeared over the die, and the face of the die is cleaned of ink, and polished by rubbing on paper. Bronzed effects are obtained by embossing with varnish instead of ink, and dusting on the bronze; superfluous bronze is taken off by dusting with a brush. Any printer can do this work, and thus add a lucrative department to the business.

This press is the best made, and is used by all the leading houses.

| | |
|---|---------|
| Large press, with one die-box and counter | \$75 00 |
| Small press, with one die-box and counter | 60 00 |
| Extra die-boxes, each | 4 00 |
| Extra counters, each | 3 00 |

Weight of large press is 335 lbs.; of small press, 190 lbs. Boxing, \$1.50, net.

Those who have use for one press are advised to purchase the large size, as the other will only take small dies. Largest die taken on large press, 5×4 inches; on small press, 4×3 inches.

FAST GOLD LEAF LETTERING AND STAMPING PRESSES.

Made in two styles. No. 1, illustrated here, is the best press of its kind for small stamping or embossing. Size of platen, 12×12 inches; size of head, 11×11 inches. The wheel at top carries the screw that raises or lowers the head, and the set screw at front binds it firmly. Can be supplied with 19¼ or 26 inches between uprights.

Three stamp-holders, varying sizes; one large chase, one large and one small plate for electros and brass work, one atmospheric gas heater, set of band holders, and assortment of steel fillers for chase, go with each machine.

The No. 2 press, for gas, gasoline or steam, is especially recommended for printing badges. In this press the bed does not slide, and the platen is raised or lowered by screws set in the side frames. Size of head, 12×12 inches; size of platen, 13½×13½ inches. Takes work 14 inches wide and any length.

The head will allow a change of six inches in thickness. One type-holder with chase, two plates for electros, one set of fillers, and an atmospheric gas heater go with each machine.

No. 1 Stamping and Embossing Press, for Steam, Gas or Gasoline.

No. 1, complete, as described . . \$150 00 | No. 2, complete, as described . . . \$75 00

Catalogue of Embossing Dies sent on receipt of 25 cents.

STANDING PRESSES.

Illustrates Standing Presses Nos. 5 and 6, operated with spider and lever.

Illustrates Standing Press, No. 4, with hand wheel at top. No. 3 is same press except that it is operated with spider and lever.

These presses are very strong throughout—in top, base and platen.

No. 2 has two rods, and opens seven inches between bed and platen.

No. 3 has four rods, and opens thirty-seven inches.

No. 4 has four rods, and opens thirty-seven inches.

The Nos. 5 and 6 sizes have six wrought iron rods $1\frac{1}{4}$ inches in diameter. The boxes for main screws are phosphor bronze. The No. 5 opens forty-six inches, and No. 6 opens forty-eight inches. The screw is of $\frac{3}{4}$ -inch steel, and is made all in one piece.

| | |
|---|---------|
| No. 2.—Size 10×16, operated by hand wheel at top, as shown in cut | \$25 00 |
| No. 3.—Size 16×24, operated by a spider and lever | 60 00 |
| No. 4.—Size 16×24, operated by hand wheel at top | 50 00 |

| No. 6.—Size 21×29, operated by a spider and lever | 130 00 |
| No. 6A.—With pawl | 140 00 |

Boxing extra.

STYLE 1-A HICKOK HAND STRIKER RULING MACHINE.

STYLE 1-A Ruling Machine is for use in shops where there is considerable faint or cross ruling, thus economizing the time of automatic strikers used in the same shop. It may also be used in small-sized binderies, where there is not sufficient work for an automatic striker machine. The operator turns the hand crank with the left hand, thus operating the machine by hand, while with the right hand the pen-beam is tilted up and down, doing hand striking. Power may be applied, and steam attachments are furnished to order at an extra charge. Style 1-A is as perfectly built in every part as the most expensive automatic striker ruling machine. The difference in construction is simply leaving off the striker parts and some other necessary pieces required on an automatic striker machine.

STYLE 1 SINGLE BEAM AUTOMATIC STRIKER RULING MACHINE.

STYLE 1 is used for faint or cross-lining when the striker is not operated, and also for down ruling from cross or head lines when the automatic striker is used for the purpose of leaving unruled head spaces by automatically raising the pens from the paper and allowing them again to descend upon the paper, the pens beginning to rule immediately upon touching the paper at a cross head line, and again being automatically raised from the

paper and lowered upon the paper again successively at distances prearranged by the positions of the cams, which are adjusted by the operator, who sets them in the circular-revolving cam-head. This machine is for use on all classes of job ruling.

The illustration shows the combined lay-boy and receiver—a device for receiving the paper (after it is ruled) in the lower portion of the machine. Gears are used in setting the striker—friction devices being avoided because gears are more positive in the correct delivery of both speed and power.

For prices, see next page.

STYLE 1 HICKOK "SINGLE" O-A STRIKER RULING MACHINE.

Having One Patent O-A Automatic Striker Beam.

This machine has ample capacity for the ordinary bindery, and is absolutely complete. The "Duplex" and "Triple" strikers simply add to the capacity, but are not superior in workmanship.

Suggestions.—The style 1 O-A is an excellent machine for the shop having considerable work to be faint-lined and "struck" or "down-lined," and for classes of work where the "striking" is not intricate or from many different head-lines.

Width.—Every machine, where width is not specified in order, will be considered 38 inches between rails. Please specify, however, width clearly in all cases.

Guide-Board.—Unless otherwise specified, guide-boards will be placed on the left side. Please specify, however, the sides in each case.

Furnished Without Extra Charge.—Our new patent "self-locking" O-A angle standards, supplied with the lateral and vertical adjustment; cloth guide; four 32-inch and two 26½-inch clamps (longer clamps on wide machines); set of cams; nest of change gears; ink fountains, with double faucets and carrier rod; right-angle screw adjustment for gate; new style lightning-action gate; adjustable steel cam-plate on pen-rest; foot-rest on lower rail; steam-fixtures; double cone-pulley, giving many different speeds; new elevated string-roll and clamp-rack combined; our new steel adjustable guide, attached to guide-board; change gears on side of machine opposite the ruler; ink-box, with drawer.

STYLE 3 HICKOK "DUPLEX" O-A STRIKER RULING MACHINE.

Having Two Patent O-A Automatic Striker Beams.

This ruling machine, as its name indicates, is the same as the single O-A striker in all respects, but in addition has a second striker beam, or auxiliary striker, with all the necessary parts for tilting the beams and striking automatically at desired points, thus enabling the operator, by manipulating both beams, to strike down-lines from twice the number of distinct head-lines as with the single-beam machines, and to rule with more colors at a time without danger of their mixing, etc.

38-inch machines, boxed, weigh about 1200 pounds.

UNIVERSAL SAWING MACHINE.

This machine fills all the requirements of an accurate, speedy and durable tool. It is simplicity itself, and anyone without previous experience can handle it with ease. It was designed to meet the growing demand of the printer for a thoroughly reliable machine, at a reasonable price, to accurately cut brass rule, leads, slugs, reglet, etc. It is constructed with exceptional care, and has very few working parts and wearing surfaces, all of which are made of the best hardened tool steel. It will saw thick or thin brass rule accurately to absolute type measurements,

with a perfectly square edge and clear, sharp face. One of the special features of the machine is, that it obviates the use of a saw of larger diameter, consequently its work has that degree of accuracy which is not attained by any other sawing machine on the market. It uses a small, rigid, true-ground, hardened steel saw, furnished at 20 cents each, making it cheaper to use a new saw than to have the old one sharpened. This also saves the printer the annoyance and expense of sending out every time his saw needs to be sharpened, and gives him the benefit of a new saw each time for his work. These saws are vastly superior in every way to the ordinary saws now in use.

Another feature of this machine is its gauge. This is made accurately to type measure, and can be set from one-half to fifty Picas, including all the halves in this measure. The Universal is also well adapted for sawing linotype work. Special saws for this work furnished at \$1.00 each.

The height of the machine is 48 inches, and the floor space occupied is 18x24 inches. The machine is made to belt from above or below, as the purchaser desires, but if no instructions upon this point are given, the machine will, in all cases, be sent to belt from above.

Price, net \$30 00

**CHALLENGE
TYPE-HIGH
MACHINE.**

The only device on the market, at a moderate price, that will reduce cuts to type-high, and make them true and even, when they have become warped from any cause. Passing all cuts, or plates mounted on wood, through this machine before the form is sent to press saves one-half the time usually spent in make-ready.

Challenge Type-High Machine, will galley 8x12 inches \$12 00
 Extra Files for Challenge Type-High Machine, each 0 75

PRINTERS' SAW TABLE,

With Shoot-Board Attached.

A very necessary machine in large printing offices. It will saw wood, metal or brass, and will trim wood and metal accurately from the merest shave upward. It affords the quickest and most accurate method of cutting slugs, furniture, thick brass rule and

Attachment for Cutting Linotype Slugs.

plates, and as it is fitted in the most complete manner with gauges, all trimming and cutting is done with perfect trueness and squareness. An at-

tachment for sawing linotype slugs is furnished for \$15.00 extra.

This is a thoroughly well-built machine, equal to similar machines used by electrotypers, made of iron and steel, with accurate adjustable gauges. The saw is raised or

lowered by means of a clamp-screw set under the table. The countershaft is attached to the saw, and should not run less than four hundred revolutions per minute. The driving pulley is 7 inches in diameter, for 2½-inch belt. Size of table is 18×24 inches, height 40 inches, and floor space occupied 24×32 inches.

| | |
|--|---------|
| Saw table with shoot-board | \$85 00 |
| Saw table without shoot-board | 70 00 |

| No. 2. Attachment for sawing linotype slugs, for quick work, extra | 25 00 |

COMBINATION SHUTEBOARD AND TYPE-HIGH MACHINE.

This machine will take blocks of ten inches wide and any length. The carriage or guide frame for plane being movable from side to side while operating, blocks of the full width of the bed can be shaved at one locking. The cuts or plates are laid face downward on the bed, locked, and then shaved until the knife or file cuts no more, when they will be even type-high. If blocks are too low, lay sheets of paper or cards below them to raise high enough for shaving, and afterwards glue these sheets to bottom of cut, or place them between plate and wood.

Patented,
January, 1894;
December, 1895.

Three machines in one—Combination Shuteboard, Type-High Planer, Shaver and Miter Cutter.

For trimming slugs, rules or furniture (wood or metal of any size), cutting miters and squaring the sides of blocks, the guide frame is taken off and the plane used upon the side of the bed. It can be used as a bench vise, being handy for holding blocks when you want to take off or put on an electrotype plate. For warped blocks, the plates should be taken off, both top and bottom shaved and the plate remounted.

| Extra files, each | 0 75 |

THE HORTON MAILER.

THE BEST MAILER ON THE MARKET.

Patented
May 1, 1894
May 9, 1899

This is the best label-pasting mailer. It is quicker and more exact, because all its movements are positive. It is so simple that it can be worked rapidly and efficiently by the inexpert, while experts have addressed with it at the rate of 170 per minute. It is operated, as illustrated, by one hand, leaving the other entirely free to manipulate the papers or wrappers.

It guides and thoroughly pastes the slip, scrapes off all surplus paste, and sticks the label cleanly and firmly. The knives are thin and adjustable, with two cutting surfaces, and can be easily sharpened. The arrangements for adjusting knives with each other and regulating tension of knives are very exact.

It is very strongly made, and is the most durable of mailers.

When ordering mailer, don't forget to give width of mailing slip.

Slip guides furnished from 1 1/8 to 1 7/8 inches; taking all widths of mailing lists, not exceeding 10 1/2 Picas.

Price, with paste strainer, extra knives, screw driver and oil can, packed in a strong wooden box, net \$20 00

MUSTANG MAILER.

This mailer prints directly on the paper or envelope. The platen and its frame moves automatically, printing one address at a time. It will print three-line (8 point) addresses.

The Mustang Mailer occupies a space of 37 inches in length and 4 1/2 inches in width, and is made wholly of iron without springs or complications of any kind.

Speed is regulated solely by the speed of operator in passing the papers to and from the mailer. The mail list is made up in galleys ten ems Pica wide on the inside.

Each galley holds seventy-five addresses. The weight of the machine is fifteen pounds, and of the galleys one pound.

Price \$10 00

MUSTANG MAILING GALLEY.

Zinc bottom \$0 50
Brass bottom 0 75

THE ACME MAILER.

A good low-priced mailer, of which a great many are in use. It is built on the same lines as most of highest-priced mailers.

Price, net \$15 00

McFatrigh Mailing Machine.

The Acme Mailer.

McFATRICH MAILING MACHINE.

Operated by treadle, leaving both hands free to handle the publication. Prints directly on the publication or the wrapper from type on galleys. The galley holding the addresses is moved one address at a time automatically. Speed from 2000 to 3000 per hour.

Patent applied for.

AMERICAN LEAD AND RULE CUTTER No. 3.

Gauge Lock.

WHY IT IS THE BEST.

Micrometer Gauge.

The gauges can be set instantly. They are absolutely positive. They are accurate, and guaranteed to remain so. They can be set to Nonpareils as well as Picas. The front gauge can also be set quickly and positively from one point to forty-eight Picas by points. It is impossible for either gauge to slip, or for material, however thin, to get under the bed gauge. The bed and gauge rods are graduated to Picas and numbered every five ems, the back gauge rod to indicate the measure when extended beyond the end of the bed. The cutting arrangement has no superior, being operated by a compound lever and provided with a shear cut for brass and a straight cut for leads.

The support to the right prevents any sag in the material between the front gauge and the knives. In cutting very short pieces it may be turned back out of the way, as indicated in cut. The machine rests on three feet, which insures a steady support no matter how uneven the surface on which it is placed. For accurate work this machine is without an equal. Material and workmanship the very best.

Capacity of bed gauge, up to 105 ems by Nonpareils; capacity of front gauge, up to 48 ems by points.

Price \$12 00

AMERICAN LEAD AND RULE CUTTER No. 2.

This cutter is the same as the American Lead and Rule Cutter No. 3, with the exception that the front gauge sets to Nonpareils only instead of to points, and is undoubtedly the best machine ever sold at the price.

Price \$10 00

AMERICAN LEAD AND RULE CUTTER No. 1.

This machine is very strong and compact. It is provided with a reversible bed gauge which is held in position as in a vise, the post through which the gauge-rod passes having a narrow slit in the top and a thumb-screw by means of which the rod is clamped quickly and securely. This cutter also has the grooved bed which, with corresponding projections on gauge-head, preclude the possibility of thin material getting under the gauge. The front gauge is held by a thumb-screw, as usual.

Material and construction unsurpassed—in fact, the best \$8.00 cutter made. Capacity of bed gauge, 13½ inches; capacity of front gauge, 6½ inches.

Price \$8 00

HANDY LEAD CUTTER.

Will cut leads and slugs six points thick, and, although not recommended as a rule cutter, will cut two-point brass rule. Has back and front gauges. Leads can be cut very rapidly and easily on this cutter by holding the lever and the handhold on frame in right hand, as in using hand shears. To get the best results this cutter should be screwed to bench or table.

Price \$4 00

CHANDLER & PRICE LEAD AND RULE CUTTER.

The bed and gauge are graduated to Picas.

The bed is nearly vertical, and the lead or rule drops against the gauge edge by gravity, assuring a square cut.

Gauges 14 inches \$8 00

UTILITY LEAD CUTTER.

The strongest cheap lead cutter made. A reliable, cheap tool.

Price \$2 00

LEAD AND RULE CUTTERS.

No. 1 \$8 00
Gauges 12 inches.

No. 2 \$9 00
Graduated to Picas; gauges 12 in.

No. 3 (extra heavy) \$12 00
Bed, 13 in.; graduated to Picas; gauges 18 in.

PATENT UPRIGHT MITER MACHINE.

A strong, well-built, accurate machine. The cutting or shaving head has a positive up-and-down motion, and must cut as much at the bottom as at the top, as it cannot slip. The knife is regulated by set-screw. The sliding gauge is the best of its kind, enabling the operator to feed the rule up to the knife, but affords a positive check at the point where the desired length is reached. The bed is graduated, and is made movable, so that the whole cutting-edge of knife can be used. This machine is mounted in a strong, shallow, wooden box, which catches the shavings, and has at the front end an emery board on which the burr of the rules may be rubbed off.

With Sliding Gauge \$13 00
 With Micrometer Point-System
 Gauge 20 00

PRINTERS' CURVING MACHINE.

On this machine the curves are made by pressure between three iron rollers (two below and one on top), and the pressure is regulated by the screw at left hand side, which acts on a lever that raises or depresses the lower rollers. The action is very rapid, and, in the hands of an expert, accurate.

Price \$15 00

ELITE RULE BENDER.

The blade is tool steel and the cylinders of brass. Bends rule from one to six points in thickness. The end of the rule is firmly held in the grooves in cylinder, and can be twisted into any shape.

Price, with instructions for rule bending \$2 00

THE BEST SAW FOR PRINTERS.

The Universal Sawing Machine, described on page 1048, is specially recommended as the best saw made for accurately cutting brass rule to labor-saving measure. The gauge of this machine can be set from one-half to fifty Picas, including all the halves in this measure.

PRINTERS' SUPPLIES.

BODKINS.

AMERICAN JOB STICK.

This composing stick is constructed upon entirely new lines and is destined to become extremely popular. It is made with a series of notches in the back of the stick with corresponding steel teeth in the knee to engage in them, the knee being clamped to the back of the stick, as indicated in engraving. The knee is made with a diagonal brace which effectually prevents springing. This stick can be set to Nonpareils or Picas quicker and more accurately than any other, and it is impossible for the knee to slip or to spring. Just the thing for accurate tabular work. Has a hole near the end to hang it up by.

PERFECT NEWS STICKS.

Style No. 1.
One depth only—2¼ inches.

These Sticks are made for setting one measure only, either 13 or 13½ ems Pica, and prevent all the annoyances due to variations in Sticks set inaccurately by careless compositors. It is undoubtedly the best Stick made for news measures.

Style No. 1 is made of best malleable iron; the handle and under side are japanned, so that the Stick cannot rust; the pan itself is milled out,

the sides being absolutely square and rigid, and altogether the Stick is as perfect as could be desired. Made one depth—2¼ inches—only, and for 13 or 13½ ems Pica measure.

Style No. 2 is made of the best of steel, and the set bar or knee is riveted firmly to bottom and back of Stick. It is accurate in every respect.

These Sticks are made for 13 or 13½ ems Pica measure, and are 2½ inches deep.

| Extra Tongues for Spring Tongue, "Perfect," or Screw Adjusting Pins, per dozen | 0 25 |
| Gauge Pin Drawers (see illustration at bottom of page), each | 0 25 |

EXPLANATION OF NUMBERS.

No. 1 gauges are 12 points high, with lip $\frac{1}{16}$ -inch long; No. 2, 15 points high, $\frac{1}{16}$ -inch lip; No. 3, 18 points high, $\frac{1}{16}$ -inch lip; No. 4, 12 points high, short lip; No. 5, 15 points high, $\frac{1}{8}$ -inch lip; No. 6, 12 points high, $\frac{1}{4}$ -inch lip. All gauges with tongues are 12 points high.

GOLDEN STEEL GAUGE PIN.

ORIGINAL STEEL GAUGE PIN.

SPRING TONGUE GAUGE PIN.

This is the most satisfactory gauge pin made. It meets almost every requirement of the pressman.

FLEXIBLE SIDE GAUGE PIN.

May be placed directly under the gripper where it comes down upon the tympan. The sheets are fed to the curved spring arm. The pin is made of fine thin steel, and, having teeth, is adjustable and prevents the sheets from slipping under.

EXTENSION FEED GUIDES.

The cut shows the method of securing the guides between platen and platen bail, so that sheets may be fed below the lower edge of the platen.

PERFECT REGISTER GAUGE PIN.

Pastes on like a quad, has a thin steel clip which strikes into tympan and prevents sheets from slipping under gauges, and is adjustable after pasting on.

SCREW ADJUSTING GAUGE PIN.

The prong should be inserted a quarter inch below the feeding line and forced snugly home. The base may be secured to the tympan with paste or glue if desired. The adjustment is got by means of the screw and nut with absolute precision and without weakening the hold of the pin to tympan.

CYLINDER SIDE GUIDE.

Secured to feed-board by the sharp point shown in outline in cut, which is placed at the side of pillar, so that hair adjustments may be got by simply turning the pillar to the desired position. The bendable brass tongue is adjustable in every direction.

GAUGE PIN DRAWER.

Screws on under the feed-board.

PRESS POINTS.

For inserting in wood furniture when sheets are printed for folding machine. Points are screwed into wood with wrench as far as the cross pin will allow, when they will be found to be correct height.

Points, per dozen \$o 75
Wrench o 75

DILLINGHAM PRESS PUNCH.

Patented March 2, 1897.

Is secured to the tympan of platen presses in same manner as a feed guide, and punches a clean hole in card or paper simultaneously with the printing on jobs which have a margin of one inch or more. The method of working this punch is clearly shown in accompanying half-tone. The slightly curved spring is placed under the upper tympan sheet, and the sheet to be punched is fed over this curved

spring and under the punch with no more trouble than in feeding and under the punch to gauge pins. The punch is secured to the tympan by paste or glue or (better still) by a mixture of paste and glue. Two or more punches can be used on one sheet. Punching and printing can be done simultaneously on a variety of work, such as window cards, programmes, orders of dance, souvenirs, etc.

Made with three size holes, Nos. 1, 2 and 3, as per diagram. No. 3 will be sent unless otherwise ordered.

Each, with directions, net \$1 25

ELM CITY PRESS PUNCH.

One or more may be locked in a type form and will cut a clean, round hole $\frac{1}{8}$, $\frac{3}{16}$ or $\frac{1}{4}$ inch in paper or card stock at the same time the job is printed. This punch will not clog, as each piece cut is automatically ejected by the plunger as soon as the impression is released and falls on the floor. The ejector also protects the rollers from any danger of injury from the cutter. The punches are made on 30 and 36 point bodies. All parts being interchangeable, new cutters can be readily fitted in case of accident. The spring for controlling the ejector can also be made stronger by turning screw at bottom. The cutters are made two points lower than type to allow for pasting a small square of cutting fibre, which are furnished with punches, on the tympan.

Per set for cutting $\frac{1}{8}$, $\frac{3}{16}$ and $\frac{1}{4}$ in. holes \$1 50
One punch, any size o 75

Extra cutters, made of finest tool steel, \$o 15
Cutting fibres, per doz o 10

PRESS PUNCH.

This punch is about one thirty-second inch lower than type, and can be locked up in a type form, thus enabling printers to punch holes in stock at the same time it is printed, without extra expense. A piece of 2-point brass rule should be cemented to the tympan sheet for the punch to strike on, and an opening left in the form opposite opening in base of punch to prevent it from becoming clogged. Made of best tool steel, tempered.

For $\frac{1}{8}$, $\frac{3}{16}$, or $\frac{1}{4}$ inch hole, each \$1 00

HEMPEL IMPROVED QUOIN.

The Hempel Quoins are the standard, tested by time and approved by those who use them. This is the latest improved quoin.

IMPROVED BROWER QUOIN.

No. 2 Brower Quoin, actual size.

Has central racks, and consequently will not throw type off its feet. Works smoothly. The key, of steel, with cut teeth, has a firmer and deeper hold than in the old style quoin.

No. O. "Little Samson," actual size.

The No. O, as illustrated, is the smallest wedge quoin ever made, and will prove very valuable for job printers and on occasions when lock-up must be made in small spaces.

UNION LOCKABLE QUOIN.

An exact duplicate of the original Hempel Quoin, with three notches cut in the central rib for the purpose of using the quoin in connection with the Patent Brower Lock, listed below.

No. 1, small, per dozen \$2 50 | No. 2, large, per dozen \$3 00
 Keys, each \$0 50

BROWER QUOIN LOCK.

Fig. 2. The Lock.

The sidewise projection shown in Fig. 2 engages in notches cut in central rib of Union Lockable Quoin, or in the rack teeth of the Brower Quoin (see opposite page). The screw is then set up against the other half of the quoin, effectually preventing it from slipping. Quoins of the wedge principle are all liable on long runs to be loosened by the vibrations of the press. These locks make the lock-up doubly sure. They should be applied by the pressman after he has completed the make-ready and before the run is commenced.

MIDGET SAFETY QUOIN.

Fig. 3. Shows Midget Quoin unlocked.

It is locked by a tap of a mallet, and occupies no more space in length when locked than when unlocked.

Can be used in a space 18 points wide by 120 points long, either outside or inside a form. It is absolutely safe, as when locked it rests against its corresponding flat surfaces, and the harder the surface it bears against the better.

This invaluable quoin may be used to lock up matter inside a brass circle, or oval, or within a solid border, or in places where no other quoin of wood or metal can be used.

Fig. 1 illustrates how this quoin is used in a mortised cut.

Fig. 2. This cut shows extreme expansion of six points when locked.

Fig. 1. Illustrates the method of unlocking.

Price, per dozen, with key, net \$2 00

Price List of Quoins continued on following page.

THE MORTON LOCK-UP.

Rigid. Direct Spread. Quick. Secure.

An iron side-stick with broad bearings, true and square, attached to the best machine-finished steel quoins. The quickest, safest and most complete lock-up—all in one piece.

Place directly against type, putting furniture (if required) between chase and quoin. Give key a half-turn, and—that is all. No skew or spring; no waste of time or patience; and *no quoin can drop out* through carelessness, if any one has sufficient bearing.

The Morton Lock-Ups vary from exact inch measurement to agree (practically) with point lengths.

ACME METAL EXTENSION FURNITURE.

Designed to save time in lock-up forms for job presses. It is quickly handled, and is adjustable according to Picas, extending from two and one-quarter to four inches. When locked up it is perfectly secure.

Price, per set of four . . . \$1 50
Per dozen (three sets) . . . 4 00

NEVER-SLIP QUOIN.

This quoin possesses all the advantages of any other quoin made. It is impossible for this quoin to slip after the form is locked up with it. This alone makes it of great value on fine work where exact register is required.

The Never-Slip Quoin is adapted to any ordinary work. It saves time, saves the imposing stones and the bed of the press. There is no possible chance of it becoming unlocked on the press. The simplicity of this quoin is its strongest feature. It is handled with a key like the ordinary quoin.

PRINTERS' TRUCKS.

Lay Printed Sheets on Trucks and not on the Floor, and thus Save Cost and Loss in Handling.

With platform 34 inches wide by 50 inches long, 11¾ inches high \$16 00

Special prices in quantities. Other sizes at proportionate rates.

Made of hard wood 1¾ inches thick, bolted, varnished. Center wheels, 9¾ inches diameter, 3 inches face. Caster wheels, 4¾ inches diameter, 1¾ inches face. Steel axle, 1¾ inches square, with steel braces 1¼ × ¼ inches. The T-shaped handle is of ¾-inch round steel, and is quickly attached to or detached from two eyelets fixed at each end. Weight, 182 pounds; handle weighs 11½ pounds.

MILLER PERFECT GRIPPER PERFORATOR.

Made of steel, to attach to any platen press. Perforates neatly and cleanly while printing. Does not interfere with impression. There is a half elliptic spring which pushes the perforated sheet off the perforating knife.

- For Eighth-Medium Press, net \$5 00
- For Quarter-Medium Press, net 6 00
- For Half-Medium Press, net 7 00

When ordering it is necessary to state name and size of press.

PERFORATING AND SCORING MACHINE.

This Perforator and Scorer consists of a depressible, or disappearing, interchangeable steel blade (either with perforating or scoring surface), acting in connection with a base plate and lever, all secured within a steel casing and operated by a rubber pressure quad glued to the tympan, which presses against the lever, bringing blade into position just before taking impression.

It locks into the form and saves time, rollers and money by perforating (or scoring) and printing at one impression.

- 1—Creasing Blade.
- 2—Perforating Blade in position to take impression.
- 3—Perforator with Blade depressed.
- 5—Pressure Quad.
- 6—Pressure Quad glued on cardboard.

Made in the following sizes :

| Sizes. | Total length. | Perforates or Scores. | Price. |

| No. 4 | 12 inches | 11 inches | 6 00 |

UNION STORAGE CAN.

For Holding Benzine or Oils.

It is strongly made of galvanized iron and is self-closing. There can be no evaporation, and no fluid can be spilled until the nozzle is opened by means of the spring. A very necessary article in all printing offices which are permitted to have one or more gallons of benzine on the premises. Quite a saving in the cost of benzine and oils will be realized by purchasing in the quantities held by these storage cans, besides avoiding the inconvenience of sending out at frequent intervals to get the ordinary benzine can filled up.

| | |
|------------------------|--------|
| 1-gallon can | \$2 00 |
| 3-gallon can | 2 50 |
| 5-gallon can | 3 00 |

UNION SAFE BENZINE CAN.

This is patterned after the original benzine can, with the addition of a circular plate around the head, near the vent, by mean of which the valve is opened without wetting the fingers. When pressure is removed it closes automatically. The head is attached to the can with a chain, so that it cannot be lost

when unscrewed for the purpose of filling with benzine.

Made of tin. Enamelled red.

Holds one quart, each \$0 75

SUCCESS SAFETY BENZINE CAN.

Made of Brass.

By the use of this safety can leakage of benzine or its vapor is prevented, as the stopper is automatically self-locking—always tightly closed when the can is not in use. The flow of benzine, naphtha or any other fluid is regulated by the pressure of the second and third fingers upon a circular plate on the nozzle; and the adjustment is so perfect that one can pour a single drop, or a full stream, at will. It is also neat and cleanly, for the hands are kept entirely free from contact with its contents. The patent improved stopper is as durable as it is simple. Made of the best material, and carefully finished and adjusted. As a safeguard against loss by fire, this can is an economical and profitable "policy." Benzine is dangerous, but its use is divested of risk where this improved can is employed. It has been put to the test, and proved safe and serviceable in every respect. It may be overturned or placed in any position whatever, and the contents will not spill or overflow. There are no chains or exposed springs.

Approved by the Board of Fire Underwriters.

LAING PATENT GALLEY LOCK-UP.

Attachable to all Brass, Smooth Lined, and Patent Lined Galleys.

A satisfactory, simple, effective lock-up. It may be screwed on any galley; the side stick (which is not beveled) is attached to the lock-up, and has a parallel motion. It is locked or unlocked by pushing the lever up or down by means of a finger knob. The lock-up and the side stick are made of brass.

*If Galley Lock-up is sold separately, the necessary screws for attaching to galley are included in prices given.

PATENT LINOTYPE GALLEY.

This new patent galley is made solely for linotypes, and is the only galley for holding linotype slugs without any side lock-up. A foot clamp is attached to each galley to hold up the matter in taking proofs. This galley will save all the trouble and the loss of time in handling side sticks, getting quoins to fit, or foot slugs to keep the end line from falling over. One side of the galley is made lower, and the inside of the rims so tapered as to allow inserting and taking out the linotype slugs from the side very readily. The galley being only one-half of an inch wider than the matter, is conveniently handled and can be placed on the stone, rack or case without taking

End view, 13 ems wide inside.

up valuable space. On a crowded imposing table, in the rush of making-up, the saving of space is of great importance.

| | |

In ordering, give exact width of columns.

PLATE ZINC STORAGE GALLEYS.

These galleys are shaped in special moulds, the corners reinforced, making them very substantial and durable. They are especially desirable for storage purposes where machine type-setting and Linotype machines are used. The material used is double-rolled plate zinc, especially made for this purpose.

| Single column, $3\frac{1}{2} \times 23\frac{1}{8}$ inches inside, each | \$1 00 |
| Double column, $6\frac{1}{4} \times 23\frac{1}{8}$ inches inside, each | 1 25 |

MAY'S PATENTED LEADER AND SORT BOX.

It occupies a most convenient position on the lower case, thus avoiding the long reach to the upper case. Covering just half the lower-case "e" box, and utilizing all spaces of partitions, etc., it does not obstruct the free use of a single sort in either case. The steel points on under side and two side arms hold the box firmly in position, with no danger of its being upset. The box is made to fit the only place a box can occupy on the case without covering copy or any of the sorts. (See location of box in illustration.)

MAHOGANY AND IRON STEREOTYPE BLOCKS.

Mahogany Blocks are made of the best San Domingo mahogany, thoroughly seasoned, and are first-class in every detail. All blocks are made to order at short notice.

New Style Block, with Improved Side and End Hooks.

IMPORTANT POINTS.

Do not order a set of blocks, nor make up a form of patent blocks for press, until you know the exact size of chase that must hold the blocks, and the thickness and position of its cross-bars. Ascertain also the exact size of paper for which the blocks are intended, and whether the leaves of paper, after printing, are to be cut or uncut, and to be sewed or stitched. In making up blocks, if paper is to be uncut and sewed, allow nothing for loss by waste on the fore edge; if it is to be side-stitched and trimmed, make suitable allowance for margin that will be concealed by wire stitching in binding.

Plain Old Style Block.

CAUTION—To Avoid Errors. In sending orders, give the size of each block outside, and also the size of largest and smallest plate to be worked, *measuring the back of the plate*; or add $\frac{3}{4}$ of an inch to the printing matter, as follows, viz.: If the matter is 3×5 , the blocks should be $3\frac{3}{4} \times 5\frac{3}{4}$ outside, the bevel on the plate being about $\frac{1}{8}$. The hook and pin will take $\frac{3}{8}$ with a little allowance for taking the plate free. All blocks are made $\frac{3}{4}$ -inch thick, unless otherwise ordered.

PRICE LIST OF MAHOGANY STEREOTYPE BLOCKS WITHOUT END HOOKS.

For Platen Presses.

To get the price of blocks with head brass, but no end hook, take the price of the next largest size in Price List. Add 50 cents each for extra hooks and pinions inserted in blocks.

See following page for Price List of Stereotype Sectional Metal Blocks.

WESEL PATENT IRON GROOVED BLOCK

Wesel Patent Iron Grooved Block for Cylinder and Job Presses. This illustration shows the block made to fit job press without chase.

Completely meets the most exacting demands of those who print from plates, especially on three-color process work, and where close register is essential. It is a solid iron block, usually made to cover the maximum printing capacity of a press, $\frac{3}{4}$ -inch high, lined over its surface in squares of one Pica, with diagonal grooves cut in it one inch apart. In these grooves patent hooks are placed in such a way that they will hold any size of plate, allowing very close margins if necessary. No chase or furniture of any kind is needed with this block. Register is obtained quickly and positively. Points for folding machines of all makes are furnished, and can be placed in the correct positions. These blocks are also made for job presses, and in that case roller bearers are attachable, as shown in illustration.

Prices on application. State size of bed of press for which block is required, and also maximum size of form press will print.

STEREOTYPE SECTIONAL METAL BLOCKS

Consist of metal sections, made up of pieces 2x4, 2x8, 4x4, 4x8, and 8x8 ems Pica. Hooks are inserted in the largest sections, which may be arranged on any part of the block, and can be adapted for bed and platen or cylinder presswork. With an assortment of the sections or furniture the printer may, by a proper combination, prepare a set of blocks to take on a page of any size. The weight required for a page can be readily estimated by figuring $3\frac{1}{2}$ ounces to each square inch of back of plate. To extend size of sectional block, in case there is a shortage of sections, metal furniture not exceeding two ems Pica wide may be used. Our standard sectional blocks are made to take plates 11 points in thickness.

Sections with regular margin hook, each, \$1 00 | Brass catches, each \$0 15
 Sections with narrow margin hook, each, 1 10 | Sections or furniture, per pound . 0 25

CHALLENGE NARROW-MARGIN BRASS REGISTER HOOKS

For Three-Color Printing.

These hooks are intended for color printing. Six hooks to each average-size plate. They are placed on all sides of the plate, and by use of a small key the hook on one side is released, and the one opposite is tightened. By this means a plate may be moved the smallest fraction of an inch, and as each plate is registered independently it will be readily understood how easily and quickly a whole form of plates may be made to register absolutely.

We furnish to order sectional blocks in brass or iron, and all kinds of special combination blocks for book and color printing. Estimates on application.

Brass Register Hooks, each 6x6 ems,
 net \$1 25

WEATHERLY EXTENSION BLOCKS.

IRON OR MAHOGANY.

Takes on a Plate any Size. Has all the Good Qualities of the Old-time Patent Stereotype Block and the Great Advantage of being Adjustable to Plates of Various Sizes.

The material and workmanship employed in the manufacture of these Blocks are the very best obtainable. They are made with the utmost precision and are in the front rank of modern inventions for producing the best results in printing.

Fig. 1.—Block Without Extensions.

The cut (Fig. 1) shows the Block without extensions. The four corner sections are separate and made to a standard size, each measuring 2×3 inches, and when placed together, forming the Block as shown, they measure 4×6 inches, and will take on a plate any size from $2\frac{3}{8} \times 4\frac{5}{8}$ to $3\frac{3}{8} \times 5\frac{7}{16}$ inches.

It is often necessary to work narrow margins on plates of small size, and in such cases the Parallel Strips for increasing the Blocks slightly, as by Picas, can be used to great advantage. There are twenty-eight of these strips for each Block, viz.: two pieces each, 1 and 2 ems Pica wide by 12, 18, 24, 36, 37, 38 and 39 Picas long. They are accurately made with rabbeted end (so as not to interfere with the ratcheting), and by their use the Block can be increased in width or length, or both, from one to six ems Pica, beyond which sizes the Crosses meet every requirement.

Fig. 2.—Block Extended in Length Only.

The cut (Fig. 2) shows the Block increased one Pica in length with a Parallel Strip. This can be increased to one inch without altering the width, if desired. Long, narrow plates are easily provided for in this manner. Printers will thoroughly appreciate this easy method of overcoming difficulties heretofore experienced with Blocks "a little too large" or "a bit too small."

There is not only a great deal of satisfaction in having on hand a set of Blocks that will take plates of any size that may come along, but there is obviously great economy in such Blocks. Often profitable work is turned away on account of not having Blocks of the necessary size, particularly if it happens to be an odd size seldom used. Other work is lost by not having Blocks of the desired size nor the time to order them specially made. All of this is a thing of the past—the printer having a set of Weatherly Extension Blocks is always ready, and if he has not purchased them they can be had promptly from stock, in mahogany or iron, at any time.

WEATHERLY EXTENSION BLOCKS.

(Continued.)

The cut (Fig. 3) shows the Block extended, in width only, by use of a Parallel Strip 1 Pica wide by 36 Picas long. This can be increased to one inch without altering the length, thus taking on short, wide plates very conveniently.

Fig. 3.—Block Extended in Width Only.

The three Crosses shown as Fig. 6 are the principal extensions, and fully meet the requirements in all cases, except where narrow margins must be worked. Cross A is $4\frac{1}{2} \times 6\frac{3}{4}$ inches outside, and when used with the corner sections will take any size plate from $3\frac{1}{8} \times 5\frac{5}{8}$ to $3\frac{3}{8} \times 6\frac{3}{16}$ inches. Cross B is $5\frac{1}{4} \times 7\frac{3}{4}$ inches, and with the corner sections takes plates any size from $3\frac{3}{8} \times 6\frac{3}{8}$ to $4\frac{11}{16} \times 7\frac{3}{16}$ inches. Cross C is 6×9 inches, and with corner sections will take plates any size from $4\frac{5}{8} \times 7\frac{5}{8}$ to $5\frac{3}{8} \times 8\frac{7}{16}$ inches. It will be seen that the three regular-size Crosses cover all size plates from $2\frac{5}{8} \times 4\frac{5}{8}$ to $5\frac{3}{8} \times 8\frac{7}{16}$ inches, and all above sizes can be increased at least one Pica each way by using the Pica Parallel Strips in connection with the Crosses.

Fig. 4.—Block Extended Proportionately with Cross.

The cut (Fig. 4) shows the Block extended proportionately by use of Cross A, forming a complete Block $4\frac{1}{2} \times 6\frac{3}{4}$ inches outside. All the Crosses are accurately made, and the corner sections fit snugly. The Block will lock up in a form as well as if made in one solid piece.

No cuts showing Block with Crosses B and C are printed herewith as they are exactly like Cross A, except in sizes, which are given elsewhere.

The cut (Fig. 5) shows Block with a Cross of special large size and extra hook and clamp. In cases where it is desired to work an unusually large plate beyond the scope of Cross C, special Crosses of the size desired must be made to order. There is no limit to the size of special Crosses, which will be supplied promptly at moderate cost. In ordering them give the size of the printed page (type matter) or back measurement of plate to be worked. If hooks and clamps are desired on Crosses, be careful to state the number wanted. Prices of special Crosses, with or without hooks and clamps, quoted upon application.

WEATHERLY EXTENSION BLOCKS.

(Continued.)

The cut (Fig. 6) shows three Extension Crosses, the larger one with hook and clamp. The four recesses in the Crosses are accurately made to a standard size, viz.: 2×3 inches, and the corner sections may always be relied upon to fit any regular or special Cross perfectly.

Fig. 5.—Block with Special Large Cross, showing Extra Hook and Clamp.

There are an equal number of right and left Crosses with each set of Blocks, and they are distinctly marked *R* and *L*, the same as the corner sections, to simplify and facilitate making up the Blocks in forms. The mahogany Crosses are cut out of a solid block of wood, and made with special machinery built to secure the utmost accuracy. While simple in appearance they require the greatest care in manufacturing, and are examined and gauged before being sent out from the factory.

Fig. 6.—Three Extension Crosses.

The cut (Fig. 7) shows a set of thirty-two Blocks, complete with Crosses and Parallel Strips, in a substantial and handsomely made cabinet specially designed to hold them to the best advantage and save them from being lost or damaged. Sets of sixteen Blocks are put up in smaller cabinets in the same manner. The Corner Pieces and Crosses all rest on their edges when in the cabinet, and while in this position are not likely to be affected in any way by undue heat or moisture, as might be the case if left to lay flat on their sides when not in use. The cabinets also contain three compartments for ratchets, etc.

WEATHERLY EXTENSION BLOCKS.

(Continued.)

Fig. 7.—Complete Set of 32 Blocks in Cabinet.

The Iron Weatherly Extension Blocks differ from the Mahogany Blocks in material only. The four Corner Sections and largest Cross are made of iron, the hooks and clamps are brass, and the two small Crosses and Parallel Strips are made of steel bars, all highly finished in a most superior, workmanlike manner.

The Iron Blocks produce the very best results and save much time in making ready, the underlays on the back of plates being more effective when placed between the plate and the rigid iron base. They meet every possible requirement in printing book plates and half-tones. These Blocks are very serviceable in job offices having long runs of circulars, etc., where two, four or eight are run to a sheet, only requiring plates to be made, which are much cheaper than electrotypes mounted on wood. A set of four or eight of these Blocks will soon pay for themselves by the saving on electrotyping and presswork only.

BLOCK WITH DIFFERENT EXTENSIONS.

| | Block Without Extensions. | With Cross A. | With Cross B. | With Cross C. |
|---|---------------------------|-----------------------|--|-----------------------|

Cabinets for 16 Blocks, \$10 00; Cabinets for 32 Blocks, \$15 00.

Four sets of ordinary Stereotype Blocks, at an additional cost of 60 per cent., are required to work the same number and sizes of plates taken on by one set of sixteen Weatherly Extension Blocks.

No more waiting for Blocks to be made to order. These are carried in stock for immediate delivery.

THE VIERLING PATENT TIE-UP.

This is a new labor-saving device for use in the composing room to take the place of page cord. It is not removed from the job or pages when locked into a chase. It can be applied more quickly than cord, and will secure the job or page of type more firmly. When the job is off press and unlocked, it can be set aside without further attention.

For catalogue work, railroad time-tables and rule and figure work, which require changing from time to time, it will greatly facilitate the handling, as forms can be taken apart rapidly and the pages given out to a number of hands for correction.

The Vierling Patent Tie-up is made of steel, exact Pica thick, with brass corner pieces, and is gauged to Pica measurement.

Job fonts contain one square each from twelve to twenty Pica ems inclusive, and one square each of even sizes from twenty-two to sixty-six ems Pica inclusive. The parts being interchangeable, any size between those given can be formed.

Book fonts contain thirty-two complete tie-ups in regular sizes, as given below. Special sizes made to order at regular font rates.

SIZES :

Single job font, 32 sizes, one square each size.

Double job font, 32 sizes, two squares each size.

This will give two and four pages of all sizes except squares.

Book fonts, 38×50 Picas, thirty-two complete tie-ups.

Book fonts, 26×46 Picas, thirty-two complete tie-ups.

Book fonts, 24×42 Picas, thirty-two complete tie-ups.

Book fonts, 16×24 Picas, thirty-two complete tie-ups.

| | |
|---|---------|
| Price, per single font, job or book | \$ 9 00 |
| Price, per double font, job or book | 18 00 |
| Corner pieces, per set of four | 10 |

BESSEMER STEEL CHASES.

These Chases are Unexcelled for Accuracy, Squareness and Strength.

The material used to make these chases is Bessemer steel, which will stand a much greater strain than ordinary iron. They are milled inside, after the chase is welded, by a special milling machine, insuring accuracy not obtained by any other method. These chases are accurate and square, and are guaranteed against breaking or springing.

Bearer chases cost one-half more than regular chases.

Cast steel chases cost one-half more than our regular steel chases.

IMPORTANT.—In ordering chases mistakes will be avoided by observing the following instructions :

Give outside measurements.

Where chase or chases are to fit press, give actual size of bed. An allowance of 1/4 inch will be made in length of chases.

If chases are to be made from other than regular stock, state size desired.

If side sticks are ordered, state whether they are to be straight or beveled, and give length of forms if other than standard newspaper size.

NEWSPAPER CHASES—Folio.

Twin or Folio Chases.

| Number. | Column Folio. | Size of Pair Over All. Inches. | Chase Size Each Outside Inches. | Measurement Length and Breadth Over All. Inches. | Size of Material.† | | | Price of Pair. |

| 60 | 47 | ×66 | 113 | 1 $\frac{7}{16}$ | 1 $\frac{7}{16}$ | 16 45 | 17 45 | 18 45 |

*Width of long cross bars, $\frac{5}{8}$ inch. Width of short cross bars, 1 inch. Thickness of bars, $\frac{5}{8}$ inch.

To Estimate Price of Book Chase, Size not Listed:

Find price of same size Poster or Skeleton chase and add \$4 00 if solid bars only are wanted.

Add \$5 00 if one bar only is to be shifted, and \$6 00 if both bars are to be shifted.

Minimum price of Book chase, with both bars shifting, \$10 50.

For bar only, add \$1 00 to list; for pair of dovetails, add \$1 00 to list; for both, add \$2 00 to list.

For extra stock, charge same as in Poster chases.

See Poster list for figuring measurements ending in fractions.

| 80 | 47 × 66 | 113 | 1 7/16 | 1 1/2 | 1 7/16 | 1 1/2 | 12 45 | 14 45 |

*Width of cross bars, 1 inch. Thickness of bars, 5/8 inch.

To Estimate Price of a Poster Chase, Size not Listed :

Add length and breadth in inches together to obtain measure. Multiply this measure by 11 cents.

For price of News or Poster chase with bar, add \$2 00 to list of Poster without bar.

Minimum price of Poster chase, \$4 50.

For extra bar only, add \$1 00. For extra pair dovetails, add \$1 00.

Measurements ending in fractions to be figured as next full figure. For example: 17 × 20 3/4 in. = 37 3/4 in., figure 38 in.; 33 1/2 × 45 3/4 in. = 79 3/4 in., figure 80 in.; 29 3/8 × 40 1/2 in. = 69 7/8 in., figure 70 in.

CHARGES FOR EXTRA STOCK :

- For each 1/8 in. wider than regular, add for measurement (length and breadth) 40 ins. and smaller . \$0 40
- For each 1/8 in. wider than regular, add for measurement (length and breadth) 41 to 60 ins. incl. . . . 0 65
- For each 1/8 in. wider than regular, add for measurement (length and breadth) 61 to 80 ins. incl. . . . 0 90
- For each 1/8 in. wider than regular, add for measurement (length and breadth) 81 to 100 ins. incl. . . . 1 15
- For each 1/8 in. wider than regular, add for measurement (length and breadth) 101 and larger 1 40
- For 3/4 in. thick stock, add for measurement (length and breadth) 40 ins. and smaller 0 60
- For 3/4 in. thick stock, add for measurement (length and breadth) 41 to 60 ins. inclusive 1 00
- For 3/4 in. thick stock, add for measurement (length and breadth) 61 to 80 ins. inclusive 1 40
- For 3/4 in. thick stock, add for measurement (length and breadth) 81 to 100 ins. inclusive 1 80
- For 3/4 in. thick stock, add for measurement (length and breadth) 101 and larger 2 20
- For extra width and 3/4 inch thick stock, add both of the above advanced charges.

HEADING CHASES.

Estimate Price of Heading Chase, Size not Listed, Same as Poster Chase :

Minimum price of Heading chase without bar, \$4 50.
 For bar and pair of dovetails, add \$2 00.
 Unless otherwise ordered, cross-bar Heading chases will be furnished.
 Figure extra stock same as in Poster chases.
 See Poster list for figuring measurements ending in fractions.

CHASES FOR JOB PRESSES.

Chases for job presses not shown in this catalogue can only be obtained by sending to the factory. Always send name of press and manufacturer's number, and specify whether chase is to be sent direct from the factory by express or freight. We can make new chases using old ones as a pattern at an advance over the prices for Chandler & Price Gordon Chases.

SPIDER CHASES FOR C. & P. JOB PRESSES.

These chases are invaluable for locking up small forms. They require but little furniture, and forms do not spring as is the case when locked up in a large chase.

| Inside Chase. | Price. |
|---|--------|
| 4 × 6 inches, for 7 × 11 press | \$1 00 |
| 4 × 6 inches, for 8 × 12 press | 1 25 |
| 5 × 8 inches, for 10 × 15 press | 1 50 |
| 6 × 9 inches, for 12 × 18 press | 2 00 |
| 7 × 11 inches, for 14 × 20 press | 2 50 |
| 8 × 12 inches, for 14½ × 22 press | 3 00 |

STEREOTYPE CHASES.

The Best Made.

These stereotype chases are made in the most accurate manner, exactly type high, perfectly square and true. The side lock-up screw is attached to the side stick with a collar in such a manner as to enable the operator to lock up and unlock the chases with the wrench, drawing the side stick back and forward instantly, thus saving much time and avoiding the use of shooting stick and mallet, and consequent injury to the side stick. Prices, according to size, furnished on application.

Lock-up wrenches for stereotype chases, price \$2 50

FORM TRUCK.

Both the Form Trucks listed below are of malleable iron. The Union Form Truck is painted red.

The use of a form truck should be insisted on in every press room of any size, not only because it is a time saver, but because sliding chases along the floor is a source of frequent accidents.

| Bingham's Standard, per lb. | \$0 35 |
| Bingham's Durable, per lb. | 0 50 |
| Gem, for Northwest, per lb. | 0 40 |

ROLLER COMPOSITION KETTLE.

Consists of two separate kettles—the inner one to hold the composition, the outer to hold water, which prevents the composition from burning. A large and capacious hood (H) covers half the kettle, as in the cut. In the upper piece of this hood, at the front edge (at S), there is a semicircular aperture, about three-fourths of an inch wide and five-eighths high. This pouring-hole can be wholly or partly closed by a slide (V) of tin sliding in tin grooves. This slide has a ring (V) for the finger, soldered upon its upper surface, by which it is opened or closed. The under edge of the slide has an elliptical scollop in it, so as to give a good shape to the stream when small rollers are cast, when only a small stream should be used. The hood should be high and capacious.

| | |
|--|---------|
| 25-pound kettle, with outer kettle | \$ 7 50 |
| 50-pound kettle, with outer kettle | 11 50 |

STEEL ROLLER SUPPORTERS.

The best bearers yet devised for job presses. They only take up a quarter of an inch of the inside space of a chase, ease the pressure of the rollers on the form, prevent over-inking, equalize the impression, and save the rollers from cutting, as they are 3/8-inch wide on top.

| | Per pair. | | Per pair. |

| For 8×12 chase | 0 45 | For 14 ×20 chase | 0 90 |
| For 10×15 chase | 0 50 | For 14½×22 chase | 0 90 |

UNION TABLETING APPARATUS.

Fig. 1.

In this apparatus paper is held for padding without the use of screws or clamps. The trough (Fig. 1) is V-shaped, and is held at an angle which holds the paper snugly against the sides and the iron base-plate, which forms the bottom of the trough when it is tilted up. The paper in the trough is held under pressure by a heavy iron weight or brick; the trough is tilted up, and is lifted away, leaving the iron base-plate, paper and iron brick as in Fig. 2. The advantage this method has over the

Fig. 2.

tablet presses using clamps is that, by buying extra base-plates and iron bricks, an unlimited number of piles of paper may be put up without waiting for the drying of the cement; thus the capacity of this apparatus surpasses that of other apparatus used for a like purpose, and is equally as well adapted for use in both large and small establishments.

- Complete, with trough, base-plate and hollow iron brick,
size 8½×8½×18 inches; capacity, 6000 sheets . . . \$7 50
- Extra iron bricks, hollow, each 2 00
- Extra iron bricks, solid, each 3 00
- Extra iron base-plates, each 0 75

COTT'S IMPROVED TABLET HOLDER AND CLAMP,

for straightening up and clamping sheets of paper while being glued for tablets. Will hold any quantity up to 3000 sheets of paper, and any size from 2½×2½ to 8½×14 inches.

With an additional clamp and larger press boards almost any size of work can easily be handled.

Accommodates all sizes of commercial stationery and admits of their being glued on one or both sides.

Offices doing a good-sized business should always order one or more extra clamps and sets of boards.

- Tablet holder and clamp, with set of four press boards \$3 25
- Extra clamp and four press boards 1 60
- Extra clamp without press boards 1 25

BINGHAM & RUNGE LIQUID PADDING GLUE.

Made in Red, Purple, Green and Colorless.

The Bingham & Runge Padding Glue was the first put on the market, and it has always maintained its reputation. The best materials are used in its composition, and on this account it does not get rancid. A quart will cement about 100,000 sheets of note size.

| | | | |
|----------------------|--------|-------------------|--------|

LIQUID CEMENT BRUSH.

Made of French bristles, flat and double thick.

| | | | |
|----------------------|--------|----------------------|--------|
| 1 inch | \$0 30 | 2 inch | \$0 55 |
| 1 1/2 inch | 0 40 | 3 1/2 inch | 0 75 |

BINGHAM & RUNGE HERCULES ELASTIC PADDING GLUE.

An elastic, tough, quick-drying preparation, which is applied hot after melting in an ordinary glue pot, and, while entailing more labor, gives better results than the liquid glue. Does not adhere to the edges of sheets as they are removed from the pad, thus preventing tearing of pages in invoice and letter copying books. The color is bright red. Put up in pails, with directions for use on each.

5 pounds in pails . . \$1 50 | 10 pounds in pails . . \$3 00

PAPER COUNTER.

This cut one-fourth actual size.

To make ready for use in pad work, count out number of sheets wanted by hand, on top of which place the plate, then draw the stab up firmly against the paper. The screw in handle holds the stab in place. To operate, place plate on top of lot to be counted and push stab into paper, bearing down at same time.

Price \$0 75

GLUE POT.

1 quart, each \$0 90
2 quarts, each 1 20

TABLET KNIFE.

Made specially for separating pads; extra thin and strong.

Price \$0 50

HERCULES LIQUID OVERLAY.

A substitute for paper overlays, giving a finer, quicker make-ready, and saving lots of time and tedious work. It is put on thinly with a camel's-hair brush, and the first application should be allowed to dry before putting on another, if the first is not heavy enough. It dries very quickly. If the Liquid Overlay is put on too thickly, the overlay is reduced by scraping it with fine emery cloth.

Each pressman should have an independent supply in a small phial suitable for carrying in the vest pocket.

4-ounce bottle, net \$1 25
 8-ounce bottle, net 2 00

Full directions with each bottle.

“BENTROVATO.”

[TRADE MARK.]

Dispels Electricity from Paper on Printing Presses.

A chemical fluid preparation which, applied in a small quantity to the tympan sheet by means of a sponge, cloth or cotton waste, effectually dispels the electricity generated in cylinder presses—a difficulty which results in serious losses to printers.

In all offices where there is a tendency toward this trouble, a bottle of “Bentrovato” will prove as valuable as the proverbial “stitch in time.”

“Bentrovato” is used in a majority of the larger printing offices throughout the United States.

American Type Founders' Co.: Please send me at once by American Express one bottle of “Bentrovato.” I should not like to be without it, even if it cost \$10 per bottle. Our devil knocked over the first bottle you sent us. I bought it with no faith, simply because I was willing to try anything. Our paper was as if possessed by ten thousand devils. The trouble ended at once and completely with the use of the “Bentrovato.”—*WALTER B. SHEPPARD, publisher of the Pan Yan Democrat (founded in 1818).*

Per bottle, net \$0 50

INKOLEUM.

A liquid preparation of world-wide fame for reducing and refining printing inks without impairing the color. It makes intractable inks work smoothly on discs, cylinders and rollers, and, mixed with caked inks, makes them useful again. Handy to have in the press room, as it is invaluable in cases of emergency.

Per bottle, half pound \$0 50

CHESAPEAKE ECONOMY COMPOUND.

The Effective Ink Reducer for both Lithographic and Letter-press Inks.

IT IS PURE.—Chesapeake Economy Compound is absolutely free from mineral petroleum products or acids of any kind, and is perfectly safe. Varnishes may be added, if required.

IT HELPS INKS.—Any kind or color of ink mixed with Chesapeake Economy Compound will not dry on forms or rollers, and will not skin when exposed to the air. Upon being mixed with ink, Economy Compound becomes thoroughly identified with it, and with less weight of ink a solid, sharp print is obtained. Inks mixed with Economy Compound will cover 30 per cent. more paper than if used without it.

IT PREVENTS TROUBLE.—Coated and surface papers will not pull if printed with ink mixed with Economy Compound, and the use of the Compound tends to prevent off-set and to make inks dry quicker on paper. It is not necessary, as a rule, to wash up rollers at night when inks are mixed with Economy Compound, as the inks will not dry on rollers. Economy Compound keeps lithographic stones in good condition, and inks mixed with it lift well from the stone.

BURBANK'S EMBOSSING COMPOSITION.

This is an approved and satisfactory liquid chemical preparation for making counter dies for embossing, which, after exposure for a few minutes to light and air, hardens into a stone-like substance, making a perfect counterpart.

It is easily applied, according to directions printed on every can, and greatly simplifies and cheapens the process of embossing.

Price, net \$0 75

**BURBANK'S
"PRACTICAL GUIDE TO
EMBOSSING."**

This book explains lucidly and gives directions for several processes of embossing. It is the standard work on the subject.

Price, net \$1 00

WHITESON'S EMBOSSING COMPOSITION.

Shows exact size of cake.

This differs materially from other substances used for the same purpose, having among its ingredients certain chemicals which are affected only by heat. It can be readily softened by immersing in hot water. Will harden in three to five minutes, giving ample time to take impression and trim up die. Composition is of stone-like hardness, but not brittle, forming a most effective medium for forcing the paper or cardboard into the interstices of the die. *It can be remelted and used any number of times.*

- No. 1. For light work, per cake \$1 00
- No. 2. For heavy work, per cake 1 00

BRONZING MITTEN.

A convenient appliance for bronzing. Made from sheep's wool, with strong cloth back, and is impervious to bronze.

Each \$0 50

ELM CITY BRONZING PAD.

This has become an article of necessity in the press room. Saves time and bronze, and insures clean work.

 Small, for light work, 2½ inches square 1 50

ADAMSON DISK COVER.

We have sold some hundreds of these useful Disk Covers, and none have been returned. Recommended as savers of ink and time, and approved by all purchasers.

Makes Copying Inks Work Easy.

Cold iron and copying inks repel each other. To avoid trouble, slip an Adamson Disk Cover over your disk. It is made of special cloth, lined with rubber. Iron dries the ink, deadens it, wastes it. The cloth disk gives good distribution, becomes saturated with ink like a stamp pad, and saves 50 per cent. of ink. When job is done, lift off disk cover. Saves washing time, and all the ink in cover is available the next time you use it. In ordering send the exact size of ink disk.

Due Owing to the limited space between edge of disk and chase-latch, these disks cannot be used on Golding Jobber and Pearl Presses.

NUMBER OF LEADS TO THE POUND.

Table showing the approximate number of 2-point and 3-point leads contained in a pound. For 1-point leads, multiply the 2-point columns by 2. For 1½-point leads, multiply the 3-point columns by 2.

| EMS LONG | 2 POINT | 3 POINT | EMS LONG | 2 POINT | 3 POINT | EMS LONG | 2 POINT | 3 POINT | EMS LONG | 2 POINT | 3 POINT |
|----------|---------|---------|----------|---------|---------|----------|---------|---------|----------|---------|---------|

ROMAN NUMERALS.

| | | | | | | | |
|-------|--------|---------|----------|--------|---------|----------|-----------|
| I—1 | VI—6 | XI—11 | XVI—16 | XXX—30 | LXXX—80 | CCC—300 | DCCC—800 |
| II—2 | VII—7 | XII—12 | XVII—17 | XL—40 | XC—90 | CCCC—400 | DCCCC—900 |
| III—3 | VIII—8 | XIII—13 | XVIII—18 | L—50 | C—100 | D—500 | M—1000 |
| IV—4 | IX—9 | XIV—14 | XIX—19 | LX—60 | CL—150 | DC—600 | |
| V—5 | X—10 | XV—15 | XX—20 | LXX—70 | CC—200 | DCC—700 | |

APPROXIMATE NUMBER OF WORDS IN A SQUARE INCH.

In calculating the number of pages a manuscript will occupy, these figures may be used:

| WORDS TO SQ. IN. | | WORDS TO SQ. IN. | | WORDS TO SQ. IN. | |
|----------------------------|----|----------------------------|----|---------------------------|----|
| 18 Point, solid | 7 | 10 Point, solid | 21 | 7 Point, solid | 38 |
| 14 Point, solid | 11 | 10 Point, leaded | 16 | 7 Point, leaded | 27 |
| 12 Point, solid | 14 | 9 Point, solid | 28 | 6 Point, solid | 47 |
| 12 Point, leaded | 11 | 9 Point, leaded | 21 | 6 Point, leaded | 34 |
| 11 Point, solid | 17 | 8 Point, solid | 32 | 5 Point, solid | 69 |
| 11 Point, leaded | 14 | 8 Point, leaded | 23 | 5 Point, leaded | 50 |

“Leaded,” as here used, means an opening of lines with 2-point leads.

USEFUL IN ORDERING SORTS.

In ordering sorts *always* send a cap H and lower-case m of the font you wish to match. These letters should be sent, no matter what the characters are that you wish to purchase. The following table shows what each box in the type case will hold :

| | | |
|---------------------------|----------------------------|------------|
| a c d i s m n h o u t r | boxes, each hold | 2 pounds. |
| f b l v g y p w | boxes, each hold | 15 ounces. |
| k j z x q and all figures | boxes, each hold | 6 ounces. |
| e | box holds | 3 pounds. |
| Caps and small caps | boxes, each hold | 5 ounces. |

TO PRINT CONSECUTIVE NUMBERS.

Orders to print consecutive numbers are received more or less frequently by every printing office, large or small. In the average office, to print the numbers 1 to 200 consecutively would be quite a task, and when undertaken in the ordinary way, with the facilities usually at hand, the cost is so high that the customer usually concludes to get along with something else than printed numbers, and what might be a profitable job is lost to the office.

| A | B | C | D | E | F | G | H | I | K | L |
|---|----|----|----|----|----|----|----|----|----|----|
| 1 | 11 | 21 | 31 | 41 | 51 | 61 | 71 | 81 | 91 | 01 |
| 2 | 22 | 32 | 42 | 52 | 62 | 72 | 82 | 92 | 02 | 12 |
| 3 | 33 | 43 | 53 | 63 | 73 | 83 | 93 | 03 | 13 | 23 |
| 4 | 44 | 54 | 64 | 74 | 84 | 94 | 04 | 14 | 24 | 34 |
| 5 | 55 | 65 | 75 | 85 | 95 | 05 | 15 | 25 | 35 | 45 |
| 6 | 66 | 76 | 86 | 96 | 06 | 16 | 26 | 36 | 46 | 56 |
| 7 | 77 | 87 | 97 | 07 | 17 | 27 | 37 | 47 | 57 | 67 |
| 8 | 88 | 98 | 08 | 18 | 28 | 38 | 48 | 58 | 68 | 78 |
| 9 | 99 | 09 | 19 | 29 | 39 | 49 | 59 | 69 | 79 | 89 |
| 0 | 00 | 10 | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 |

Suppose an order for two hundred reserved seat numbers from 1 to 200, six copies of each. It is not necessary to set up more than the units 1 to 0. These figures are to be set up, properly spaced, one above the other, as shown in column A of the table annexed.

One hundred and twenty impressions are taken on strips of cardboard cut to the required width. This done, gives the required number of units. Change the gauge pins in a manner to print the same form beside the printed figures to form the tens, as shown in column B of the table. Take twelve impressions of this form on twelve of the already-printed strips. The next step is to change the form by taking the top figure (1) and place it at the bottom of the column, so the next impression on a strip of the first form will read as shown in column C of the table. We print again twelve strips of the first form. This change of the top figures, 2, 3, 4, 5, 6, 7, 8, 9 and 0, respectively, is repeated eight more times, shown in the table as columns D, E, F, G, H, I, K and L. From each change twelve impressions on the printed slips containing the first form must be made. This will finish the tens, and by changing the form to ten figure 1s and again moving the pins to the left for the space-width of the type, and printing six strips of each the former changes from B to L, gives the hundreds, or a continuous run of numbers from 1 to 199 in an edition of six copies. To obtain number 200, print upon the six strips left a figure 2 to head the 00 of column B. In assorting the numbers it will be found that each six copies of the heavy type cannot be used, but this small loss in stock is compensated many times by the advantage derived from the method.

PROOFREADER'S MARKS.

- X** Change bad letter.

DIRECTIONS FOR SECURING COPYRIGHTS

Under the Revised Acts of Congress, including the Provisions for Foreign Copyright, by Act of March 3, 1891.

Printed title required. 1. A *printed* copy of the title of the book, map or chart, dramatic or musical composition, engraving, cut, print, photograph or chromo, or a *description* of the painting, drawing, statue, statuary or model or design for a work of the fine arts, for which copyright is desired, must be delivered to the Librarian of Congress or deposited in the mail, within the United States, *prepaid*, addressed "LIBRARIAN OF CONGRESS, WASHINGTON, D. C." This must be done on or before day of publication in this or any foreign country.

What style of print. The *printed title* required may be a copy of the title page of such publications as have title pages. *In other cases the title must be printed expressly for copyright entry*, with name of claimant of copyright. The style of type is immaterial, and the print of a typewriter will be accepted. But a separate title is required for each entry, and *each* title must be printed on paper as large as commercial note. The title of a *periodical* must include the date and number; and each number of the periodical requires a separate entry of copyright.

Copyright fees. 2. The legal fee for *recording* each copyright claim is 50 cents, and for a *copy* of this record (or certificate of copyright under seal of the office) an additional fee of 50 cents is required, making \$1 if certificate is wanted, which will be mailed as soon as reached in the records.

For publications which are the production of persons not citizens or residents of the United States, the fee for recording title is \$1, and 50 cents additional for a copy of the record. Certificates covering more than one entry in one certificate are not issued.

Two copies required. 3. Not later than the day of publication in this country or abroad, two complete copies of the best edition of each book or other article must be delivered, or deposited in the mail within the United States, addressed "LIBRARIAN OF CONGRESS, WASHINGTON, D. C.," to perfect the copyright.

The freight or postage must be prepaid, or the publications inclosed in parcels covered by printed Penalty Labels, furnished by the Librarian, in which case they will come

Free by mail. FREE by mail (*not express*), without limit of weight, according to rulings of the Post Office Department. Books must be printed from type set or plates made in the United States; photographs from negatives made in the United States; chromos and lithographs from drawings on stone or transfers therefrom made in the United States.

To be American made.

Penalty. Without the deposit of copies above required the copyright is void, and a penalty of \$25 is incurred. No copy is required to be deposited elsewhere.

New editions. The law requires one copy of each new edition, wherein any substantial changes are made, to be deposited with the Librarian of Congress.

Notice of copyright to be given by imprint. 4. No copyright is valid unless notice is given by inserting in every copy published, on the title page or the page following, if it be a book; or if a map, chart, musical composition, print, cut, engraving, photograph, painting, drawing, chromo, statue, statuary or model or design intended to be perfected as a work of the fine arts, by inscribing upon some portion thereof, or on the substance on which the same is mounted, the following words, viz.: "*Entered according to Act of Congress, in the year—, by—, in the office of the Librarian of Congress, at Washington,*" or, at the option of the person entering the copyright, the words: "*Copyright, 19—, by—*."

Claimant's name to be printed. The law imposes a penalty of \$100 upon any person who has not obtained copyright who shall insert the notice "*Entered according to Act of Congress,*" or "*Copyright,*" etc., or words of the same import, in or upon any book or other article.

Penalty for false claim.

Translations and dramas.

5. The copyright law secures to authors and their assigns the exclusive right to translate or to dramatize any of their works; no notice or record is required to enforce this right.

Duration of copyright.

6. The original term of copyright runs for twenty-eight years. *Within six months before* the end of that time, the author or designer, or his widow or children, may secure a renewal for the further term of fourteen years, making forty-two years in all. Applications for renewal must be accompanied by a printed title and fee, and by explicit statement of ownership in the case of the author, or of relationship in the

Renewals.

case of his heirs, and must state definitely the date and place of entry of the original copyright. Within two months from date of renewal the record thereof must be advertised in an American newspaper for four weeks.

- Time of publication.** 7. The time of publication is not limited by any law or regulation, but the courts have held that it should take place within a reasonable time. A copyright may be secured for a projected as well as for a completed work ; but the law provides for no *caveat* or notice of interference—only for actual entry of title.
- Assignments.** 8. Copyrights are assignable by any instrument of writing. Such assignment, to be valid, is to be recorded in the office of the Librarian of Congress within sixty days from execution. The fee for this record and certificate is \$1, and for a certified copy of any record of assignment \$1.
- Copies or duplicate certificates.** 9. A copy of the record (or duplicate certificate) of any copyright entry will be furnished, under seal of the office, at the rate of 50 cents each.
- Serials or separate publications.** 10. In the case of books published in more than one volume, or of periodicals published in numbers, or of engravings, photographs or other articles published with variations, a copyright must be entered for each volume or part of a book, or number of a periodical, or variety, as to style, title or inscription, of any other article. To *complete* the copyright on a book published serially in a periodical, two copies of each serial part, as well as of the complete work (if published separately), should be deposited.
- Copyright for works of art.** 11. To secure copyright for a painting, statue or model or design intended to be perfected as a work of the fine arts, a definite title and description must accompany the application for copyright, and a mounted photograph of the same, as large as "cabinet size," mailed to the Librarian of Congress not later than the day of publication of the work or design.
- Fine arts.** The fine arts, for copyright purposes, include only painting and sculpture, and articles of merely ornamental and decorative art should be sent to the Patent Office, as subjects for design patents.
- No labels or names copyrighted.** 12. Copyrights cannot be granted upon trade-marks, nor upon names of companies, libraries or articles, nor upon an idea or device, nor upon prints or labels intended to be used for any article of manufacture. If protection for such names or labels is desired, application must be made to the Patent Office, where they are registered, if admitted, at a fee of \$6 for labels and \$25 for trade-marks.
- Foreign or international copyright.** 13. The provisions as to copyright entry in the United States by foreign authors, etc., by Act of Congress approved March 3, 1891 (which took effect July 1, 1891), are the same as the foregoing, except as to productions of persons not citizens or residents, which must cover return postages, and are \$1 for entry, or \$1.50 for entry and certificate of entry (equivalent to 4s. 5d. or 6s. 7d.). All publications must be delivered to the Librarian at Washington free of charge. The free penalty-labels cannot be used outside of the United States.
- Fees.** The right of citizens or subjects of a foreign nation to copyright in the United States extends by Presidential proclamations to Great Britain, France, Belgium, Switzerland, Germany, Italy, Denmark and Portugal.
- Full name of proprietor required.** 14. Every applicant for a copyright should state distinctly the full name and residence of the claimant, and whether the right is claimed as author, designer or proprietor. No affidavit or witness to the application is required.

METRIC SYSTEM OF WEIGHTS AND MEASURES.

In use in all European countries except Great Britain and Russia. In use in Mexico and South America.

The Meter, unit of length, is nearly the ten-millionth part of a quadrant of a meridian, of the distance between equator and pole. The International Standard Meter is, practically, nothing else but a length defined by the distance between two lines on a platinum-iridium bar at 0° Centigrade, deposited at the International Bureau of Weights and Measures, Paris, France.

The Liter, unit of capacity, is derived from the weight of one kilogram pure water at greatest density, a cube whose edge is one-tenth of a meter, and, therefore, the one-thousandth part of a metric ton.

The Gram, unit of weight, is a cube of pure water at greatest density, whose edge is one-hundredth of a meter, and, therefore, the one-thousandth part of a kilogram, and the one-millionth part of a metric ton.

One silver dollar weighs 25 grams, 1 dime = 2½ grams, 1 five-cent nickel = 5 grams.

THE METRIC SYSTEM SIMPLIFIED.

The following tables of the metric system of weights and measures have been simplified as much as possible by Mr. John Wilkes, of Nashville, Tenn., by omitting such denominations as are not in practical, everyday use in the countries where the system is used exclusively.

TABLES OF THE SYSTEM.

LENGTH.—The denominations in practical use are millimeters (mm.), centimeters (cm.), meters (m.), and kilometers (km.).

10 mm. = 1 cm.; 100 cm. = 1 m.; 1000 m. = 1 km.

A decimeter is 10 cm.

WEIGHT.—The denominations in use are grams (g.), kilos* (kg.), and tons (metric tons).

1000 g. = 1 kg.; 1000 kg. = 1 metric ton.

CAPACITY.—The denominations in use are cubic centimeters (c.c.), and liters (l.).

1000 c.c. = 1 l.

A hectoliter is 100 l. (seldom used).

Relation of capacity and weight to length: A cubic decimeter is a liter, and a liter of water weighs a kilo.

APPROXIMATE EQUIVALENTS.

A meter is about a yard; a kilo is about 2 lbs.; a liter is about a quart; a centimeter is about ½ inch; a metric ton is about the same as a ton; a kilometer is about ½ mile; a cubic centimeter is about a thimbleful; a nickle weighs about 5 grams.

* Contraction for kilogram.

IMPOSITION OF FORMS.

HINTS ON IMPOSITION: A Hand-book for Printers. By T. B. Williams. Leather, 90 pp., \$1.00. For sale at all Branches of the American Type Founders' Company, and recommended to all who desire the fullest information concerning the imposition of forms.

The make-up should learn to use the measuring rule or tape measure and dividers. They are more convenient to measure with than paper, and their use is regarded as evidence of knowledge of the imposition of book forms. The dividers will enable the make-up to verify his measurements quickly. Printers' dividers cost 85 cents.

Ascertain what furniture will be required for the margins of a book form before placing it upon the stone. Time will be saved, and the work will have the appearance of order and neatness.

After a book form is imposed, tighten the quoins, and ascertain by means of a straight-edge or square if the pages are of equal length and the head lines or bottom folios are exactly in line. The folios are usually the guides for hand-folding and should receive great attention, otherwise the binder will not secure good register. For the same reason, folios should all be set exactly in the middle of the width of the page.

After a book form has been locked up, it should be tested for squareness with a square. Forms are liable to get twisted or bowed in locking up, especially if the chase is weak. This defect can usually be remedied by loosening the quoins on one side and tightening them on the opposite side.

MARGINS.

The proper allowances for head and back margins are matters of judgment and preference to a great degree.

The head and foot margins of a *trimmed* book are usually of equal proportions, but, as the binder will almost invariably find it necessary to cut off more paper from the foot than from the head, the make-up must make sufficient allowance for this extra trim.

When the pages have running heads one-third or less shorter than the width of the page, one-half of the space occupied by the running head should be thrown into the head margin, because the white around the running head is to be considered as part of the head margin. If a folio only is used over a page, the head margin is to be calculated from the top line of the page.

The make-up must know whether a book is to be wire-stitched through the back or sewed through the fold. If wire-stitched through the back, an extra allowance *additional* to the back margin required must be made a little in excess of the space used by the wire. This space varies according to thickness of the book, but is rarely less than three-sixteenths of an inch on *each side* of the back margin, or three-eighths of an inch in the back gutters.

In forms of 32 pages or more it is advisable, where it is possible, to impose the pages so that the sheet may be cut and folded in signatures of half the number of pages, especially when the paper is heavy; but if the form is imposed to fold as one complete signature then it is advisable to deduct enough from the back margin of the inner sections to equal the extra space taken up by the fold of the outside sections.

In imposing forms of 12 or 24 pages, great care must be taken to get the foot and head margins of the inset to be folded in exactly right, and the head and foot margins in such forms should be as evenly divided as possible. More accurate register is obtained when the inset is cut off and folded separately.

TESTING MARGINS.

After the proper head and back margins have been decided on, and the pages arranged to conform to them, the form should be tested to ascertain if the foot and front margins are correct. The method is illustrated in the accompanying diagram of a section of a 16-page form. Fold a sheet to quarter of the size of the untrimmed paper to be used. The distance from the foot of page 16 to the foot of page 10 must agree with the length of the quarter sheet (as indicated by the dotted line), and the distance from the back edge of page 7 to the back edge of page 11 must correspond with the width of the quarter sheet. This test can be made just as well by using a measuring rule or tape, in which case, if the quarter sheet were twelve inches wide by eighteen inches long, the distance from the front edge of page 12 to the front edge of page 8 must be exactly twelve inches, and the distance from the foot of page 7 to the foot of page 1 must be exactly eighteen inches.

GRIPPER MARGINS.

As applied to book forms, the space between the type and the outer edge of the chase at the gripper side is the gripper margin. A gauge showing the gripper margin of each press should be obtained from the pressman. When the paper is placed in its correct position on the type form the distance between the edge of the paper and the edge of chase should be at least half an inch less than the gripper margin, to permit the pressman to move his form into a suitable place. To make a proper allowance for gripper margin, it is often necessary to place more furniture in the foot margins on the side of the long cross-bar next the gripper than on the other side. The lowest folio of a form should be placed next the gripper edge.

CORRECT IMPOSITION OF LENGTHWISE CUTS AND TABLES.

The correct rule is that lengthwise tables and cuts shall always read from the foot of page. When a lengthwise cut or table is on one page and the explanatory or descriptive matter on the opposite page, then the cut or table should, if possible, be placed on the page with the even folio.

TESTS OF CORRECT IMPOSITION.

As a general rule, except where for convenience in folding, certain forms are imposed from the center, the lowest (first) folio of a form is placed on the lower left-hand corner. All odd folios are always at the left-hand of the make-up, as viewed from the foot.

The odd and even folios of pages which are side by side in a correctly imposed regular form will, when added together, form a total of one more than the number of pages in a signature. The first and last pages of a signature are always placed side by side—as, for instance, in a 16-page form, where folios 1 and 16 equal seventeen.

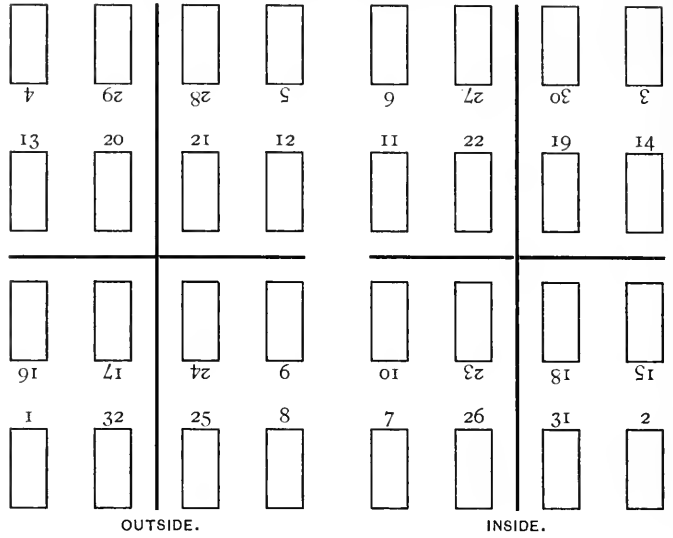

PRESS POINTS.

These are used in forms that are imposed for books, the sections of which are folded by machines. In 16-page forms these points are usually placed exactly 15 inches apart—7½ inches each way from the center of the first fold. The sheets are fed into the folding machine by the point holes to insure register, and the points should be placed exactly in accordance with the instructions of the bookbinder.

EIGHTS, IN TWO FORMS.

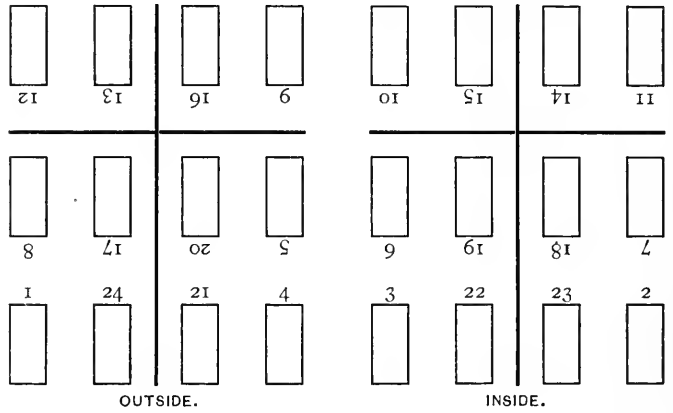

THIRTY-TWO PAGES IN TWO FORMS.

EIGHTS, WORK AND TURN.

TWENTY-FOUR PAGES, IN TWO FORMS.

TWELVE, WITHOUT CUTTING.

SIXTEEN PAGES, IN TWO FORMS.

SIXTEEN, WORK AND TURN.

BROAD EIGHTS. IN TWO FORMS.

SIXTEEN PAGES, DEEP WAY.

TWELVE PAGES, BROAD WAY.

In this form pages 3, 4, 9 and 10 are folded in. May frequently be used to advantage on booklets and catalogues.

SIXTEEN PAGES, DEEP WAY.

For booklets. Paper should be trimmed before printing.

TWELVE PAGES, DEEP WAY.

This method is convenient only for deep pages, such as an odd-sized booklet, and the same size of paper used on the two regular forms for twelve pages may be used. Paper should be trimmed.

SIXTEEN PAGES, BROAD WAY, IN TWO FORMS.

TWELVE PAGES, WITH OFF-CUT.

EIGHTEEN PAGES.

When the first side is worked off, transpose pages 11 and 8 in place of 7 and 12, and 7 and 12 in place of 11 and 8.

EIGHTEEN PAGES, WITHOUT TRANSPOSITION.

IMPOSITION OF FOLDERS.

The margins of folders are usually equal all around each page, and consequently accuracy in make-up and imposition is necessary. When the sheet is to be backed, turn it the broad way, toward the folio 2. Before printing, paper should be trimmed.

SIXTEEN-PAGE FOLDER.

TWELVE-PAGE FOLDER.

SIX-PAGE FOLDER.

EIGHT-PAGE FOLDER.

FORMS IMPOSED FROM THE CENTER.

This method of imposition is preferable in forms containing title page, copyright notice and other introductory pages with very little matter in them, as it brings the full pages outside, where they serve as bearers and often prevent slurring.

SIXTEEN PAGES, IMPOSED FROM CENTER.

EIGHT PAGES, IMPOSED FROM CENTER.

TWENTY-FOUR PAGES, IMPOSED FROM THE CENTER, IN TWO FORMS.

SIXTEEN PAGES, IMPOSED FROM CENTER.

TWELVE PAGES, IMPOSED FROM CENTER.

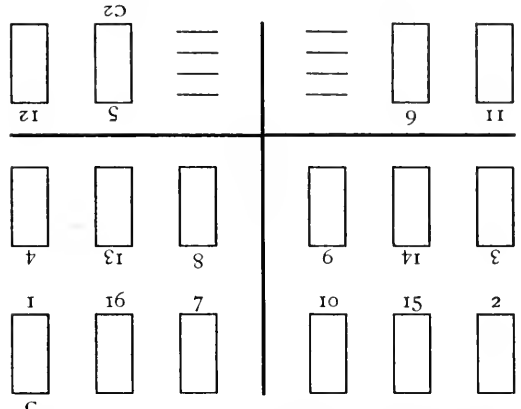

TWENTY PAGES.

Printed on double demy or double royal. This method makes a square page, suitable for booklets, where oddity is looked for.

**EIGHTEEN PAGES,
TWO OF WHICH ARE BLANK.**

When the first side is worked off, transpose pages 7 and 10 in place of 9 and 8, and pages 9 and 8 in place of 7 and 10.

TWENTY-FOUR PAGES, DEEP WAY.

A very satisfactory form, in common use for pamphlets. Careful division of the margins is necessary, the pressman allotting the exact margin to the edge of the sheet to be folded in. Points placed as shown will assist the binder, and should be removed before backing the sheet.

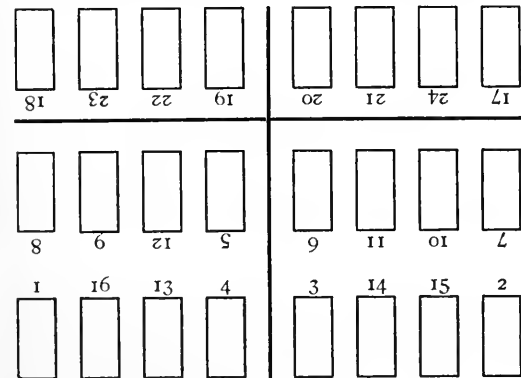

TWENTY-FOUR PAGES, WITHOUT CUTTING.

TWENTY-FOUR PAGES, BROAD WAY

TWENTY-FOUR PAGES, WITHOUT INSET.

FORTY PAGES, WITH TWO SIGNATURES.

The larger signature folds same as a 32-page form. The smaller signature is an inset.

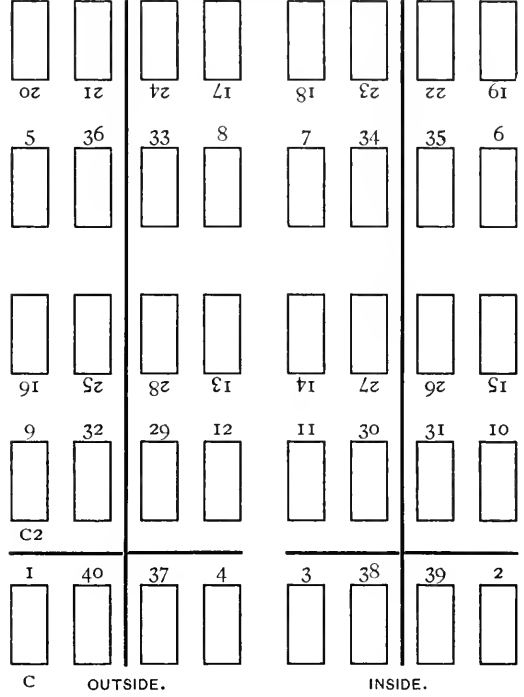

FORTY PAGES, ONE SIGNATURE.

The paper must be trimmed at ends before printing. A point should be placed where shown, about $\frac{1}{32}$ inch from the fold, encroaching on main section of form—the pressman to deduct this space from the edge of sheet, which is folded toward the form. The division of margin must be accurate, especially at head and foot of pages.

FORTY PAGES, WITH TWO SIGNATURES.

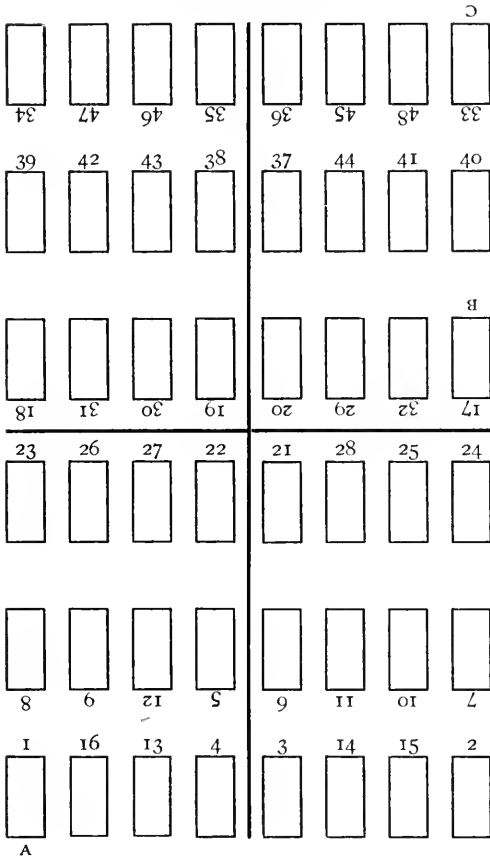

In this form there is an outset of pages, 1, 2, 3, 4, 37, 38, 39, 40, instead of an inset.

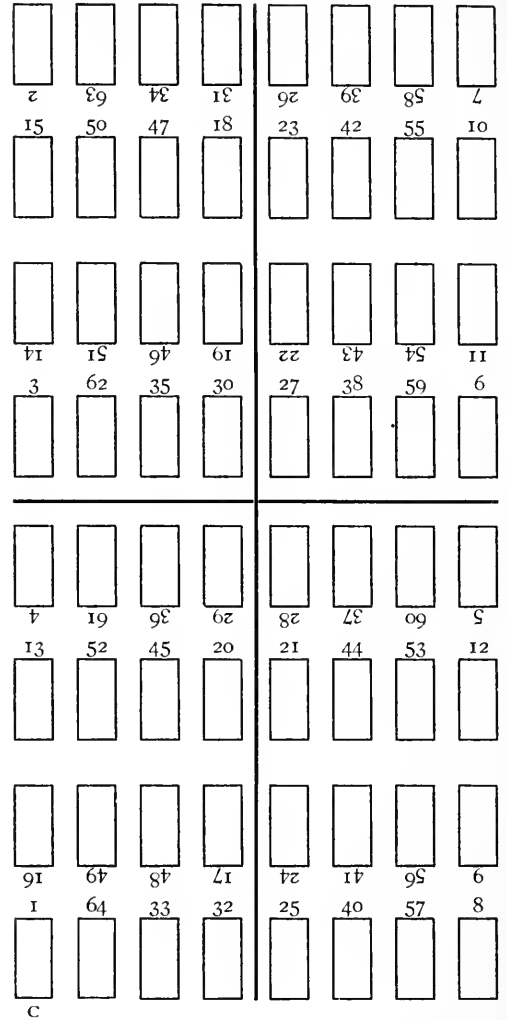

FORTY-EIGHT PAGES, WITH TWO SIGNATURES.

FORTY-EIGHT PAGES, WITH THREE SIGNATURES.

SIXTY-FOUR PAGES IN ONE SIGNATURE.

SIXTEEN PAGES, FOR HEBREW WORK, IN TWO FORMS.

SIXTEEN PAGES, TWELVE OF ONE JOB AND FOUR OF ANOTHER, IN TWO FORMS.

PRICE LIST OF PRINTING AND BINDING: A GUIDE FOR CHARGING.

Compiled by DAVID RAMALEY, St. Paul, Minn.

Copyrighted by David Ramaley, 1896.

The object of this publication is to unify prices, and to form a basis for agreements among printers in figuring on competitive work. The prices given are supposed to be fifty per cent. above the actual labor and material cost of the work, with ordinary conditions. The variable factor of general expense is only figured in the labor expense, because the paper or other stock used has a special expense of cutting and counting and handling equal to the proportion of general expense charge. *Twenty per cent. off from these prices will not leave twenty per cent. profit in all cases*, because sharp competition has forced down the prices of many kinds of commercial printing. A discount of twenty per cent. from the prices, in a general way, is supposed to leave twenty per cent. profit, but the factor of general expense must be considered.

INDEX TO RAMALEY'S PRICE LIST.

| | PAGE | | PAGE |
|--|------------|---|------------|
| Abstracts of title | 1122 | Delegate or nomination tickets | 1123 |
| Advertising matter | 1118, 1122 | Deposit books, bankers | 1137 |

SAFE BASIS ON WHICH TO DO A PROFITABLE BUSINESS.

[Adapted from the Code of Ethics of the United Typothetæ of America.]

The expense of doing business, such as the wear and tear of material, interest on money invested, bad debts, rents, taxes, insurance, book-keeping, and all other items of expense, should be ever before our eyes, and we should never forget that these must be as surely levied on each particular job as its labor costs.

Always have the courage to ask for a fair remuneration for any work offered, resting assured that it will be more profitable to be without a job than to secure one in which there is a temptation to resort to questionable methods in order to avoid a financial loss in its execution.

A master printer should always contend that he is entitled, when asked for an estimate, to know the names of all who are to be requested to bid on the work. He should also insist upon his right, if he desires it, to know all the prices offered for the work and to whom and at what price it was awarded.

A master printer should not make estimates for work that he cannot do. It is always unsafe and often unjust to give prices upon a class of work upon which the cost is not positively known and has to be guessed at.

Estimates calling for detailed specifications of separate value of the paper, composition, electrotyping, presswork, ruling, binding, etc., should always be refused.

EXPLANATORY.

The prices under the several divisions of each list, such as "100," "250," "1000," include all regular charges for labor and material to the customer unless otherwise stated, and when there is a variable factor in such prices the amount estimated for such variable factor is quoted, so that the printer can readily adjust the price in accordance with the conditions governing the work. For instance, on page 1122, in Advertising Programmes, the variable factor is composition. The price for 100 4-page Advertising Programmes on 22x32 quarto print paper is \$18.25, on the basis of 8-point composition, in which amount is *included* a charge of \$17.20, for composition at \$4.30 per page. Now, if composition should be based on 10 Point, *deduct* the difference in cost, and if on 6 Point, *add* the difference. In other instances the variable factor is the cost of paper.

We figure composition at 70c. per 1000 in all work, including locking up or making up, and at 60c. per hour for time work.

Paper is included in these prices at an average advance of 50 per cent. on cost, unless otherwise stated; but this includes storage, handling, wastage and cutting—items that are never paid for if the printer only adds 10 or 15 per cent. to cost of paper.

COMPOSITION.

To be figured at 70c. per 1000 ems, and time work 60c. an hour.

Alterations to be figured separately from composition, and charged at the hour rate.

Open Advertising Matter on newspapers or programmes to be measured as 8 Point.

Standing Type, 1c. per square inch per month.

COMPOSITION VALUES ON MISCELLANEOUS FORMS.

Compare figures with time ; estimates to include lock-up.

PRESSWORK.

The value of presswork is a difficult problem, because there are so many different grades of work. The prices in the following tables represent the value of good work. Since the introduction of plated papers and half-tone work rates may not be large enough for the best service, but on the average of work in an office the figures ought to be considered as fair and reasonable.

Flat papers.

| | 100 | 250 | 500 | 1000 | ADDED 100 |
|------------------------------------|--------|--------|--------|--------|-----------|
| Double medium | \$1.75 | \$2.10 | \$2.60 | \$3.50 | \$0.18 |
| Double cap | 1.50 | 1.75 | 2.10 | 2.85 | .13 |
| Folio post | 1.00 | 1.30 | 1.60 | 2.35 | .13 |
| Flat cap | 1.00 | 1.30 | 1.60 | 2.35 | .13 |
| Half folio | 1.00 | 1.30 | 1.60 | 2.35 | .13 |
| Half cap | .75 | .90 | 1.15 | 1.65 | .08 |
| Quarter folio, long form | 1.00 | 1.30 | 1.60 | 2.35 | .13 |
| Quarter folio, regular | .75 | .90 | 1.15 | 1.65 | .08 |
| Quarter cap | .75 | .90 | 1.15 | 1.65 | .08 |
| Smaller sizes | .60 | .75 | .90 | 1.30 | .06 |

Print and cheap book.

| | 100 | 250 | 500 | 1000 | ADDED 100 |
|---------------------------------------|------|------|------|------|-----------|
| 38 x 50 | 2.00 | 2.50 | 3.00 | 4.50 | .28 |
| 36 x 48 | 2.00 | 2.50 | 3.00 | 4.25 | .26 |
| 32 x 44 | 2.00 | 2.50 | 3.00 | 4.00 | .24 |
| 28 x 42 | 2.00 | 2.50 | 3.00 | 3.50 | .22 |
| 25 x 38 | 1.75 | 2.25 | 2.75 | 3.00 | .18 |
| 22 x 32 | 1.75 | 2.25 | 2.75 | 3.00 | .15 |
| Medium and folios | 1.00 | 1.30 | 1.60 | 2.35 | .13 |
| Half folio and caps | 1.00 | 1.30 | 1.60 | 2.35 | .10 |
| Half cap and quarter folios | .75 | .90 | 1.15 | 1.65 | .08 |

Book-work.

| | 100 | 250 | 500 | 1000 | ADDED 100 |
|-------------------|------|------|------|------|-----------|
| 38 x 50 | 2.50 | 3.00 | 3.75 | 5.00 | .30 |
| 36 x 48 | 2.50 | 3.00 | 3.75 | 4.75 | .28 |
| 32 x 44 | 2.50 | 3.00 | 3.50 | 4.50 | .25 |
| 28 x 42 | 2.50 | 3.00 | 3.50 | 4.00 | .23 |
| 25 x 38 | 2.00 | 2.50 | 3.00 | 3.50 | .20 |
| 22 x 32 | 2.00 | 2.40 | 2.75 | 3.25 | .17 |
| 19 x 25 | 1.50 | 2.00 | 2.50 | 3.00 | .14 |

Half-tone work on highly-finished or plated papers add 25 per cent. to book-work scale.

Bronze work, double presswork.

BASIS FOR FIGURING VALUE OF PAPER.

The basis for figuring the value of paper will be 50 per cent. on the cost price. This price is to include the proportionate cost of general expense and handling in every way—the opening, cutting, and repacking and waste.

Unless there is a special determination by the customer as to the quality of papers, figures will be based on grades of book and writing papers as follows:

| | | | |
|--|----|---|----|
| Print paper, 2¾c., to be figured at | 4½ | Tub sized, 11c., to be figured at | 18 |
| Colored print, 4c., to be figured at | 6 | Water marked, 13c., to be figured at | 20 |
| Common book, 4c., to be figured at | 6 | Linen, 14c., to be figured at | 21 |
| S. & C. book, 4½c., to be figured at | 7 | Fine linen, 16c., to be figured at | 24 |
| S. & S. C. book, 5c., to be figured at | 7½ | Superfine linen, 18c., to be figured at | 27 |
| Plated book, 8c., to be figured at | 12 | Pure linen, 21c., to be figured at | 30 |
| Manilla, 4¾c., to be figured at | 6½ | Crane's linens, 24c., to be figured at | 35 |
| Engine sized, 7c., to be figured at | 11 | | |

PRINTERS' VALUE OF 1000 SHEETS PAPER OF THE WEIGHT DESIGNATED AT TOP OF COLUMN.

The basis for figuring the value of paper is 50 per cent. on the cost price.

| | 12-LB. | 14-LB. | 16-LB. | 18-LB. | 20-LB. | 22-LB. |
|--------------------------------|--------|--------|--------|--------|--------|--------|

| In two colors | 5.50 | 6.35 | 7.75 | 10.50 | .55 |

The most effective plain posters are printed on yellow paper, the value of paper being 80c. per 100 full sheets.

On 24×36 paper the difference is so slight, except in large quantities, that the same price should prevail. In 1000 orders a discount of 10 per cent. may be made.

DELEGATE OR NOMINATION TICKETS.

For conventions in separate lots of 500.

| 500 | 1000 | 1500 | 2000 | ADDED 1000 |
|--------|--------|--------|--------|------------|
| \$1.25 | \$1.50 | \$2.00 | \$2.25 | \$1.00 |

HALF-LETTER OR QUARTER-FOLIO CIRCULARS.

No form rated at less than \$1.00. The figures in this table are based on 10 Point and \$2.00 for composition. The value of a full page of 12 Point is \$1.50; 10 Point, \$2.00; 8 Point, \$3.00; 6 Point, \$4.00. The difference should be added or deducted from the gross figures.

20-lb. stock.

| | 100 | 250 | 500 | 1000 | ADDED 100 |
|---|--------|--------|--------|--------|-----------|
| 8-cent paper, \$1.20 per thousand | \$2.85 | \$3.20 | \$3.75 | \$4.85 | \$0.20 |
| 10-cent paper, 1.50 per thousand | 2.90 | 3.30 | 3.90 | 5.15 | .23 |
| 12-cent paper, 1.80 per thousand | 2.95 | 3.35 | 4.05 | 5.45 | .26 |
| 14-cent paper, 2.10 per thousand | 2.95 | 3.40 | 4.20 | 5.75 | .29 |
| 16-cent paper, 2.40 per thousand | 3.00 | 3.50 | 4.35 | 6.05 | .32 |
| 18-cent paper, 2.70 per thousand | 3.05 | 3.55 | 4.50 | 6.35 | .35 |
| 20-cent paper, 3.00 per thousand | 3.05 | 3.65 | 4.65 | 6.65 | .38 |

24-lb. stock will add for paper for each 1000 copies—on 8c. paper 25c., 10c. paper 31c., 12c. paper 37c., 14c. paper 44c., 16c. paper 50c., 18c. paper 56c., 20c. paper 62c.

Printing front and back, different forms, add for composition and 5c. per 100 additional for presswork.

Figure on 10c. paper and 20-lb. stock, unless requested otherwise.

FOLDED NOTE CIRCULARS.

Using quarter sheet demy or folio. The figures are based on 10 Point and \$1.00 for each page of composition. The value of a full page of 12 Point is 75c.; 8 Point, \$1.50; 6 Point, \$2.00. The difference should be added or deducted from the gross figures.

One page, folded, 20-lb stock.

| | 100 | 250 | 500 | 1000 | ADDED 100 |

| 20-cent paper | 9.55 | 10.80 | 12.60 | 16.35 | .73 |

The above figures include folding one fold.

24-lb. stock will add for paper for each 1000 copies—on 8c. paper 50c., 10c. paper 62c., 12c. paper 75c., 14c. paper 88c., 16c. paper \$1.00, 18c. paper \$1.12, 20c. paper \$1.25.

Figure on 10c. paper and 20-lb. stock, unless requested otherwise.

CARD SCALE.

This is the scale referred to in the Price List of Business Cards on opposite page. The scale is based on 22x28 inch cardboard.

EXPLANATION.—The first figures in Gothic in the upper left-hand corner of each size indicate the number of sheets required for 1000 cards of that size. The figures in Roman, after the dash, indicate the number of cards that can be cut from one sheet of cardboard, *measuring from the lower right-hand corner of the scale (A)*.
 The Italic figures outside the scale indicate the number of cuts to a sheet for any size of card not exceeding the size of scale, measuring from the upper left-hand corner (B); and the number of cards procurable from a sheet may be ascertained by multiplying the shortwise and longwise numbers. Example: If a card measures from B longwise to 8 and from B shortwise to 8 the number of cards procurable from one full-sized sheet of 22x28 inch card will be 64.

CARD SCALE.

The card scale on opposite page agrees approximately with the card scales issued by various dealers in cardboard. There is no standard scale. Printers should procure the card scale of the dealers who supply them with cards. The "Convenient Card Scale and Table of Prices," compiled by Mr. C. F. Pedrick and copyrighted and issued to the trade by Irwin N. Megargee & Co., dealers in cards, 12 S. Sixth St., Philadelphia, will save printers a great deal of time and insure accuracy in estimating. This valuable scale shows at a glance: (1) Cost per 1000 cards of any size after being cut from any kind or quality of board, ranging in list price from \$1.00 to \$15.00 per 100 sheets, 22x28 inches; (2) Which way of the sheet a card of any size will cut to the best advantage; (3) Number of sheets of 22x28 inches cardboard required to cut 1000 cards of any size. This scale is printed on a large sheet of bond paper in two colors, and applicants for it should inclose ten cents in postage stamps.

BUSINESS CARDS.

The sizes and figures given for business cards such as 11-91, 50c. stand for 11 full sheets each cutting 91 cards, and the value, including cutting of 1000 of such cards, is 50 cents. On the general rule that all the prices given in these tables have a margin of profit the stock figures represent an addition to the cost of 50 per cent.

Costing \$1.60 for 100 full sheets.

| | 100 | 250 | 500 | 1000 | ADDED 100 |
|--------------------------------------|--------|--------|--------|--------|-----------|
| 11-91, \$0.50 per thousand | \$1.00 | \$1.20 | \$1.50 | \$2.00 | \$0.11 |
| 13-77, .56 per thousand | 1.05 | 1.25 | 1.60 | 2.25 | .12 |
| 16-63, .63 per thousand | 1.15 | 1.40 | 1.70 | 2.30 | .13 |
| 18-56, .68 per thousand | 1.20 | 1.45 | 1.80 | 2.50 | .14 |
| 21-49, .75 per thousand | 1.25 | 1.50 | 1.85 | 2.55 | .15 |
| 24-42, .82 per thousand | 1.30 | 1.60 | 1.95 | 2.70 | .15 |
| 29-35, .95 per thousand | 1.40 | 1.65 | 2.10 | 2.85 | .16 |

Costing \$2.00 for 100 full sheets.

| | 100 | 250 | 500 | 1000 | ADDED 100 |
|--------------------------------------|------|------|------|------|-----------|
| 11-91, \$0.58 per thousand | 1.00 | 1.20 | 1.50 | 2.10 | 0.12 |
| 13-77, .64 per thousand | 1.05 | 1.25 | 1.60 | 2.25 | .13 |
| 16-63, .75 per thousand | 1.15 | 1.40 | 1.75 | 2.45 | .14 |
| 18-56, .79 per thousand | 1.20 | 1.45 | 1.85 | 2.55 | .15 |
| 21-49, .88 per thousand | 1.25 | 1.60 | 1.95 | 2.70 | .16 |
| 24-42, .97 per thousand | 1.30 | 1.65 | 2.00 | 2.80 | .16 |
| 29-35, 1.12 per thousand | 1.40 | 1.70 | 2.20 | 3.10 | .18 |

Costing \$3.00 for 100 full sheets.

| | 100 | 250 | 500 | 1000 | ADDED 100 |
|--------------------------------------|------|------|------|------|-----------|
| 11-91, \$0.75 per thousand | 1.15 | 1.35 | 1.55 | 2.25 | 0.14 |
| 13-77, .83 per thousand | 1.30 | 1.55 | 1.70 | 2.45 | .15 |
| 16-63, .97 per thousand | 1.45 | 1.70 | 1.90 | 2.75 | .16 |
| 18-56, 1.01 per thousand | 1.45 | 1.75 | 1.95 | 2.85 | .17 |
| 21-49, 1.25 per thousand | 1.45 | 1.80 | 2.00 | 2.95 | .18 |
| 24-42, 1.33 per thousand | 1.75 | 2.05 | 2.35 | 3.35 | .20 |
| 29-35, 1.55 per thousand | 1.75 | 2.10 | 2.45 | 3.60 | .22 |

Costing \$4.00 for 100 full sheets.

| | 100 | 250 | 500 | 1000 | ADDED 100 |
|--------------------------------------|------|------|------|------|-----------|
| 11-91, \$0.91 per thousand | 1.20 | 1.45 | 1.85 | 2.65 | 0.15 |
| 13-77, 1.03 per thousand | 1.30 | 1.55 | 2.00 | 2.90 | .16 |
| 16-63, 1.21 per thousand | 1.50 | 1.80 | 2.30 | 3.30 | .18 |
| 18-56, 1.33 per thousand | 1.50 | 1.85 | 2.35 | 3.40 | .19 |
| 21-49, 1.51 per thousand | 1.50 | 1.95 | 2.40 | 3.55 | .21 |
| 24-42, 1.69 per thousand | 1.75 | 2.10 | 2.60 | 3.80 | .22 |
| 29-35, 1.99 per thousand | 1.80 | 2.20 | 2.90 | 4.25 | .24 |

Round-corner cards will add 50c. for each 1000, added to the foregoing figures.

For cheap entertainment cards use \$2.00 scale. For business cards use the \$4.00 scale, unless specially requested for another grade.

In colored ink, add 50c. to the gross price for any number under 1000, and 10c. for added 1000. For two forms, two colors, add \$1.00 to the gross price; presswork scale for second form.

Cards, backed with another form on cheap grades, add \$1.00, and print both sides at once. On grades on this page make separate presswork and charge 50c. and presswork scale to gross price.

BUSINESS CARDS—Continued.

(See Card Scale on page 1126.)

The finer grades of business cards should be rated somewhat higher than common grades, on account of the extra care in composition and presswork.

Costing \$5.00 per 100 full sheets.

| | 100 | 250 | 500 | 1000 | ADDED 100 |
|--------------------------------------|--------|--------|--------|--------|-----------|
| 11—91, \$1.02 per thousand | \$1.30 | \$1.60 | \$1.80 | \$2.70 | \$0.16 |

| Totals | \$3.80 | \$4.25 | \$5.00 | \$5.80 |
| Tassels and stringing | .60 | 1.00 | 1.75 | 2.50 |
| Pencils | .75 | 1.50 | 3.00 | 4.00 |
| Totals | \$5.15 | \$6.75 | \$9.75 | \$12.30 |

Colored ink will add \$1.00 to any of these prices. In two colors, add \$2.00 to above values.

If you use fancy programmes, increase the price, adding the list value of the programme to be used; the card stock charged for being equal to the expense of inserts and any additional forms of presswork on the programme.

LARGE CARDS OR POSTER ANNOUNCEMENTS.

The card stock in the following prices represents a cost value of \$2.50 per 100 full sheets.

BLACK INK.

Card Board 22 x 28—

| | 100 | 250 | 500 | 1000 | ADDED 100 |
|--|--------|--------|---------|---------|-----------|
| Eighth sheet, stock \$0.45 per hundred | \$2.95 | \$3.75 | \$ 5.10 | \$ 7.85 | \$0.55 |
| Quarter sheet, stock .90 per hundred | 3.90 | 5.40 | 7.90 | 12.90 | 1.00 |
| Third sheet, stock 1.20 per hundred | 5.20 | 7.30 | 10.80 | 17.80 | 1.40 |
| Half sheet, stock 1.75 per hundred | 6.25 | 9.25 | 14.25 | 24.25 | 2.00 |
| Whole sheet, stock 3.50 per hundred | 9.50 | 15.10 | 24.50 | 43.25 | 3.75 |

If in colored ink, add for first 100, \$1.00, and 5 cents for added 100 up to quarter sheets, and 10 cents for sizes over quarter sheets.

TWO COLORS OF INK.

| | 100 | 250 | 500 | 1000 | ADDED 100 |
|-------------------------|--------|---------|---------|---------|-----------|
| Eighth sheet | \$4.50 | \$ 5.70 | \$ 7.70 | \$11.70 | \$0.80 |
| Quarter sheet | 5.50 | 7.35 | 10.50 | 16.75 | 1.25 |
| Third sheet | 7.00 | 9.60 | 14.00 | 22.75 | 1.75 |
| Half sheet | 8.00 | 12.50 | 21.90 | 33.65 | 2.35 |
| Whole sheet | 12.00 | 18.30 | 28.80 | 49.80 | 4.20 |

BLOTTING PADS.

| | 12s | 16s | 20s |
|---|--------|--------|--------|
| | 4 × 9½ | 4¾ × 6 | 3¾ × 6 |
| 60-lb. stock at \$0.10 per lb., 1,000 | \$3.95 | \$3.55 | \$3.30 |
| Added 1,000 | 2.35 | 1.95 | 1.70 |
| 80-lb. stock at \$0.10 per lb., 1,000 | 4.45 | 3.90 | 3.60 |
| Added 1,000 | 2.85 | 2.30 | 2.00 |
| Enameled blotter, 1,000 | 5.90 | 5.00 | 4.50 |
| Added 1,000 | 4.30 | 3.45 | 2.90 |

In colored ink add \$2.00 for any number under 5000. Over 5000, add for colored ink 40c. per 1000.

BILL HEADS.

The usual sizes of stock-ruled bill heads are 6s, 4s, 3s and 2s of flat cap. The prices given are for ruled papers, costing the printer the prices named, at the rate per pound. If special ruling is required, the full expense of ruling must be added to the figures, because the grade of paper used would represent the value without ruling.

8-cent paper.

| | 100 | 250 | 500 | 1000 | ADDED 100 |
|---|--------|--------|--------|--------|-----------|

14-cent paper.

| | | | | | |
|---|------|------|------|------|-----|
| 14-lb., 6s, \$1.00 per thousand | 1.60 | 1.85 | 2.25 | 3.10 | .17 |
| 14-lb., 4s, 1.47 per thousand | 1.65 | 1.95 | 2.50 | 3.55 | .22 |
| 14-lb., 3s, 1.95 per thousand | 1.70 | 2.10 | 2.75 | 4.05 | .27 |
| 14-lb., 2s, 2.94 per thousand | 1.80 | 2.35 | 3.20 | 5.05 | .36 |
| 16-lb., 6s, 1.13 per thousand | 1.60 | 1.90 | 2.30 | 3.20 | .18 |
| 16-lb., 4s, 1.68 per thousand | 1.65 | 2.00 | 2.60 | 3.80 | .24 |
| 16-lb., 3s, 2.25 per thousand | 1.75 | 2.15 | 2.90 | 4.35 | .30 |
| 16-lb., 2s, 3.36 per thousand | 1.85 | 2.45 | 3.45 | 5.45 | .41 |

Assorted 1000s, use the 1000 price for each size, cutting off the right-hand figure, giving the price per 100.

Give the figures for 12c. ruled stock and 14-lb. weight, unless specially requested for other grades.

MONTHLY STATEMENTS.

Stock-ruled statements are generally made from 20-lb. or 24-lb. folio, and have various designations. The regular size, 8s of folio, is $5\frac{1}{2} \times 8\frac{1}{2}$ inches; square statements, 12s of folio, $5\frac{1}{2} \times 5\frac{1}{2}$ inches; yankee statements, 12s of folio, $3\frac{1}{2} \times 8\frac{1}{2}$ inches; infant statements, 16s of folio, $4\frac{1}{4} \times 5\frac{1}{2}$ inches; and gem statements, 18s of folio, $3\frac{1}{3} \times 5\frac{1}{2}$ inches.

10-cent paper, 20-lb. stock.

| | 100 | 250 | 500 | 1000 | ADDED 100 |
|---|--------|--------|--------|--------|-----------|
| 8s, regular, \$0.75 per thousand | \$1.25 | \$1.70 | \$2.00 | \$2.75 | \$0.14 |

| Same, backed, with one fold | 5.50 | .40 |
| Backed with same form | 3.95 | .50 |

| | | |
|--|------|-----|
| Eighth Sheet of Folio (24-lb. paper, 12c. per hundred). | | |
| One form on a sheet, one side | 3.45 | .30 |
| Backed, one fold | 4.80 | .35 |
| Same form on both sides | 3.60 | .35 |

Blanks without ruling, omit prices for ruling as given above.

BANKERS' DEPOSIT BOOKS.

With printing on cover and on second and third pages inside.

| | | |
|--|-----------|-----------|
| Press or tag-board covers, 3¾ × 5½ inches. | FIRST 100 | ADDED 100 |
| 6 leaves | \$3.50 | \$2.00 |
| 12 leaves | 4.50 | 3.00 |
| 24 leaves | 5.50 | 4.00 |
| Press or tag-board covers, 4¼ × 6¾ inches. | | |
| 12 leaves | 5.00 | 3.40 |
| 24 leaves | 6.00 | 4.50 |
| Leather covers, 3¾ × 5½ inches. | | |
| 24 leaves | 10.00 | 8.00 |
| Leather covers, 4¼ × 6¾ inches. | | |
| 24 leaves | 14.00 | 9.00 |
| Leather covers, 3¼ × 7¾ inches. | | |
| 24 leaves | 14.00 | 9.00 |

Interleaved books—the large sizes will be \$3.00 extra for each 100 books.

BLANK BOOKS.

In handling blank books, printers should abandon the quire figuring of 80 pages, and substitute 100 pages.

Half binding may be either tight or loose smooth back, with paper or cloth sides and leather corners, usually colored leather.

Three-quarter binding is first-class in every respect as to stock, usually russia back and corners, finished with raised cords or hubs and cloth sides.

Full end and band binding and extra russia ends and bands, full gilt back, are well-known to the trade and need not be described. The figures here submitted are for the best of their class as to binding.

FLAT CAP. 18-LB. WESTON OR BROWN.

| | | | | |
|--|------------------|--------------------|-----------------|------------------|
| Books of 400 pages—5 quires. | HALF BINDING. | THREE- QUARTER. | FULL E. & B. | EXTRA RUSSIA. |
| Ledgers, journals and blank books—paper, \$1.25; ruling, \$2.00 | \$5.20 | \$5.90 | \$8.20 | \$9.70 |
| Added books in same order | 3.50 | 4.20 | 6.50 | 8.00 |
| Added 100 pages | .50 | .50 | .50 | .50 |
| Books with printed headings—ruling, \$2.50; composition, \$2.00; presswork, \$1.30 | 9.00 | 9.70 | 12.00 | 13.50 |
| Added books in same order | 3.90 | 4.60 | 6.90 | 8.40 |
| Added 100 pages | .60 | .60 | .60 | .60 |
| Books with full-page printing; border ruling, \$1.50; composition, \$3.00; presswork, \$1.50 | 9.35 | 10.05 | 12.35 | 13.85 |
| Added books in same order | 3.80 | 4.50 | 6.80 | 8.30 |
| Added 100 pages | .65 | .65 | .65 | .65 |

If two pages are printed full, add \$1.50 to each book.

Omitting border on full-page printed books will take off \$1.50 from first book and 20c. from additional books.

For less number of pages, use the same figures as for additional 100 pages.

20-lb. best ledger will add 10c. for each 100 pages.

Index in front, add \$1.25 to each book, including paper. Index through, add \$2.00 to each book. Canvas cover, add \$1.00.

Printed numbered lines down one page, add \$1.00 to first book; and if on both pages, add \$2.00 for first book.

Patent back, \$1.25 extra.

All additions to be added to gross figures.

PART XXII.

Condensed Price List
AND
Telegraph Code

CONDENSED PRICE LIST

AND TELEGRAPH CODE

For Telegraph Code for Body-Letter, see pages 1182 and 1183

For the convenience of customers requiring Type and Brass Rule in a hurry, when messages exceed the ten-word limit, a telegraph Code Word is printed opposite each important item in the following Condensed Price List. The use of a Code Word opposite the name of a series indicates that the entire series is wanted. The use of a Code Word opposite any one size of a series indicates that a font of that size only is wanted. If part of a series is wanted, the Code Word for the series may be telegraphed, followed by the word "except" and the Code Words opposite the sizes not required, thus: "Abeltree, except Aberuncate, Abetting," will indicate that the entire Alaskan series with the exception of the 18 point and 48 point size is ordered.

TELEGRAPH CODE FOR BODY-TYPE FONTS

Roman and German Body-Type is put up in fonts of 25, 50 and 100 lbs., or some multiple of these weights. To order a font of body-type, but two words are necessary: one word indicating the series and size (as given below opposite each size of a series) and one word indicating the weight of font desired.

Example:—The use of the words “**Serrature Sheenly**” would indicate that a 25-lb. font of 5 Point Modern Roman Series No. 46 is ordered.

CODE FOR WEIGHT

| | | | | | |
|-----------|------------|-------------|------------|--------------|------------|
| 1 lb..... | Serosity | 20 lbs..... | Serrated | 275 lbs..... | Sessional |
